ANNUAL SUMMARY AND ENROLLMENT STATISTICS

FY 2019

United States Department of Agriculture
Farm Service Agency

Conservation Reserve Program

ANNUAL SUMMARY – FISCAL YEAR 2019

Sign-up Type	Contracts	Farms	Acres	Annual Rental Payments a/ (\$Million)	Payments a/ (\$/Acre)
General	168,072	120,836	13,450,110	\$699	\$51.97
Continuous					
Non-CREP	361,148	340,109	6,618,248	\$890	\$134.44
CREP	56,603	38,319	940,775	\$153	\$162.52
Farmable Wetland	15,166	11,656	395,694	\$61	\$155.17
Total Continuous	432,917	248,599 b/	7,954,716	\$1,104	\$138.79
Grasslands	3,328	2,071	920,550 c/	\$12	\$13.52
Total CRP	604,317	340,109 b/	22,325,377	\$1,815	\$81.32

a/ Approximates October 2019 payments, before adjustments for haying/grazing, non-compliance, terminations, part-year contracts, and contracts not yet recorded.

b/ Number of farms not additive across sign-up types because farms may participate in multiple sign-up types.

c/ Includes 3,255 acres of pollinator habitat plantings (CP42).

* Does not include enrollments that do not start until FY 2020.

This report provides statistics for land enrolled in the Conservation Reserve Program (CRP), including a summary of FY 2019 CRP related activities, FY 2019 CRP outlays by payment type, CRP enrollment activity, outlay and sign-up history. The tables are based on contract data developed and maintained in CRP data files by Farm Service Agency (FSA) service centers and are generally based on the physical location of the CRP contracted land. FY 2019 ended September 30, 2019. The report was prepared by Alex Barbarika, Resource Economics Branch, Economic and Policy Analysis Division, Farm, Farm Production and Conservation Business Center, U.S. Department of Agriculture.

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotope, American Sign Language, etc.) should contact the responsible Agency or USDA's TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English.

General Signup. Producers with eligible lands compete nationally for acceptance based on an environmental benefits index (EBI) during specified enrollment periods. Producers may submit offers below soil-specific maximum rental rates and select wildlife-enhancing vegetative covers to increase EBI ranking.

Continuous (Non-CREP) Sign-up. Producers with eligible lands may enroll certain high priority conservation practices, such as filter strips, riparian buffers, and wetlands at any time during the year without competition. In addition to annual soil rental payment and cost-share assistance, many practices are eligible for additional annual and one-time up-front financial incentives. Lands enrolled under various initiatives are included in this category.

Conservation Reserve Enhancement Program (CREP). Under CREP agreements, Federal/State partnerships, implement projects designed to address specific environmental objectives through targeted CRP enrollments. Sign-up is held on a continuous basis, general sign-up practices may be included, and additional financial incentives are generally provided. Currently, there are 45 agreements in 33 States. It does not use the EBI and is non-competitive.

Farmable Wetland Program (FWP). Producers enroll small non-flood plain wetlands, and new practices added by the 2008 Farm Bill. Signup is conducted under modified continuous sign-up provisions. It does not use the EBI and is non-competitive.

Grasslands. Enrollments are to support grazing operations and to preserve and restore grasslands. No cropping history is required. It is competitive and uses its own EBI.

The accompanying tables are based on contract data developed and maintained in CRP data files by USDA Service Centers through the **end of September** and are based on the physical location of the CRP contracted land. Some adjustments have been made to correct miscoded data in the active contract files.

**CONTINUOUS CRP ENROLLMENT SINCE INCEPTION
THROUGH SEPTEMBER 2019**

CONSERVATION RESERVE PROGRAM
ENROLLMENT ACTIVITY AND NEWS –FISCAL YEAR 2019

- Enrollment ends September (and FY 2019) at 22.3 million acres.
- Continuous signup including CREP was opened for selected high-priority practices and CREP on June 3, 2019 and closed on August 23, 2019. The FY 2019 continuous signup (#52) enrolled about 240,000 acres.
- On June 3, 2019, Soil Rental Rates were updated. For continuous non-CREP, there is a 10 percent reduction, per the 2018 farm bill.
- A 1-year extension for contracts that expire September 30, 2019 was offered. Not eligible are practices eligible for continuous signup and contracts that have contract lengths of more than 14 years. This causes FY 2019 expirations to decline and FY 2020 expirations to increase. About 970,000 acres (81% of eligible acres) were extended.
- On June 24, 2019, it was announced that cost-share for management is no longer allowed, per the 2018 farm bill.
- On September 27, 2019, USDA announced that an environmental assessment of the changes made by the 2018 farm bill was available for public review.

