From the Alaska FSA State Executive Director

Who asked for all this rain? What a challenging summer it has been – starting with hot and dry conditions and morphing into one of the wettest Augusts on record. We're hearing about feed shortages and extreme weather events across the State. It doesn't hurt to communicate with your County Executive Director or even myself about concerns you are facing. We may have a program that could help or we may know of availability with a sister agency. As we learn more about the impact that the Inflation Reduction Act will have here in Alaska, we look forward to bringing you updates and sharing opportunities.

My congratulations go out to Martha Merry, Amy Seitz & Jane Conway of Lancashire Farm in Soldotna, the 2022 Alaska State Fair Farm Family of the Year. I have worked with Amy in her leadership position at the Alaska Farm Bureau for many years and Janes' famous "Wool Dryer Balls" have been a favorite to gift to my friends and family. At the Directors reception where the plaque was presented, it was such a delight to hear Martha

tell stories about coming to Alaska in 1948 and homesteading their farm. She told of her fathers' endeavors producing fresh eggs & milk that the locals simply weren't used to. 75 years and three generations later this family has found their niche and works hard to showcase and promote Alaska Agriculture.

Back-to-school, the final week of the Fair, and the upcoming hunting seasons all indicate the changing of the seasons. I'm looking forward to harvest festivals & celebrations, Packers Football, and hopefully a vacation somewhere warm!

Reminders:

- The following crops in Alaska have a NAP application deadline of September 01, 2022: Floriculture (Peonies), Aquaculture, Turf Grass
- Reimbursement Transportation Cost Payment Program (RTCP) applications deadline is September 02, 2022.
- The following crops in Alaska have a NAP application deadline of September 30, 2022: Perennial Grass Forage (Perennial Grasses intended use seed), Honey
- Acreage Reporting date for 2023 Crop year for Value-loss crops and controlled environment crops (except Nursery) is September 30, 2022.
- Applications for OTECP and OCCSP are both due October 31, 2022

Amy Pettit
State Executive Director
Alaska Farm Service Agency

USDA Encourages Producers to Consider NAP Risk Protection Coverage Before Crop Sales Deadlines

The Farm Service Agency encourages producers to examine available USDA crop risk protection options, including federal crop insurance and Noninsured Crop Disaster Assistance Program (NAP) coverage, before the applicable crop sales deadline.

Producers are reminded that crops not covered by insurance may be eligible for NAP. Beginning, underserved and limited resource farmers are now eligible for free catastrophic level coverage.

Federal crop insurance covers crop losses from natural adversities such as drought, hail and excessive moisture. NAP covers losses from natural disasters on crops for which no permanent federal crop insurance program is available, including perennial grass forage and grazing crops, fruits, vegetables, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, bioenergy, and industrial crops.

Producers can determine if crops are eligible for federal crop insurance or NAP by visiting https://webapp.rma.usda.gov/apps/ActuarialInformationBrowser2018/CropCriteria.aspx?utm_medium=email&utm_source=govdelivery.

The 2018 Farm Bill reinstates higher levels of coverage, from 50 to 65 percent of expected production in 5 percent increments, at 100 percent of the average market price. Producers of organics and crops marketed directly to consumers also may exercise the “buy-up” option to obtain NAP coverage of 100 percent of the average market price at the coverage levels of between 50 and 65 percent of expected production. NAP basic coverage is available at 55 percent of the average market price for crop losses that exceed 50 percent of expected production.

For all coverage levels, the NAP service fee is the lesser of \$325 per crop or \$825 per producer per county, not to exceed a total of \$1,950 for a producer with farming interests in multiple counties.

For Alaska, 2022 Fall deadlines for crop year 2023 coverage:

The following crops in Alaska have a NAP application deadline of **September 01, 2022**:
Floriculture (Peonies), Aquaculture, Turf Grass

The following crops in Alaska have a NAP application deadline of **September 30, 2022**:
Perennial Grass Forage (Perennial Grasses intended use seed), Honey

For Alaska, 2023 Spring deadlines for crop year 2023 coverage:

The following crops in Alaska have a NAP application deadline of **March 15, 2023**:

Spring planted annual crops (vegetables)

Deadlines for coverage vary by state and crop. To learn more about NAP visit www.fsa.usda.gov/nap or contact your local USDA Service Center. To find your local USDA Service Centers go to <http://offices.usda.gov>.

