James Mago

Actively Engaged Provisions for Non-Family Joint Operations or Entities

Many Farm Service Agency programs require all program participants, either individuals or legal entities, to be “actively engaged in farming.” This means participants provide a significant contribution to the farming operation, whether it is capital, land, equipment, active personal labor and/or management. For entities, each partner, stockholder or member with an ownership interest, must contribute active personal labor and/or management to the operation on a regular basis.

Joint operations comprised of non-family members or partners, stockholders or persons with an ownership in the farming operation must meet additional payment eligibility provisions. Joint operations comprised of family members are exempt from these additional requirements. For 2016 and subsequent crop years, non-family joint operations can have one member that may use a significant contribution of active personal management exclusively to meet the requirements to be determined “actively engaged in farming.” The

person or member will be defined as the farm manager for the purposes of administering these management provisions.

Non-family joint operations may request to add up to two additional managers for their farming operation based on the size and/or complexity of the operation. If additional farm managers are requested and approved, all members who contribute management are required to complete form CCC-902MR, Management Activity Record. The farm manager should use the form to record management activities including capital, labor and agronomics, which includes crop selection, planting decisions, acquisition of inputs, crop management and marketing decisions. One form should be used for each month and the farm manager should enter the number of hours of time spent for each activity under the date of the month the actions were completed. The farm manager must also document if each management activity was completed on the farm or remotely.

The records and supporting business documentation must be maintained and timely made available for review by the appropriate FSA reviewing authority, if requested.

If the farm manager fails to meet these requirements, their contribution of active personal management to the farming operation for payment eligibility purposes will be disregarded and their payment eligibility status will be re-determined for the applicable program year.

In some instances, additional persons or members of a non-family member joint operation who meet the definition of farm manager may also be allowed to use such a contribution of active personal management to meet the eligibility requirements. However, under no circumstances may the number of farm managers in a non-family joint operation exceed a total of three in any given crop and program year.

USDA Announces March Income over Feed Cost Margin Triggers Third 2019 Dairy Safety Net Payment

USDA's Farm Service Agency (FSA) announced this week that the March 2019 income over feed cost margin was \$8.85 per hundredweight (cwt.), triggering the third payment for dairy producers who purchase the appropriate level of coverage under the new [Dairy Margin Coverage](#) (DMC) program.

DMC, which replaces the Margin Protection Program for Dairy (MPP-Dairy), offers protection to dairy producers when the difference between the all milk price and the average feed cost (the

margin) falls below a certain dollar amount selected by the producer.

The signup period for DMC opens June 17, 2019. Dairy producers who elect a DMC coverage level between \$9 and \$9.50 would be eligible for a payment for January, February and March 2019.

For example, a dairy operation that chooses to enroll an established production history of 3 million pounds (30,000 cwt.) and elects the \$9.50 coverage level on 95 percent of production would receive \$1,543.75 for March.

Sample calculation:

$\$9.50 - \$8.85 \text{ margin} = \$0.65 \text{ difference}$

$\$0.65 \times 95 \text{ percent of production} \times 2,500 \text{ cwt. (30,000 cwt./12)} = \$1,543.75$

DMC premiums are paid annually. The calculated annual premium for coverage at \$9.50 on 95 percent of a 3-million-pound production history for this example would be \$4,275.

Sample calculation:

$3,000,000 \times 95 \text{ percent} = 2,850,000/100 = 28,500 \text{ cwt.} \times 0.150 \text{ premium fee} = \$4,275$

The dairy operation in the example calculation will pay \$4,275 in total premium payments for all of 2019 and receive \$8,170 in DMC payments for January, February and March combined. Additional payments will be made if calculated margins remain below the \$9.50/cwt level.

All participants are also required to pay an annual \$100 administrative fee in addition to any premium, and payments will be subject to a 6.2 percent reduction to account for federal sequestration.

Operations making a one-time election to participate in DMC through 2023 are eligible to receive a 25 percent discount on their premium for the existing margin coverage rates. For the example above, this would reduce the annual premium by \$1,068.75.

About DMC

On December 20, 2018, President Trump signed into law the 2018 Farm Bill, which provides support, certainty and stability to our nation's farmers, ranchers and land stewards by enhancing farm support programs, improving crop insurance, maintaining disaster programs and promoting and supporting voluntary conservation. FSA is committed to implementing these changes as quickly and

effectively as possible, and today's updates are part of meeting that goal.

Recently, FSA announced the availability of the [DMC decision support tool](#) as well as [repayment options](#) for producers who were enrolled in MPP-Dairy.

For DMC signup, eligibility and related dairy program information, visit the [DMC webpage](#) or contact your local USDA service center. To locate your local FSA office, visit farmers.gov/service-locator.

USDA Encourages Producers to Consider NAP Risk Protection Coverage before Crop Sales Deadlines

The Farm Service Agency encourages producers to examine available USDA crop risk protection options, including federal crop insurance and Noninsured Crop Disaster Assistance Program (NAP) coverage, before the applicable crop sales deadline.

Producers are reminded that crops not covered by insurance may be eligible for NAP. Beginning, underserved and limited resource farmers are now eligible for free catastrophic level coverage.