Initiatives (and Allocations) *	First Year	Practice Code	Acres Added in FY 2019	Acres as of September
Wetland Restoration—Floodplain (581,600 ac.)	2004	CP23	37,897	368,851
Bottomland hardwood trees (250,000 ac.)	2004	CP31	0	139,015
Wetland Restoration—Non-Floodplain (768,400 ac.)	2005	CP23A	54,139	589,270
Upland bird habitat buffers (500,000 ac.)	2005	CP33	0	216,277
Longleaf pine plantings (250,000 ac.)	2007	CP36	0	159,255
Duck nesting habitat (600,000 ac.)	2007	CP37	12,695	412,442
State acres for wildlife enhancement (2,450,000 ac.)	2008	CP38	16,852	1,981,189
Highly erodible lands (750,000 ac.)	2012	Various	0	701,484
Pollinator habitat (450,000 ac.)	2012	CP42	0	440,640

* Excludes lands enrolled in CREP and lands where contracts do not start until October (FY 2020).

Performance Measure (Acres) *	Acres Added in FY 2019 3/	Acres as of September
Conservation buffers 1/	104,987	1,427,214
Wetland restorations 2/	143,492	2,334,042

* Includes CREP, FWP, and SAFE.

1/ CP21,CP22,CP29, and CP38 buffers.

2/ CP9,CP23,CP23A,CP30,CP31,CP37,CP38 wetland, and Farmable Wetland Program. Includes both wetland and associated upland buffers.

3/ Acres not counted until initial contract year.

CONSERVATION RESERVE PROGRAM

Under the Conservation Reserve Program (CRP), the U. S. Department of Agriculture (USDA) establishes contracts with agricultural producers to retire highly erodible and other environmentally sensitive cropland and pasture. During the 10- to 15-year CRP contract period, farmland is converted to grass, trees, wildlife cover, or other conservation uses providing environmental benefits, including surface and ground-water quality improvement, wildlife habitat creation, carbon sequestration, preservation of soil productivity, and reduction of offsite wind erosion damages. The program also assists farmers by providing a dependable source of income. The program was established by the Food Security Act of 1985, and was later amended by the Food, Agriculture, Conservation, and Trade Act of 1990, the Federal Agriculture Improvement and Reform Act of 1996, the Farm Security and Rural Investment Act of 2002, the Food, Conservation, and Energy Act of 2008, the Agricultural Act of 2014, and the Agricultural Improvement Act of 2018.

The CRP is administered by USDA's Farm Service Agency with technical assistance from USDA's Natural Resources Conservation Service and Forest Service, and from non-Federal technical service providers. Participants receive annual rental payments during the contract period and half the cost of establishing conservation covers. There are three primary ways for farmers and ranchers to participate in the CRP: general sign-up, continuous sign-up, and grasslands sign-up. Continuous sign-up includes the Conservation Reserve Enhancement Program (CREP) and the Farmable Wetlands Program. Grasslands sign-up is continuous with periodic ranking periods.

CRP LEGISLATIVE AND PROGRAMMATIC HISTORY

1985

The Food Security Act of 1985 was enacted December 23, 1985. The Act directed the Department of Agriculture to enroll 40 to 45 million acres by 1990 with two primary goals: reducing soil erosion on highly erodible cropland and curbing the production of surplus commodities. Secondary objectives included protecting the Nation's long-run capability to produce food and fiber, improving water quality, fostering wildlife habitat, and providing income support for farmers.

In exchange for annual rental payments and cost-share assistance of up to 50 percent of vegetative cover establishment costs, agricultural landowners and operators agree to establish and maintain an approved perennial cover on enrolled acreage for 10 to 15 years. Enrollment is generally limited to 25 percent of the cropland within each county. To be eligible, land had to have been cropped 2 of the 5 years preceding enrollment and meet highly erodible criteria. Allowable practices included:

Native and non-native grasses, softwood and hardwood trees, wildlife habitat mixes, field windbreaks, grassed waterways, and shallow water areas for wildlife. These were selected from the practices that were cost-shared by the long-standing Agricultural Conservation Program (ACP) portfolio.