Federal crop insurance coverage is sold and delivered solely through private insurance agents. Agent lists are available at all USDA Service Centers or at USDA’s online Agent Locator: <http://prodwebnlb.rma.usda.gov/apps/AgentLocator/#>. Producers can use the USDA Cost Estimator, https://ewebapp.rma.usda.gov/apps/costestimator/Default.aspx?utm_medium=email&utm_source=govdelivery, to predict insurance premium costs.

USDA Reminds Farmers and Ranchers of Sept. 2 Program Deadline to Offset Transportation Costs in Alaska

Call your local FSA County Office Today!

The U.S. Department of Agriculture (USDA) in Alaska opened enrollment for the [Reimbursement Transportation Cost Payment Program \(RTCP\)](#), which has increased its available funding to \$3 million for fiscal year 2022. The enrollment period began July 11 and will run through Sept. 2.

The Consolidated Appropriations Act of 2022 reauthorized RTCP and allows farmers and ranchers in Alaska, Hawaii and insular areas including the Commonwealth of Puerto Rico, Guam, American Samoa, Commonwealth of the Northern Mariana Islands, Virgin Islands of the United States, Federated States of Micronesia, Republic of the Marshall Islands and Republic of Palau, to recover any costs to transport agricultural commodities or inputs used to produce an agricultural commodity.

RTCP payments are calculated based on the costs incurred for transportation of the agricultural commodity or inputs during a 12-month period, subject to an \$8,000 per producer cap per fiscal year once the allocated \$3 million has been reached. If total transportation cost for payments exceeds the funds available from the program for a fiscal year, payments will be reduced on a pro-rata basis.

Farmers and ranchers interested in participating in RTCP can obtain applications and other documents by calling toll-free 1-866-794-1079 or by contacting FSA at their local [USDA Service Center](#).

USDA Reminds Alaska Producers to File Crop Acreage Reports

Agricultural producers in Alaska who have not yet completed their [crop acreage reports](#) after planting should make an appointment with their U.S. Department of Agriculture (USDA) Farm Service Agency (FSA) service center before the applicable deadline.

An acreage report documents a crop grown on a farm or ranch and its intended uses. Filing an accurate and timely acreage report for all crops and land uses, including failed acreage and prevented planted acreage, can prevent the loss of benefits.

How to File a Report

The following acreage reporting dates are applicable in Alaska:

September 30, 2022	Value-loss crops and controlled environment crops
December 15, 2022	(except Nursery)
January 2, 2023	Fall-Seeded Small Grains
May 31, 2023	Honey
July 15, 2023	Nursery
	All other spring planted crops, CRP, Perennial Forage

To file a crop acreage report, producers need to provide:

- Crop and crop type or variety.
 - Intended use of the crop.
 - Number of acres of the crop.
 - Map with approximate boundaries for the crop.
 - Planting date(s).
-

- Planting pattern, when applicable.
- Producer shares.
- Irrigation practice(s).
- Acreage prevented from planting, when applicable.
- Other information as required.

Acreage Reporting Details

The following exceptions apply to acreage reporting dates:

- If the crop has not been planted by the acreage reporting date, then the acreage must be reported no later than 15 calendar days after planting is completed.
- If a producer acquires additional acreage after the acreage reporting date, then the acreage must be reported no later than 30 calendar days after purchase or acquiring the lease. Appropriate documentation must be provided to the county office.
- If crops are covered by the Noninsured Crop Disaster Assistance Program, acreage reports should be submitted by the applicable state, county, or crop-specific reporting deadline or 15 calendar days before grazing or harvesting of the crop begins.

Producers should also report crop acreage they intended to plant, but due to natural disaster, were unable to because of a natural disaster.

