Important Dates

- **October 10, 2022:** Office Closed in Observance of Columbus Day
- **October (Date TBD):** 2023 ARC/PLC Enrollment & Elections begin
- **November 1:** Deadline to submit OCCSP Eligible Certification Expenses
- **November 3:** COC Election Ballots mailed to eligible voters
- **November 11:** Office Closed in Observance of Veterans Day
- **November 24:** Office Closed in Observance of Thanksgiving

[Click here to learn more about local deadlines and ongoing programs.](#)

Before You Break Out New Ground, Ensure Your Farm Meets Conservation Compliance

The term “sodbusting” is used to identify the conversion of land from native vegetation to commodity crop production after December 23, 1985. As part of the conservation provisions

of the Food Security Act of 1985, if you're proposing to produce agricultural commodities (crops that require annual tillage including one pass planting operations and sugar cane) on land that has been determined highly erodible and that has no crop history prior to December 23, 1985, that land must be farmed in accordance with a conservation plan or system that ensures no substantial increase in soil erosion.

Eligibility for many USDA programs requires compliance with a conservation plan or system on highly erodible land (HEL) used for the production of agricultural commodities. This includes Farm Service Agency (FSA) loan, disaster assistance, safety net, price support, and conservation programs; Natural Resources Conservation Service (NRCS) conservation programs; and Risk Management Agency (RMA) Federal crop insurance.

Before you clear or prepare areas not presently under production for crops that require annual tillage, you are required to file Form AD-1026 "Highly Erodible Land Conservation and Wetland Conservation Certification," with FSA indicating the area to be brought into production. The notification will be referred to NRCS to determine if the field is considered highly erodible land. If the field is considered HEL, you are required to implement a conservation plan or system that limits the erosion to the tolerable soil loss (T) for the predominant HEL soil on those fields.

In addition, prior to removing trees or conducting any other land manipulations that may affect wetlands, remember to update form AD-1026, to ensure you remain in compliance with the wetland conservation provisions.

Prior to purchasing or renting new cropland acres, it is recommended that you check with your local USDA Service Center to ensure your activities will be in compliance with the highly erodible land and wetland conservation provisions.

For additional information on highly erodible land conservation and wetland conservation compliance, contact [your local USDA Service Center](#).

Keeping Livestock Inventory Records

Livestock inventory records are necessary in the event of a natural disaster, so remember to keep them updated.

When disasters strike, the USDA Farm Service Agency (FSA) can help you if you've suffered excessive livestock death losses and grazing or feed losses due to eligible natural disasters.

To participate in livestock disaster assistance programs, you'll be required to provide verifiable documentation of death losses resulting from an eligible adverse weather event and must submit a notice of loss to your local FSA office within 30 calendar days of when the loss of livestock is apparent. For grazing or feed losses, you must submit a notice of loss to your local FSA office within 30 calendar days of when the loss is apparent and should maintain documentation and receipts.

You should record all pertinent information regarding livestock inventory records including:

- Documentation of the number, kind, type, and weight range of livestock
- Beginning inventory supported by birth recordings or purchase receipts.

For more information on documentation requirements, contact your local County USDA Service Center or visit fsa.usda.gov.

Applying for NAP Payments

The Noninsured Crop Disaster Assistance Program (NAP) provides financial assistance to you for crops that aren't eligible for crop insurance to protect against lower yields or crops unable to be planted due to natural disasters including freeze, hail, excessive moisture, excessive wind or hurricanes, flood, excessive heat and qualifying drought (includes native grass for grazing), among others.

In order to participate, you must obtain NAP coverage for the crop year by the applicable deadline using form CCC-471 "Application for Coverage" and pay the service fee. Application closing dates vary by crop. Producers are also required to submit an acceptable crop acreage report. Additionally, NAP participants must provide:

- The quantity of all harvested production of the crop in which the producer held an interest during the crop year
- The disposition of the harvested crop, such as whether it is marketable, unmarketable, salvaged or used differently than intended
- Acceptable crop production records (when requested by FSA)

Producers who fail to report acreage and production information for NAP-covered crops could see reduced or zero NAP assistance. These reports are used to calculate the approved yield.

If your NAP-covered crops are affected by a natural disaster, notify your FSA office by completing Part B of form CCC-576 "Notice of Loss and Application for Payment." This must be completed within 15 calendar days of the occurrence of the disaster or when losses become apparent or 15 days of the final harvest date. For hand-harvested crops and certain perishable crops, you must notify FSA within 72 hours of when a loss becomes apparent.