"Maximum Acceptable Rental Rates" were established at the State or sub-State level. During the first 9 signups nearly all offers for below these rates were accepted to meet farm bill annual enrollment goals. Cost-share rates were based on State/county standards set under the pre-existing ACP.

Rental payments were limited to \$50,000 per year per person, and no more than 25 percent of the cropland per county may be enrolled. Subject to certain stipulations, haying or grazing may be allowed when emergencies arise such as drought or flooding.

1986

The first signup was held in March of 1986, and 700,000 acres were enrolled. Another 2 signups were held in 1986, enrolling an additional 7,500,000 acres.

1987-1989

Two signups were held in each of the 3 years, resulting in a total enrollment of 33 million acres by 1990. Three new eligibility criteria were added: Land within 100 feet of a water body, land where a wetland could be restored, and flood-plain land subject to scour erosion. Crop history criteria were still required, but soil erodibility criteria were not needed for these lands.

1990-1995

The Food, Agriculture, Conservation, and Trade Act of 1990 extended CRP through 1995 and expanded types of land eligible for enrollment to include lands that could reduce on-site or off-site threats to water quality if removed from production. It also reduced the acreage cap to 36.4 million acres.

Following 1990 Act passage, USDA's Farm Service Agency adopted new rental payment caps based on soil-specific productivity-based rental rates, and developed an environmental benefits index (EBI) to rank offers to include the additional environmental objectives in the 1990 Act.

Four signups were conducted under the 1990 Act, signups 10-13, bringing total enrollment to 35 million acres by the end of 1995. The EBI and new rental rate bid caps were deployed. But because there was ample room under the new enrollment cap all offers with acceptable rental rates were accepted. Some new practices were added: Grass and forested riparian buffers that could protect waters from agricultural runoff, and marginal pasture land (MPL) that could be converted to riparian forest buffers for water quality protection. The MPL did not need to meet crop history criteria, and new maximum rental payment caps were established for MPL.

It was uncertain whether CRP would be re-authorized after the 1990 Act expired, so a survey of participant plans for future use of CRP lands was conducted. Survey results indicated that the average age of respondent was 60 years, 71 percent were owner operator, and 30 percent were retired. Respondents said that if contracts expired and there was no re-enrollment opportunity, they would return 63 percent of acres to crop production. Of the 35 million acres enrolled at the time, 41 percent had been used for wheat, 14 percent to corn, and 10 percent to soybeans before enrolling in CRP.

1996-2000

In 1996, **USDA initiated** enrollment of selected practices, such as filter strips and riparian buffers, on a continuous basis without competition. An annual incentive payment equal to 20 percent of the annual rental rate was provided for many of these practices. To make room for the anticipated increased continuous signup enrollment an early contract termination opportunity without penalty was offered for land meeting certain eligibility criteria. About 1 million acres were withdrawn.

The **Federal Agriculture Improvement and Reform Act of 1996** re-authorized CRP enrollment through 2002 and set a maximum enrollment of 36.4 million acres at any one time. It also allowed early contract termination for lands meeting specified environmental criteria. About 1 million acres were withdrawn here, as well.

General signups 15, 16, 18, 20 were conducted. Signup 15, accepted 16.1 million acres. This did not cause the acreage cap to be breached because around 20 million acres were expiring. (So many acres were expiring all at once because 1-year contract extensions had been offered in 1994 and 1995 in lieu of conducting general signups.)

Following passage of the 1996 Act, FSA modified the Environmental Benefits Index (EBI) to explicitly include a wildlife benefits component, which was given equal weight with soil erosion and water quality benefits.

In 1998, FSA created the Conservation Reserve Enhancement Program (CREP), further advancing CRP's environmental targeting. CREP authorizes State-Federal conservation partnerships that address specific State and nationally significant water quality, soil erosion, and wildlife habitat concerns related to agriculture. CREP enrollment is held on a continuous basis; enrollment may include both general and continuous sign-up practices, and additional financial incentives are generally provided. An up-front signing incentive payment and a practice incentive payment were established in 2000 to further enhance continuous enrollment, including CREP. Partners provide 20 percent of overall program costs.