Prevented planting acreage must be reported on form CCC-576, Notice of Loss, no later than 15 calendar days after the final planting date as established by FSA and USDA's Risk Management Agency.

FSA offers continuous certification for perennial forage. This means after perennial forage is reported once and the producer elects continuous certification, the certification remains in effect until a change is made. Check with FSA at the local USDA Service Center for more information on continuous certification.

New Option to View, Print and Label Maps on Farmers.gov

Producers with an eAuth account linked to their USDA customer record can now access their FSA farm records, maps and common land units by logging into farmers.gov. A new feature will allow producers to export field boundaries as shapefiles and import and view other shapefiles, such as precision agriculture boundaries. This will allow producers to view, print and label their own maps for acreage reporting purposes.

Producers who have authority to act on behalf of another customer as a grantee via form FSA-211 Power of Attorney, Business Partner Signature Authority, along with other signature types, or as a member of a business can now access information in the farmers.gov portal.

Producers can learn how to use the farmers.gov Farm Records Mapping functionality with this [fact sheet](#) and these [video tutorials](#).

More Information

For questions, please contact the Northern County FSA office at 907-895-4242 ext 150 and the Southern County FSA Office at 907-761-7773.

USDA to Mail Additional Pre-Filled Applications to Producers Impacted by 2020, 2021 Disasters

More than 18,000 producers will receive applications in late August

The U.S. Department of Agriculture (USDA) today announced another installment (phase) in assistance to commodity and specialty crop producers impacted by natural disaster events in 2020 and 2021. More than 18,000 producers will soon receive new or updated pre-filled disaster applications to offset eligible crop losses. Approximately \$6.4 billion has already been distributed to 165,000 producers through USDA's Farm Service Agency's (FSA) Emergency Relief Program (ERP).

FSA will begin mailing pre-filled applications in late August to producers who have potentially eligible losses and:

- Received crop insurance indemnities for qualifying 2020 and 2021 disaster events after May 2, 2022.
- Received crop insurance indemnities associated with Nursery, Supplemental Coverage Option (SCO), Stacked Income Protection Plan (STAX), Enhanced Coverage Option (ECO) and Margin Protection (MP) policies.
- New primary policyholders not included in the initial insured producer Phase 1 mailing from May 25, 2022, because their claim records had not been filled.
- Certain 2020 prevent plant losses related to qualifying 2020 disaster events that had only been recorded in crop insurance records as related to 2019 adverse weather events and, as such, were not previously provided in applications sent earlier this year.
- New Substantial Beneficial Interest (SBI) records, including SBIs where tax identification numbers were corrected.

Producers are expected to receive assistance direct deposited into their bank account within three business days after they sign and return the pre-filled application to the FSA county office and the county office enters the application into the system.

Before applying any program payment factors or eligibility criteria, it is estimated that this next installment (phase) may generate about \$756 million in assistance.

Emergency Relief Payments to Date

This emergency relief under ERP complements ERP assistance recently provided to more than 165,000 producers who had received crop insurance indemnities and Noninsured Crop Disaster Assistance Program (NAP) payments for qualifying losses. USDA has processed more than 255,000 applications for ERP, and to date, has made approximately \$6.4 billion in payments to commodity and specialty crop producers to help offset eligible losses from qualifying 2020 and 2021 natural disasters. Also, earlier this year, staff processed more than

100,000 payments through the Emergency Livestock Relief Program (ELRP) and paid eligible producers more than \$601.3 million for 2021 grazing losses within days of the program announcement.

Phase Two

The second phase of both ERP and ELRP will be aimed at filling gaps and provide assistance to producers who did not participate in or receive payments through the existing risk management programs that are being leveraged for phase one implementation. USDA will keep producers and stakeholders informed as program details are made available.

More Information

In addition, on Aug. 18, 2022, USDA published a technical correction to the [Notice of Funds Availability](#) for ERP and ELRP to clarify how income from the sale of farm equipment and the provision of production inputs and services to farmers, ranchers, foresters, and farm operations are to be considered in the calculation of average adjusted gross farm income. Producers whose average adjusted gross farm income is at least 75% of the producer's the average Adjusted Gross Income can gain access to a higher payment limitation.

