### USDA Announces CRP General Signup Ends February 12

Agricultural producers and private landowners interested in the [Conservation Reserve Program](#) (CRP) can sign up for the popular program beginning Jan. 4, 2021, until Feb. 12, 2021. The competitive program, administered by USDA's Farm Service Agency (FSA), provides annual rental payments for land devoted to conservation purposes.

Through CRP, farmers and ranchers establish long-term, resource-conserving plant species, such as approved grasses or trees, to control soil erosion, improve water quality and enhance wildlife habitat on cropland. Farmers and ranchers who participate in CRP help provide numerous benefits to their local region and the nation's environment and economy. CRP general signup is held annually and is competitive; general signup includes increased opportunities for wildlife habitat enrollment through the [State Acres For Wildlife Enhancement](#) (SAFE) initiative.

Diane Karabin  
Paul Miller

---

New cropland offered in the program must have been planted for four out of six crop years from 2012 to 2017. Additionally, producers with land already enrolled but expiring on Sept. 30, 2021, can re-enroll this year. The acreage offered by producers and landowners is evaluated competitively; accepted offers will begin Oct. 1, 2021.

Signed into law in 1985, CRP is one of the largest private-lands conservation programs in the United States. The program marked its [35-year anniversary](#) in December 2020. Program successes include:

- Preventing more than 9 billion tons of soil from eroding, which is enough soil to fill 600 million dump trucks.
- Reducing nitrogen and phosphorous runoff relative to annually tilled cropland by 95% and 85%, respectively.
- Sequestering an annual average of 49 million tons of greenhouse gases, equal to taking 9 million cars off the road.
- Creating more than 3 million acres of restored wetlands while protecting more than 175,000 stream miles with riparian forest and grass buffers, which is enough to go around the world seven times.
- Benefiting bees and other pollinators and increasing populations of ducks, pheasants, turkey, bobwhite quail, prairie chickens, grasshopper sparrows, and many other birds.

To find county office locations, program information, and more visit the new [Farmers.gov](#) portal

## Applying for Beginning Farmer Loans

The Farm Service Agency (FSA) assists beginning farmers to finance agricultural enterprises. Under these designated farm loan programs, FSA can provide financing to eligible applicants through either direct or guaranteed loans. FSA defines a beginning farmer as a person who:

- Has operated a farm for not more than 10 years
- Will materially and substantially participate in the operation of the farm
- Agrees to participate in a loan assessment, borrower training and financial management program sponsored by FSA
- Does not own a farm in excess of 30 percent of the county's average size farm.

For more information, contact your your local [USDA Service Center](#) or visit [fsa.usda.gov](#).

## Quality Loss Assistance Now Available for Eligible Producers Affected by 2018, 2019 Natural Disasters

The U.S. Department of Agriculture's (USDA) Farm Service Agency (FSA) today announced that signup for the Quality Loss Adjustment (QLA) Program will begin Wednesday, Jan. 6, 2021. Funded by the Further Consolidated Appropriations Act of 2020, this new program provides assistance to

producers who suffered eligible crop quality losses due to natural disasters occurring in 2018 and 2019. The deadline to apply for QLA is Friday, March 5, 2021.

### **Eligible Crops**

Eligible crops include those for which [federal crop insurance](#) or [Noninsured Crop Disaster Assistance Program](#) (NAP) coverage is available, except for grazed crops and value loss crops, such as honey, maple sap, aquaculture, floriculture, mushrooms, ginseng root, ornamental nursery, Christmas trees, and turfgrass sod.

Additionally, crops that were sold or fed to livestock or that are in storage may be eligible; however, crops that were destroyed before harvest are not eligible. Crop quality losses occurring after harvest, due to deterioration in storage, or that could have been mitigated, are also not eligible.

Assistance is based on a producer's harvested affected production of an eligible crop, which must have had at least a 5% quality loss reflected through a quality discount; or for forage crops, a nutrient loss, such as total digestible nutrients.