2001

The **FY 2001 Agriculture Appropriations Act** established the Farmable Wetland Pilot Program (FWP), which provided for non-competitive enrollment under continuous sign-up provisions and incentives for up to 500,000 acres of small non-flood plain wetlands and adjacent uplands in 6 States (Nebraska, Iowa, Minnesota, North Dakota, South Dakota, and Montana). Enrollment was limited to 100,000 acres per State.

The U.S. Fish and Wildlife published a study that estimated that CRP accounted for 2 million additional ducks per year between 1992 and 1997 in the Prairie Pothole region in North Dakota and South Dakota, and eastern Montana.

2002

The **Farm Security and Rural Investment Act of 2002** extended CRP enrollment authority through 2007 and increased the enrollment cap by 2.8 million acres to 39.2 million acres. Basic cropland eligibility is re-defined to be land that has been cropped or considered cropped in at least 4 of the 6 years preceding enactment. It had been 2 of 5 years before preceding sign-up.

In addition, the 2002 Act permitted non-emergency (managed) harvesting of forage subject to the requirement that environmental benefits be maintained or enhanced and required equal consideration be given for soil erosion, water quality, and wildlife benefits. Practices eligible under marginal pasture criteria, which have no cropping history requirement, are expanded to permit appropriate vegetative covers, rather than requiring the land be planted only to trees.

Other changes included extending eligibility to field remnants made infeasible for farming where buffer practices are enrolled; cropland where enrollment would provide water conservation benefits; and land subject to expiring CRP contracts. The 2002 Act also expanded FWP from the original six States to all States and raised the enrollment cap to 1,000,000 acres. While maximum wetland size was increased to 10 acres, only 5 acres are eligible to receive rental payments.

2003

General signup 26 was held under 2002 Farm Bill provisions, enrolling 2 million acres. Continuous signup, including CREP and FWP reached 2.5 million acres. New CREP agreements signed with Florida (30,000 acres) and Nebraska (100,000 acres). Florida's CREP was never started. Refunded \$16 million to producers who had rental payment reductions for emergency haying and grazing of their CRP in 2002. Beginning with Signup 26, new participants were required to agree to perform mid-contract management of their CRP lands, to assure that environmental benefits are maintained. Practices such as light disking and interseeding will be utilized to maintain plant diversity and vigor. Cost-share is provided.

The bottomland hardwood tree planting initiative to restore wetlands in floodplains was established, reserving 500,000 acres. The wetland restoration practice was moved from general to continuous signup. Initiative targeting up to 500,000 acres of lands in the 100-year floodplain.

In cooperation with the U.S. Geological Service, conducted a survey in 2001 of participants experience with wildlife and vegetation management issues of CRP lands. Among its findings was that positive changes in wildlife populations were noted by 73 percent of respondents. The respondents also reported 55 percent of covers were native grasses, 31 percent were introduced grasses, and 14 percent were trees. Management activities reported included mowing/haying, 58 percent of acres, herbicides, 26 percent, burning, 25 percent, and grazing, 21 percent. Fifteen percent of respondents reported emergency haying/grazing at least once.

2004

General signup 29 held, enrolling 1.2 million acres. Continuous signup, including CREP and FWP added 390,000 acres reaching 2.9 million acres. New CREP agreements signed with Ohio (Scioto River basin), Pennsylvania (Ohio River basin), New Jersey, and New York (12 watersheds). Expanded continuous signup wetland restoration initiative to include non-floodplain (Prairie potholes, mainly) and Playa wetland complexes.

2005

No general signup was held, and a 1-year extension for 2005-expiring contracts was implemented. Continuous signup increased 300,000 acres to 3.2 million acres. Northern Bobwhite Quail Initiative established, reserving 250,000 acres for enrollment of upland bird nesting and brood-rearing habitat buffers. New CREP agreements signed with Louisiana and Indiana. Awarded grants totaling \$367,000 for estimating CRP's impact on populations of grassland birds, including that of ducks, pheasants, bobwhite, and songbirds.