ERP and the previously announced ELRP are authorized by the *Extending Government Funding and Delivering Emergency Assistance Act*, which President Biden signed into law in 2021. The law provided \$10 billion to help agricultural producers impacted by wildfires, droughts, hurricanes, winter storms and other eligible disasters experienced during calendar years 2020 and 2021.

For more information on ERP and ELRP eligibility, program provisions for historically underserved producers as well as Frequently Asked Questions, producers can visit [FSA's Emergency Relief webpage](#). A [new public-facing dashboard](#) on the ERP webpage has information on ERP payments that can be sorted by crop type – specialty or non-specialty– specific commodities and state. FSA will update the dashboard every Monday.

Additional USDA disaster assistance information can be found on [farmers.gov](#), including the [Disaster Assistance Discovery Tool](#), [Disaster-at-a-Glance fact sheet](#) and [Farm Loan Discovery Tool](#). For FSA and Natural Resources Conservation Service programs, producers should contact their local [USDA Service Center](#). For assistance with a crop insurance claim, producers and landowners should contact their [crop insurance agent](#).

USDA Accepting Applications to Help Cover Costs of Organic, Transitioning Producers

Applications for the Organic and Transitional Education Certification Program (OTECP) and Organic Certification Cost Share Program (OCCSP) due October 31, 2022.

Agricultural producers and handlers who are certified organic, along with producers and handlers who are transitioning to organic production, can now apply for the U.S. Department of Agriculture's (USDA) [Organic and Transitional Education Certification Program](#) (OTECP) and [Organic Certification Cost Share Program](#) (OCCSP), which help producers and handlers

cover the cost of organic certification, along with other related expenses. Applications for OTECP and OCCSP are both due October 31, 2022.

OTECP covers:

- Certification costs for organic producers and handlers (25% up to \$250 per category).
- Eligible expenses for transitional producers, including fees for pre-certification inspections and development of an organic system plan (75% up to \$750).
- Registration fees for educational events (75% up to \$200).
- Soil testing (75% up to \$100).

Meanwhile, OCCSP covers 50% or up to \$500 per category of certification costs in 2022.

This cost share for certification is available for each of these categories: crops, wild crops, livestock, processing/handling and State organic program fees.

Producers can receive cost share through both OTECP and OCCSP. Both OTECP and OCCSP cover costs incurred from October 1, 2021, to September 30, 2022. Producers have until October 31, 2022 to file applications, and FSA will make payments as applications are received.

To apply, producers and handlers should contact the Farm Service Agency (FSA) at their local USDA Service Center. As part of completing the OCCSP applications, producers and handlers will need to provide documentation of their organic certification and eligible expenses. Organic producers and handlers may also apply for OCCSP through participating State agencies.

Additional details can be found on the [OTECP](#) and [OCCSP](#) webpages.

USDA Updates Farm Loan Programs to Increase Equity

Improvements Part of USDA's Commitment to Increase Equity in All Programs

The U.S. Department of Agriculture (USDA) is updating its farm loan programs to better support current borrowers, including historically underserved producers. These improvements are part of USDA's commitment to increase equity in all programs, including farm loans that provide important access to capital for covering operating expenses and purchasing land and equipment.

The 2018 Farm Bill authorized FSA to provide equitable relief to certain direct loan borrowers, who are non-compliant with program requirements due to good faith reliance on a material action of, advice of, or non-action from an FSA official. Previously, borrowers may have been required to immediately repay the loan or convert it to a non-program loan with higher interest rates, less favorable terms, and limited loan servicing.

Now, FSA has additional flexibilities to assist borrowers in such situations. If the agency provided incorrect guidance to an existing direct loan borrower, the agency may provide equitable relief to that borrower. FSA may assist the borrower by allowing the borrower to keep their loans at current rates or other terms received in association with the loan which was determined to be noncompliant or the borrower may receive other equitable relief for the loan as the Agency determines to be appropriate.