Federal crop insurance covers crop losses from natural adversities such as drought, hail and excessive moisture. NAP covers losses from natural disasters on crops for which no permanent federal crop insurance program is available, including perennial grass forage and grazing crops, fruits, vegetables, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, bioenergy, and industrial crops.

Producers can determine if crops are eligible for federal crop insurance or NAP by visiting <https://webapp.rma.usda.gov/apps/ActuarialInformationBrowser2018/CropCriteria.aspx>.

The 2018 Farm Bill reinstates higher levels of coverage, from 50 to 65 percent of expected production in 5 percent increments, at 100 percent of the average market price. Producers of organics and crops marketed directly to consumers also may exercise the "buy-up" option to obtain NAP coverage of 100 percent of the average market price at the coverage levels of between 50 and 65 percent of expected production. NAP basic coverage is available at 55 percent of the average market price for crop losses that exceed 50 percent of expected production.

Deadlines for coverage vary by state and crop. To learn more about NAP visit www.fsa.usda.gov/nap or contact your local USDA Service Center. To find your local USDA Service Centers go to <http://offices.usda.gov>.

Federal crop insurance coverage is sold and delivered solely through private insurance agents. Agent lists are available at all USDA Service Centers or at USDA's online Agent Locator: <http://prodwebnlb.rma.usda.gov/apps/AgentLocator/#>. Producers can use the USDA Cost Estimator, <https://ewebapp.rma.usda.gov/apps/costestimator/Default.aspx>, to predict insurance premium costs.

USDA Acreage Reporting Deadline for Perennial Forage Changes to July 15

USDA Farm Service Agency (FSA) has established a new acreage reporting deadline for perennial forage for 2019 and subsequent years. Previously set in the fall, the new deadline is July 15 for all states, except for Hawaii and Puerto Rico.

Timely and accurate acreage reports for all crops and land uses, including prevented planting or failed acreage, are the foundation for many FSA program benefits, including disaster programs for livestock owners. Producers must report their acreage to maintain program eligibility.

Producers who have coverage for perennial forage under the Noninsured Crop Disaster Assistance Program (NAP) must report their crop acreage by the earlier of any of the following:

- the established acreage reporting date (July 15)
- 15 calendar days before the onset of harvest or grazing of the specific crop acreage being reported
- the established normal harvest date for the end of the coverage period.

USDA Expands Farm Loans for Native Americans Farming and Ranching on Tribal Land

USDA has approved and obligated the first loan under the Highly Fractionated Indian Land Loan program (HFIL). The program provides revolving loan funds to qualified intermediary lenders, allowing qualified tribes and individuals the ability to purchase tribal farmland that has multiple owners.

The first recipient, the Native American Community Development Corporation Financial Services, Inc. (NACDCFS) of Browning, Mont., will lend funds directly to tribal members through a \$10 million intermediary HFIL loan from USDA's Farm Service Agency (FSA). NACDCFS addresses critical needs in Native American communities related to the growth of family assets, supports economic development, and enhances the quality of life for communities and residents located on or near Montana's seven Indian reservations. NACDCFS provides one-on-one technical assistance to Native American entrepreneurs and agricultural producers. NACDCFS is a 501(c) (3), certified Native Community Development Financial Institution (CDFI), through the U.S. Department of Treasury.

Under the [1887 Dawes Act](#), Indian reservation land was divided and allotted to individual tribal members such that with the passing of each generation, title ownership was divided and parceled among heirs, while the land was not. As a result, land once owned by a single person could today be owned by hundreds or thousands of individuals, resulting in what is known as "highly fractionated Indian land." In many instances, landowners are unknown or cannot be located, which complicates the coordination of ownership or prevents the use of the property altogether. There are more than 245,000 owners of three million fractionated land interests, spanning approximately 150 Indian reservations.

Under HFIL, tribes and tribal members can submit an application directly to an intermediary lender. To participate, intermediary lenders first must be approved by USDA. The lenders may be private and tribal nonprofit corporations, public agencies, Indian tribes or lenders subject to federal or state regulation (such as a credit union or other financial institution). FSA will lend to the intermediary,

which will relend to the applicant. The intermediary lender also will administer the loan for the applicant.

For more information on the program, visit www.fsa.usda.gov/farmloans or contact the local FSA county office. To find the local FSA office, visit <http://offices.usda.gov>.

USDA Microloans Help Farmers Purchase Farmland and Improve Property

The U.S. Department of Agriculture (USDA) is offering farm ownership microloans, creating a new financing avenue for farmers to buy and improve property. These microloans are especially helpful to beginning or underserved farmers, U.S. veterans looking for a career in farming, and those who have small and mid-sized farming operations.

The microloan program has been hugely successful, providing more than 16,800 low-interest loans, totaling over \$373 million to producers across the country. Microloans have helped farmers and ranchers with operating costs, such as feed, fertilizer, tools, fencing, equipment, and living expenses since 2013. Seventy percent of loans have gone to new farmers.

Now, microloans will be available to also help with farm land and building purchases, and soil and water conservation improvements. FSA designed the expanded program to simplify the application process, expand eligibility requirements and expedite smaller real estate loans to help farmers strengthen their operations. Microloans provide up to \$50,000 to qualified producers and can be issued to the applicant directly from the USDA Farm Service Agency (FSA).

To learn more about the FSA microloan program visit www.fsa.usda.gov/microloans, or contact your local FSA office.