Re-enrollment and extension of 2007- to 2010-expiring contracts (REX). To ensure that CRP's benefits continue without interruption, FSA in 2006 offered holders of contracts set to expire between 2007 and 2010 (28 million acres) the opportunity to re-enroll or extend their contracts. FSA divided expiring contracts into five equal-size categories (quintiles) based on environmental benefits index (EBI) scores of the land under contract. FSA offered the highest EBI quintile new 10 or 15-year contracts. The 2nd highest quintile were offered 5-year contract extensions, the 3rd highest were offered 4-year extensions, and so forth.

Administrative PayGo was initiated by Office of Management and Budget. For CRP this means that any administrative policy change that increases costs must be offset by some other administrative policy change in CRP or other mandatory program that reduces costs. A change made by a farm bill or other law is not subject to administrative PayGo. Some examples of changes requiring PayGo include new or expanded initiatives that have incentive payments above and beyond the standard cost-share and annual rental payments. CREPs generally have additional incentives and are subject to PayGo.

2006

General signup 33 held, enrolling 900,000 acres. Continuous signup, including CREP and FWP added 350,000 acres. New CREP agreements signed with Colorado (Republican River and High Plains projects) and Idaho (Snake River project).

The **Emergency Supplemental Appropriations Act of 2006** established the Emergency Forestry Conservation Reserve Program (EFCRP). Provides assistance to timberland damaged by the Gulf Coast Hurricanes of 2005 (mainly Katrina and Rita). A total of 295,000 acres were enrolled, mostly in Mississippi. Acreage enrolled does not count against the CRP enrollment cap.

An initiative to target Prairie Pothole duck nesting habitat established to areas with the highest potential for duck production, reserving 100,000 acres.

2007

Approximately 84 percent of the 28 million acres of general signup set to expire between 2007 and 2010 accepted the REX offer. Continuous signup added 528,000 acres. New CREP agreements signed with Arkansas and Oklahoma.

Two continuous signup initiatives were rolled out: the Longleaf Pine forest ecosystem restoration and the State Acres for Wildlife (SAFE) initiatives.

Results of a nationwide study of CRP's impact on water quality were released. The study was accomplished via contract with Food and Agricultural Policy Research Institute (FAPRI), and is based on modeling. It estimated that sediment was reduced by CRP in 2007 by 23 million tons, and that nitrogen and phosphorus was reduced 116 million pounds and 12 million pounds, respectively.

CRP enrollment reaches its highest level, 36.8 million acres.

2008

The **Food, Conservation, and Energy Act of 2008** extended Conservation Reserve Program enrollment authority through September 30, 2012 and required that enrollment be reduced to no more than 32 million acres beginning October 1, 2009. The bill created the Transition Incentive Program to encourage the sale or lease of expiring CRP lands of retiring farmers to beginning or socially disadvantaged farmers. Expiring contract-holders are given 2 extra years of rental payments. \$25 million was authorized.

Other changes included: (1) expansion of Farmable Wetland Pilot Program eligibility criteria; (2) provision of up to \$100 million for a 50-percent cost-share incentive for tree thinning activities; (3) implementation of new payment limitation applicability and new adjusted gross income based eligibility criteria, updated eligibility to require cropping history in at least 4 of 6 years during 2002 to 2007, and (5) provided additional authority to waive the county cropland enrollment limit. There was very little interest in the tree thinning incentive, because the 50% cost-share was not sufficient.

Continuous signup added 400,000 acres. 75 SAFE projects approved in 33 states plus one in Puerto Rico. CREP agreement signed with Kansas. CREP enrollment reaches 1,000,000 acres.

2009

In lieu of a general signup, a 1-year contract extension was offered for expiring contracts. Continuous signup added 472,000 acres. To promote wetland restoration, \$200 million in incentives over 10 years is made available. New CREP agreements signed with Hawaii and Arkansas.

2010

General signup 39 held, enrolling 4.2 million acres. Began awarding EBI points if pollinator habitat plantings are incorporated and about 40,000 acres were established. Continuous signup, including CREP and FWP added 630,000 acres. The 100,000-acre James River CREP agreement signed with South Dakota.

Acreage allocations for SAFE, Prairie Pothole Duck Nesting Habitat, and Upland Bird Habitat Buffers initiatives were increased by a combined total 300,000 acres.

Signup for the Transitions Incentive Program (TIP) under 2008 farm bill provisions started.

2011-2012

General signup 41 held, enrolling 2.8 million acres. Continuous signup, including CREP and FWP added 500,000 acres. New CREP agreement with Louisiana, the Coastal Prairie Region CREP signed.