USDA encourages producers to reach out to their local loan officials to ensure they fully understand the wide range of loan and servicing options available that can assist them in starting, expanding or maintaining their operation.

Additional Updates

Equitable relief is one of several changes authorized by the 2018 Farm Bill that USDA has made to the direct and guaranteed loan programs. Other changes that were previously implemented include:

- Modifying the existing three-year farming experience requirement for Direct Farm Ownership loans to include additional items as acceptable experience.
- Allowing socially disadvantaged and beginning farmer applicants to receive a guarantee equal to 95%, rather than the otherwise applicable 90% guarantee.
- Expanding the definition of and providing additional benefits to veteran farmers.
- Allowing borrowers who received restructuring with a write down to maintain eligibility for an Emergency loan.
- Expanding the scope of eligible issues and persons covered under the agricultural Certified Mediation Program.

Additional information on these changes is available in the March 8, 2022 [rule on the Federal Register](#).

More Background

FSA has taken other recent steps to increase equity in its programs. Last summer, USDA announced it was providing \$67 million in competitive loans through its new Heirs' Property Relending Program to help agricultural producers and landowners resolve heirs' land ownership and succession issues. FSA also invested \$4.7 million to establish partnerships with organizations to provide outreach and technical assistance to historically underserved farmers and ranchers, which contributed to a fourfold increase in participation by historically underserved producers in the Coronavirus Food Assistance Program 2 (CFAP 2), a key pandemic assistance program, since April 2021.

Additionally, in January 2021, Secretary Vilsack announced a [temporary suspension of past-due debt collection and foreclosures](#) for distressed direct loan borrowers due to the economic hardship imposed by the COVID-19 pandemic.

Producers can explore available loan options using the [Farm Loan Discover Tool on farmers.gov](#) (also available in Spanish) or by contacting their local [USDA Service Center](#). Service Center staff continue to work with agricultural producers via phone, email, and other digital tools. Due to the pandemic, some USDA Service Centers are open to limited visitors.

Producers can [contact their local Service Center](#) to set up an in-person or phone appointment to discuss loan options.

USDA touches the lives of all Americans each day in so many positive ways. In the Biden-Harris Administration, USDA is transforming America's food system with a greater focus on more resilient local and regional food production, fairer markets for all producers, ensuring access to safe, healthy and nutritious food in all communities, building new markets and streams of income for farmers and producers using climate smart food and forestry practices, making historic investments in infrastructure and clean energy capabilities in rural America, and committing to equity across the Department by removing systemic barriers and building a workforce more representative of America. To learn more, visit usda.gov.

Five Facts About the United States Drought Monitor

This is likely no surprise to you, but drought persists across the western U.S. and is intensifying in some areas. No geographic area is immune to the potential of drought at any given time. The [U.S. Drought Monitor](#) provides a weekly drought assessment, and it plays an important role in USDA programs that help farmers and ranchers recover from drought.

Fact #1 - Numerous agencies use the Drought Monitor to inform drought-related decisions.

The map identifies areas of drought and labels them by intensity on a weekly basis. It categorizes the entire country as being in one of six levels of drought. The first two, None and Abnormally Dry (D0), are not considered to be drought. The next four describe increasing levels of drought: Moderate (D1), Severe (D2), Extreme (D3) and Exceptional (D4).

While many entities consult the Drought Monitor for drought information, drought declarations are made by federal, [state](#) and local agencies that may or may not use the Drought Monitor to inform their decisions. Some of the ways USDA uses it to determine a producer's eligibility for certain [drought assistance programs](#), like the [Livestock Forage Disaster Program](#) and [Emergency Haying or Grazing on Conservation Reserve Program acres](#) and to "fast-track" [Secretarial drought disaster designations](#).

Fact #2 - U.S. Drought Monitor is made with more than precipitation data.