### **Qualifying Disaster Events**

Losses must have been a result of a qualifying disaster event (hurricane, excessive moisture, flood, qualifying drought, tornado, typhoon, volcanic activity, snowstorm, or wildfire) or related condition that occurred in calendar years 2018 and/or 2019.

Assistance is available for eligible producers in counties that received a qualifying Presidential Emergency Disaster Declaration or Secretarial Disaster Designation because of one or more of the qualifying disaster events or related conditions.

Lists of counties with Presidential Emergency Disaster Declarations and Secretarial Disaster Designations for all qualifying disaster events for 2018 and 2019 are available [here](#). For drought, producers are eligible for QLA if the loss occurred in an area within a county rated by the [U.S. Drought Monitor](#) as having a D3 (extreme drought) or higher intensity level during 2018 or 2019.

Producers in counties that did not receive a qualifying declaration or designation may still apply but must also provide supporting documentation to establish that the crop was directly affected by a qualifying disaster event.

To determine QLA eligibility and payments, FSA considers the total quality loss caused by all qualifying natural disasters in cases where a crop was impacted by multiple events.

### **Applying for QLA**

When applying, producers are asked to provide verifiable documentation to support claims of quality loss or nutrient loss in the case of forage crops. For crops that have been sold, grading must have been completed within 30 days of harvest, and for forage crops, a laboratory analysis must have been completed within 30 days of harvest.

Some acceptable forms of documentation include sales receipts from buyers, settlement sheets, truck or warehouse scale tickets, written sales contracts, similar records that represent actual and specific quality loss information, and forage tests for nutritional values.

## Payments Calculations and Limitations

QLA payments are based on formulas for the type of crop (forage or non-forage) and loss documentation submitted. Based on this documentation FSA is calculating payments based on the producer's own individual loss or based on the county average loss. More information on payments can be found on [farmers.gov/quality-loss](https://farmers.gov/quality-loss).

FSA will issue payments once the application period ends. If the total amount of calculated QLA payments exceeds available program funding, payments will be prorated.

For each crop year, 2018, 2019 and 2020, the maximum amount that a person or legal entity may receive, directly or indirectly, is \$125,000. Payments made to a joint operation (including a general partnership or joint venture) will not exceed \$125,000, multiplied by the number of persons and legal entities that comprise the ownership of the joint operation. A person or legal entity is ineligible for QLA payment if the person's or legal entity's average Adjusted Gross Income exceeds \$900,000, unless at least 75% is derived from farming, ranching or forestry-related activities.

## Future Insurance Coverage Requirements

All producers receiving QLA Program payments are required to purchase crop insurance or NAP coverage for the next two available crop years at the 60% coverage level or higher. Wildlife and Hurricane Indemnity Program Plus (WHIP+) participants who already met the WHIP+ requirement to purchase crop insurance or NAP coverage are considered to have thereby met the requirement to purchase crop insurance or NAP coverage for QLA. If eligible, QLA participants may meet the insurance purchase requirement by purchasing [Whole-Farm Revenue Protection](#) coverage offered through USDA's Risk Management Agency.

## More Information

For more information, visit [farmers.gov/quality-loss](https://farmers.gov/quality-loss), or contact your local [USDA Service Center](#). Producers can also obtain one-on-one support with applications by calling 877-508-8364.

---

## Noninsured Crop Coverage Helps Producers Manage Risks

The Farm Service Agency's (FSA) Noninsured Crop Disaster Assistance Program (NAP) helps you manage risk through coverage for both crop losses and crop planting that was prevented due to natural disasters. The eligible or "noninsured" crops include agricultural commodities not covered by federal crop insurance.

*You must be enrolled in the program and have purchased coverage for the eligible crop in the crop year in which the loss incurred to receive program benefits following a qualifying natural disaster.*

### NAP Buy-Up Coverage Option

NAP offers higher levels of coverage, from 50 to 65 percent of expected production in 5 percent increments, at 100 percent of the average market price. Buy-up levels of NAP coverage are available if the producer can show at least one year of previously successfully growing the crop for which coverage is being requested.