The **American Taxpayer Relief Act of 2012** reinstated enrollment authority on January 1, 2013, and extended authority until September 30, 2013.

2013

General signup 43 held, enrolling 3.9 million acres. Continuous signup, including CREP and FWP added 628,000 acres. Rio Grande River Basin CREP agreement signed. Implemented Highly Erodible Lands continuous signup initiative. Allows enrollment of up to 750,000 acres of lands with erodibility index of 20 or more. Transition Incentive Program signup ended in February to ensure that \$25-million limit would not be breached. About 275,000 acres were transitioned to new or underserved farmers and ranchers. Announced new initiative to restore one million acres of wetland and grassland, including a 100,000-acre Pollinator Habitat Initiative.

A new farm bill was not in place by September 30, 2013, so enrollment authority was suspended and continuous signup activity was suspended September 30, 2013.

2014

Still no new farm bill, so enrollment authority was then suspended until February 2014 when the **Agricultural Act of 2014** (2014 Farm Bill) was enacted. Continuous signup was resumed in June. Among other things, the 2014 Farm Bill extended enrollment authority to September 30, 2018, and required that no greater than 24

million acres be enrolled beginning October 1, 2016. It also provided: authority to enroll up to 2 million acres of grasslands (a new category of eligible land that does not have a crop history requirement); up to \$10 million in incentive payments to encourage thinning of CRP tree stands to improve wildlife habitat; and up to \$33 million for Transition Incentives Program (TIP) payments. It also removed the requirement to reduce rental payments for emergency haying and grazing.

The act also included the provision for the opportunity to terminate certain contracts early without “penalty”. Must have been enrolled for at least 5 years. This provision only applied during FY 2015.

Continuous Signup #47 (FY 2015) opened October 1, 2014. It excluded SAFE and Highly Erodible Lands Initiatives.

On November 25, 2014, USDA announced that 82,000 acres were made available in North Dakota, consisting of 50,000 acres for SAFE practices and 32,000 acres for FWP.

2015

Soil Rental Rates were updated April 23, 2015, primarily based on the NASS 2014 survey.

On May 28, 2015, USDA announced that 800,000 additional acres would be available under certain wetland and wildlife initiatives. Also announced was that eligible general signup contracts expiring September 30, 2015 will be eligible for 1-year contract extensions.

On May 29, 2015, USDA announced general signup #49 will be held from December 1, 2015, through February 26, 2016.

On August 27, 2015, USDA announced that a grasslands signup (#200) will begin September 1, 2015 and end November 15, 2015. Rental payments will be 75 percent of the estimated grazing value of the land. Over 1 million acres were offered and over 100,000 acres were accepted.

2016

Over 1.8 million acres were offered during general signup #49, and 411,000 acres were determined acceptable. The EBI cutoff was 292.

During National Pollinator Week in June 20-26, 2016, USDA reported that CRP currently provided 15 million acres pollinator friendly habitat. USDA also announced a Memorandum of Understanding with two honey bee organizations to ensure USDA’s conservation initiatives are as advantageous as possible to pollinators.

On September 9, 2016, USDA announced it is providing \$1 million in partnership with New York state to enroll riparian buffers in the Chesapeake Bay watershed.

Continuous signup (#50) was ended on September 16, ensure that the statutory enrollment cap was not exceeded, and make policy decisions about how to address FY17 contracts. More than 1.3 million acres were enrolled, double the pace of the previous year.

The second grasslands ranking period ended November 10, 2016, in which 5,000 offers covering over 1 million acres were received. Offers not selected in the 1st ranking period and new lands were eligible.

The 3rd grasslands ranking period ended December 16, 2016. This signup targeted small-scale livestock grazing operations, having 100 or fewer head of grazing dairy cows (or the equivalent).

On December 29, 2016, USDA announced that contract holders with eligible lands could terminate contracts early, if the land is transitioned to new or beginning, veteran, or underserved farmers beginning on January 9, 2017. Early termination penalties are waived.

Starting on December 1, 2016, FSA policy set a maximum size of pollinator habitat of 100 acres per farm.