When you think about drought, you probably think about water, or the lack of it. Precipitation plays a major role in the creation of the Drought Monitor, but the map's author considers [numerous indicators](#), including [drought impacts](#) and local insight from over 450 expert observers around the country. Authors use several dozen indicators to assess drought, including precipitation, streamflow, reservoir levels, temperature and evaporative demand, soil moisture and vegetation health. Because the drought monitor depicts both short and long-term drought conditions, the authors must look at data for multiple timeframes. The final map produced each week represents a summary of the story being told by all the pieces of data. To help tell that story, authors don't just look at data. They converse over the course of the

map-making week with experts across the country and draw information about drought impacts from media reports and private citizens..

Fact #3 - A real person, using real data, updates the map.

Each week's map author, not a computer, processes and analyzes data to update the drought monitor. The [map authors](#) are trained climatologists or meteorologists from the National Drought Mitigation Center at the University of Nebraska-Lincoln (the academic partner and website host of the Drought Monitor), the National Oceanic and Atmospheric Administration and USDA. The author's job is to do what a computer can't – use their expertise to reconcile the sometimes-conflicting stories told by each stream of data into a single assessment.

Fact #4 - The Drought Monitor provides a current snapshot, not a forecast.

The Drought Monitor is a “snapshot” of conditions observed during the most recent week and builds off the previous week's map. The map is released on Thursdays and depicts conditions based on data for the week that ended the preceding Tuesday. Rain that falls on the Wednesday just before the USDM's release won't be reflected until the next map is published. This provides a consistent, week-to-week product and gives the author a window to assess the data and come up with a final map.

Fact #5 – Your input can be part of the drought-monitoring process.

State climatologists and other trained observers in the drought monitoring network relay on-the-ground information from numerous sources to the US Drought monitor author each week. That can include information that you contribute.

The Drought Monitor serves as a trigger for multiple forms of federal disaster relief for agricultural producers, and sometimes producers contact the author to suggest that drought conditions in their area are worse than what the latest drought monitor shows. When the author gets a call like that, it prompts them to look closely at all available data for that area, to see whether measurements of precipitation, temperature, soil moisture and other indicators corroborate producer-submitted reports. This is the process that authors follow whether they receive one report or one hundred reports, although reports from more points may help state officials and others know where to look for impacts.

There are multiple ways to contribute your observations:

1. **Talk to your state climatologist** - Find the current list at the [American Association of State Climatologists](#) website.
2. **Email** - Emails sent to droughtmonitor@unl.edu inform the USDM authors.
3. **Become a CoCoRaHS observer** - Submit drought reports along with daily precipitation observations to the [Community Collaborative Rain, Hail & Snow Network](#).
4. **Submit Condition Monitoring Observer Reports (CMOR)** - go.unl.edu/CMOR.

For more information, read our [Ask the Expert blog with a NDMC climatologist](#) or visit farmers.gov/protection-recovery.

USDA Expands Local, Electronic Communication Options for Producers

USDA is expanding our online communications platform that the Farm Service Agency (FSA) has used for years to now include local information from the Natural Resources Conservation Service (NRCS), Risk Management Agency (RMA), and other USDA agencies.

Subscribers will now receive important information on FSA, NRCS and RMA programs, eligibility requirements, deadlines, and more.

You're currently subscribed to the Northern and Southern County USDA Service Center newsletter and updates. News will continue to be sent via e-mail right to your home or farm office, or to your smartphone – allowing you to receive immediate notification of USDA news that applies to your agricultural operation.

You can also subscribe to text alerts from the Northern County USDA Service Center by texting AKDeltaJunction to 372-669 or Southern County USDA Service Center by texting AKPalmer to 372-669. Standard text messaging rates apply. Contact your wireless carrier for details associated with your particular data plan. Participants may unsubscribe at any time.

For more information visit farmers.gov/working-with-us/stay-connected or for subscription assistance contact the Northern County USDA Service Center at 907-895-4242 or the Southern County USDA Service Center at 907-761-7773.

Persons with disabilities who require accommodations to attend or participate in these meetings and/or events should contact the Northern County FSA Service Center, at (907) 895-4242, ext. 150, Southern County FSA Service Center, at (907) 761-7773, or dial 7-1-1 to access telecommunication relay services.