To receive benefits, you must also complete Parts D, E, F and G of the CCC-576 "Notice of Loss and Application for Payment" within 60 days of the last day of coverage for the crop year for any NAP covered crops. The CCC-576 requires acceptable appraisal information. Producers must provide evidence of production and note whether the crop was marketable, unmarketable, salvaged or used differently than intended.

Eligible crops must be commercially produced agricultural commodities for which crop insurance is not available, including perennial grass forage and grazing crops, fruits,

vegetables, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, bioenergy, and industrial crops.

For more information on NAP, contact your local County USDA Service Center or visit fsa.usda.gov/nap.

Obtaining Payments Due to Deceased Producers

In order to claim a Farm Service Agency (FSA) payment on behalf of a deceased producer, all program conditions for the payment must have been met before the applicable producer's date of death.

If a producer earned a FSA payment prior to his or her death, the following is the order of precedence for the representatives of the producer:

- administrator or executor of the estate
- the surviving spouse
- surviving sons and daughters, including adopted children
- surviving father and mother
- surviving brothers and sisters
- heirs of the deceased person who would be entitled to payment according to the State law

For FSA to release the payment, the legal representative of the deceased producer must file a form FSA-325 to claim the payment for themselves or an estate. The county office will verify that the application, contract, loan agreement, or other similar form requesting payment issuance, was signed by the applicable deadline by the deceased or a person legally authorized to act on their behalf at that time of application.

If the application, contract or loan agreement form was signed by someone other than the deceased participant, FSA will determine whether the person submitting the form has the legal authority to submit the form.

Payments will be issued to the respective representative's name using the deceased program participant's tax identification number. Payments made to representatives are subject to offset regulations for debts owed by the deceased.

FSA is not responsible for advising persons in obtaining legal advice on how to obtain program benefits that may be due to a participant who has died, disappeared or who has been declared incompetent.

USDA to Mail Additional Pre-Filled Applications to Producers Impacted by 2020, 2021 Disasters

The U.S. Department of Agriculture (USDA) today announced another installment (phase) in assistance to commodity and specialty crop producers impacted by natural disaster events in 2020 and 2021. More than 18,000 producers will soon receive new or updated pre-filled disaster applications to offset eligible crop losses. Approximately \$6.4 billion has already been distributed to 165,000 producers through USDA's Farm Service Agency's (FSA) Emergency Relief Program (ERP).

FSA will begin mailing pre-filled applications in late August to producers who have potentially eligible losses and:

- Received crop insurance indemnities for qualifying 2020 and 2021 disaster events after May 2, 2022.
- Received crop insurance indemnities associated with Nursery, Supplemental Coverage Option (SCO), Stacked Income Protection Plan (STAX), Enhanced Coverage Option (ECO) and Margin Protection (MP) policies.
- New primary policyholders not included in the initial insured producer Phase 1 mailing from May 25, 2022, because their claim records had not been filled.
- Certain 2020 prevent plant losses related to qualifying 2020 disaster events that had only been recorded in crop insurance records as related to 2019 adverse weather events and, as such, were not previously provided in applications sent earlier this year.
- New Substantial Beneficial Interest (SBI) records, including SBIs where tax identification numbers were corrected.

Producers are expected to receive assistance direct deposited into their bank account within three business days after they sign and return the pre-filled application to the FSA county office and the county office enters the application into the system.

Before applying any program payment factors or eligibility criteria, it is estimated that this next installment (phase) may generate about \$756 million in assistance.

Emergency Relief Payments to Date

This emergency relief under ERP complements ERP assistance recently provided to more than 165,000 producers who had received crop insurance indemnities and Noninsured Crop Disaster Assistance Program (NAP) payments for qualifying losses. USDA has processed more than 255,000 applications for ERP, and to date, has made approximately \$6.4 billion in payments to commodity and specialty crop producers to help offset eligible losses from qualifying 2020 and 2021 natural disasters. Also, earlier this year, staff processed more than 100,000 payments through the Emergency Livestock Relief Program (ELRP) and paid eligible producers more than \$601.3 million for 2021 grazing losses within days of the program announcement.

Phase Two

The second phase of both ERP and ELRP will be aimed at filling gaps and provide assistance to producers who did not participate in or receive payments through the existing risk management programs that are being leveraged for phase one implementation. USDA will keep producers and stakeholders informed as program details are made available.