2017

On February 2, 2017, FSA set the maximum payment cap at \$300/acre and reduced the Signing Incentive Payment for non-water quality continuous signup practices by \$7.50/acre for 10-year contracts and by \$12.50/acre for 15-year contracts. The changes do not apply to CREP.

On February 17, 2017, FSA announced that signup is now open for the Joint Kansas and Nebraska Migratory Bird Playa Lakes SAFE project. Producers may choose their own rental payment, that will not be subject to SRR's of their offered acreage. However, offers are subject to the \$300 rental rate maximum. Each state was allocated 10,000 acres. The only practice available was non-floodplain wetland restoration.

The 1st batching period for the tree thinning incentive acceptances was conducted on May 5, 2017. At the same time, it was announced that the 2nd batching will be done on May 21, 2017.

USDA opened enrollment of new water quality practices on January 9, 2017, denitrifying bioreactors and saturated buffers. These practices may be installed in conjunction with filterstrips (CP-21) and riparian buffers (CP22), and are a part of the Clean Lakes, Estuaries, and Rivers initiative.

On July 7, 2017, FSA announced that soil rental rates will be posted for state and county review on July 6, 2017.

On September 12, 2017, FSA announced that USDA has signed an agreement with the National Bobwhite Conservation Initiative (NBCI). The agreement establishes a framework for NBCI staff to work with USDA in a consultancy role to share technical information.

USDA announced on October 6, 2017 that it was temporarily suspending acceptance most new continuous signup offers until later in the 2018 fiscal year. Enrollment of Pollinator Habitat initiative was terminated because the program has reached its acreage enrollment goal. CREP and grasslands were not suspended.

Also, it was announced that a 2nd batching period will be held for the Tree Thinning Incentive. To be considered for the third batching period, CRP participant requests must be filed by October 31, 2017.

2018

Continuous signup was restarted June 4, 2018 to run through August 17, 2018, and only water quality practices were eligible. Except for CREP, SIP, PIP, and annual rental incentives were not provided.

On June 1, 2018, USDA announced that there would not be a general signup in FY 2018, and that a 1-year contract extension would be offered. Additionally, FSA established new ranking criteria for CRP grasslands. To ensure all grasslands offers are treated equally, applicants who previously applied will need to reapply to be ranked according to the revised criteria.

Updated soil rental rates were posted June 4, 2018. These rates were not appealable, and any soils with a productivity factor greater than 1.0 were set at the county average NASS rate. To 27 million acres

On December 20, 2018, the **Agriculture Improvement Act of 2018** (2018 Farm Bill) was signed by the President. The law authorizes enrollment through September 30, 2013, increases the enrollment cap incrementally from 24 million acres to 27 million acres in 2023, and reduces the rental rates for non-CREP continuous signup by 10 percent, and by 15 percent for general signup.

The law also provided \$50 million for the Transition Incentive Program and \$12 million for forest management (tree thinning) practices, and up to 50 percent of installation costs for Practice Incentive Payments, and specifies that Signing Incentive Payments would be set at 32.5 percent of the annual rental payment. Other changes include language codifying CREP and the CLEAR initiative, prohibiting cost-share for management activities other than on riparian buffers in CREP.

It also establishes 2 new pilot programs. One is the Soil Health and Income Protection program (SHIPP), with a 50,000-acre cap, 3- 5- year contracts, in the Prairie Pothole region. The other is the Clean Lakes, Estuaries, and Rivers (CLEAR30) initiative, which have 30-year contracts, and is allowed for expiring continuous signup water quality practices in the Chesapeake Bay and Great Lakes regions.

2019

On May 15, 2019, USDA announced that continuous signup would re-open for certain practices, that 1-year contract extensions would be offered for expiring contracts, and that a general signup would begin accepting offers in December 2019.

Also, on May 15, it was announced that signup for TIP would begin on June 3, 2019, and that non-CREP continuous signup would open on June 3 as well for certain high priority practices. The annual incentive will not be provided. CREP will also re-open.

Updated Soil Rental Rates (SRR) were posted on June 3, 2019, for review by state and county offices.

1/ Includes Grassland.

2/ Includes Farmable Wetland Program.

3/ Includes both introduced and native grasses.

4/ Includes both hardwood and softwood trees.

5/ Includes only the buffers associated with CP27 contracts.

6/ Does not include about 40,000 acres from signup 39 before CP42 was implemented.