Producers of organics and crops marketed directly to consumers also may exercise the “buy-up” option to obtain NAP coverage of 100 percent of the average market price at the coverage levels of between 50 and 65 percent of expected production.

NAP basic coverage is available at 55 percent of the average market price for crop losses that exceed 50 percent of expected production.

Buy-up coverage is not available for crops intended for grazing.

### **NAP Service Fees**

For all coverage levels, the NAP service fee is the lesser of \$325 per crop or \$825 per producer per county, not to exceed a total of \$1,950 for a producer with farming interests in multiple counties.

### **NAP Enhancements for Qualified Military Veterans**

Qualified veteran farmers or ranchers are eligible for a service fee waiver and premium reduction, if the NAP applicant meets certain eligibility criteria.

Beginning, limited resource and targeted underserved farmers or ranchers remain eligible for a waiver of NAP service fees and premium reduction when they file form CCC-860, “*Socially Disadvantaged, Limited Resource and Beginning Farmer or Rancher Certification.*”

For NAP application, eligibility and related program information, contact your your local [USDA Service Center](#) or visit [fsa.usda.gov/nap](https://fsa.usda.gov/nap).

---

## **Applying for Farm Storage Facility Loans**

The Farm Service Agency’s (FSA) Farm Storage Facility Loan (FSFL) program provides low-interest financing to help you build or upgrade storage facilities and to purchase portable (new or used) structures, equipment and storage and handling trucks.

Eligible commodities include corn, grain sorghum, rice, soybeans, oats, peanuts, wheat, barley, minor oilseeds harvested as whole grain, pulse crops (lentils, chickpeas and dry peas), hay, honey, renewable biomass, fruits, nuts and vegetables for cold storage facilities, floriculture, hops, maple sap, rye, milk, cheese, butter, yogurt, meat and poultry (unprocessed), eggs, and aquaculture (excluding systems that maintain live animals through uptake and discharge of water). Qualified facilities include grain bins, hay barns and cold storage facilities for eligible commodities.

Loans up to \$50,000 can be secured by a promissory note/security agreement, loans between \$50,000 and \$100,000 may require additional security, and loans exceeding \$100,000 require additional security.

You do not need to demonstrate the lack of commercial credit availability to apply. The loans are designed to assist a diverse range of farming operations, including small and mid-sized businesses, new farmers, operations supplying local food and farmers markets, non-traditional farm products, and underserved producers.

For more information, contact your local [USDA Service Center](#) or visit [fsa.usda.gov/pricesupport](https://fsa.usda.gov/pricesupport).

## **USDA Fruit, Vegetable and Wild Rice Planting Rules Unchanged in 2018 Farm Bill**

Fruit, vegetable and wild rice producers will continue to follow the same rules for certain Farm Service Agency (FSA) programs.

If you intend to participate in the Agriculture Risk Coverage (ARC) or Price Loss Coverage (PLC) programs, you are subject to an acre-for-acre payment reduction when fruits and nuts, vegetables or wild rice are planted on payment acres of a farm. Payment reductions do not apply to mung beans, dry peas, lentils or chickpeas. Planting fruits, vegetables or wild rice on acres not considered payment acres will not result in a payment reduction. Farms that are eligible to participate in ARC/PLC but are not enrolled for a particular year may plant unlimited fruits, vegetables and wild rice for that year but will not receive ARC/PLC payments. Eligibility for succeeding years is not affected.

Planting and harvesting fruits, vegetables and wild rice on ARC/PLC acreage is subject to the acre-for-acre payment reduction when those crops are planted on more than 15 percent of the base acres of an ARC enrolled farm using the county coverage or PLC, or more than 35 percent of the base acres of an ARC enrolled farm using the individual coverage.

Fruits, vegetables and wild rice that are planted in a double-cropping practice will not cause a payment reduction if the farm is in a double-cropping region as designated by the USDA's Commodity Credit Corporation.