More Information

In addition, on Aug. 18, 2022, USDA published a technical correction to the [Notice of Funds Availability](#) for ERP and ELRP to clarify how income from the sale of farm equipment and the provision of production inputs and services to farmers, ranchers, foresters, and farm operations are to be considered in the calculation of average adjusted gross farm income. Producers whose average adjusted gross farm income is at least 75% of the producer's the average Adjusted Gross Income can gain access to a higher payment limitation.

ERP and the previously announced ELRP are authorized by the *Extending Government Funding and Delivering Emergency Assistance Act*, which President Biden signed into law in 2021. The law provided \$10 billion to help agricultural producers impacted by wildfires, droughts, hurricanes, winter storms and other eligible disasters experienced during calendar years 2020 and 2021.

For more information on ERP and ELRP eligibility, program provisions for historically underserved producers as well as Frequently Asked Questions, producers can visit [FSA's Emergency Relief webpage](#). A [new public-facing dashboard](#) on the ERP webpage has information on ERP payments that can be sorted by crop type – specialty or non-specialty– specific commodities and state. FSA will update the dashboard every Monday.

Additional USDA disaster assistance information can be found on [farmers.gov](#), including the [Disaster Assistance Discovery Tool](#), [Disaster-at-a-Glance fact sheet](#) and [Farm Loan Discovery Tool](#). For FSA and Natural Resources Conservation Service programs, producers should contact their local [USDA Service Center](#). For assistance with a crop insurance claim, producers and landowners should contact their [crop insurance agent](#).

USDA Announces Updates for Honeybee Producers

The Farm Service Agency (FSA) announced updates to the Emergency Assistance for Livestock, Honeybees and Farm-Raised Fish Program (ELAP) specific to honeybee producers. For honeybees, ELAP covers colony losses, honeybee hive losses (the physical structure) and honeybee feed losses in instances where the colony, hive or feed has been destroyed by a natural disaster or, in the case of colony losses, because of Colony Collapse Disorder. Colony losses must be in excess of normal mortality.

Updates include:

- Starting in 2020, you have 15 days from when the loss is first apparent, instead of 30 days, to file a honeybee notice of loss, which provides consistency between ELAP and the Noninsured Crop Disaster Assistance Program, which also has a 15-day notice of loss period for honey.
- ELAP will now run according to the calendar year. Since you are still required to apply for payment within 30 calendar days of the end of the program year, the new signup deadline for calendar year 2021 losses is January 30, 2022.
- If you were paid for the loss of a honeybee colony or hive in either or both of the previous two years, you will be required to provide additional documentation to substantiate how your current year inventory was acquired.
- If the honeybee colony loss was caused by Colony Collapse Disorder, you must provide a producer certification that the loss was a direct result of at least three of the five symptoms of Colony Collapse Disorder, which include:
 - the loss of live queen and/or drone bee populations inside the hives;
 - rapid decline of adult worker bee population outside the hives, leaving brood poorly or completely unattended;
 - absence of dead adult bees inside the hive and outside the entrance of the hive;
 - absence of robbing collapsed colonies; and
 - at the time of collapse, varroa mite and Nosema populations are not at levels known to cause economic injury or population decline.

For more information contact your local County USDA Service Center at or visit farmers.gov/recover.

Applying for FSA Direct Loans

FSA offers direct farm ownership and direct farm operating loans to producers who want to establish, maintain, or strengthen their farm or ranch. Direct loans are processed, approved and serviced by FSA loan officers.

Direct farm operating loans can be used to purchase livestock and feed, farm equipment, fuel, farm chemicals, insurance, and other costs including family living expenses. Operating loans can also be used to finance minor improvements or repairs to buildings and to refinance some farm-related debts, excluding real estate.

Direct farm ownership loans can be used to purchase farmland, enlarge an existing farm, construct and repair buildings, and to make farm improvements.

The maximum loan amount for direct farm ownership loans is \$600,000 and the maximum loan amount for direct operating loans is \$400,000 and a down payment is not required. Repayment terms vary depending on the type of loan, collateral and the producer's ability to

repay the loan. Operating loans are normally repaid within seven years and farm ownership loans are not to exceed 40 years.

Please contact your local FSA office for more information or to apply for a direct farm ownership or operating loan.
