Agricultural Producers Have Until March 15 to Enroll in USDA's Key Commodity Safety Net Programs for the 2024 Crop Year

Agricultural producers who have not yet enrolled in the Agriculture Risk Coverage (ARC) or Price Loss Coverage (PLC) programs for the 2024 crop year have until March 15, 2024, to revise elections and sign contracts. Both safety net programs, delivered by USDA's Farm Service Agency (FSA), provide vital income support to farmers who experience substantial declines in crop prices or revenues for the 2024 crop year. In Idaho, producers have completed 13,627 contracts to date, representing 93.0% of the more than 14 thousand expected contracts.

Producers can elect coverage and enroll in ARC-County or PLC, which provide crop-by-crop protection, or ARC-Individual, which protects the entire farm. Although election changes for 2024 are optional, producers must enroll, with a

signed contract, each year. If a producer has a multi-year contract on the farm, the contract will continue for 2024 unless an election change is made.

If producers do not submit their election revision by the March 15, 2024, deadline, the election remains the same as their 2023 election for eligible commodities on the farm. Also, producers who do not complete enrollment and sign their contract by the deadline will not be enrolled in ARC or PLC for the 2024 year and will not receive a payment if one is triggered. Farm owners can only enroll in these programs if they have a share interest in the commodity.

Producers are eligible to enroll farms with base acres for the following commodities: barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium and short grain rice, safflower seed, seed cotton, sesame, soybeans, sunflower seed and wheat.

Crop Insurance Considerations

Producers are reminded that enrolling in ARC or PLC programs can impact eligibility for some crop insurance products offered by USDA's Risk Management Agency (RMA). Producers who elect and enroll in PLC also have the option of purchasing Supplemental Coverage Option (SCO) through their Approved Insurance Provider, but producers of covered commodities who elect ARC are ineligible for SCO on their planted acres.

Unlike SCO, RMA's Enhanced Coverage Option (ECO) is unaffected by participating in ARC for the same crop, on the same acres. You may elect ECO regardless of your farm program election.

More Information

For more information on ARC and PLC, producers can visit the [ARC and PLC webpage](#) or contact their [local USDA Service Center](#). Producers can also prepare maps for acreage reporting as well as manage farm loans and view other farm records data and customer information by logging into their farmers.gov account. If you don't have an account, sign up today.

USDA Announces Conservation Reserve Program General Signup for 2024

The U.S. Department of Agriculture (USDA) announced that agricultural producers and private landowners can begin signing up for the general Conservation Reserve Program (CRP) **starting March 4 and running through March 29, 2024**. The announcement was made earlier today by Zach Ducheneaux, Administrator of the USDA's Farm Service Agency (FSA) at this year's National Pheasant Fest, in Sioux Falls, SD.

On Nov. 16, 2023, President Biden signed into law H.R. 6363, the Further Continuing Appropriations and Other Extensions Act, 2024 (Pub. L. 118-22), which extended the Agriculture Improvement Act of 2018 (Pub. L. 115-334), more commonly known as the 2018 Farm Bill, through Sept. 30, 2024. This extension allows authorized programs, including CRP, to continue operating.

As one of the largest private lands conservation programs in the United States, CRP offers a range of conservation options to farmers, ranchers, and landowners. It has been an especially strong opportunity for farmers with less productive or marginal cropland, helping them re-establish valuable land cover to help improve water quality, prevent soil erosion, and support wildlife habitat.

Producers and landowners enrolled about 926,000 acres in General CRP in 2023, bringing the total of enrolled acres in General CRP to 7.78 million. This, combined with all other acres in CRP through other enrollment opportunities, such as Grassland and Continuous CRP, bring the current total of enrolled acres to 24.8 million.

General CRP

General CRP helps producers and landowners establish long-term, resource-conserving plant species, such as approved grasses or trees, to control soil erosion, improve water quality and enhance wildlife habitat on cropland. Additionally, General CRP includes a Climate-Smart Practice Incentive to help increase carbon sequestration and reduce greenhouse gas emissions by helping producers and landowners establish trees and permanent grasses, enhance wildlife habitat, and restore wetlands.

General CRP is one of several ways agricultural producers and private landowners can participate in the program.

Other CRP Options

This past January FSA began accepting applications for the [Continuous CRP](#) signup. Under this enrollment, producers and landowners can enroll in CRP throughout the year. Offers are automatically accepted provided the producer and land meet the eligibility requirements and the enrollment levels do not exceed the statutory cap.

The USDA also offers financial assistance to producers and landowners enrolled in CRP to improve the health of their forests through the [Forest Management Incentive](#) (FMI), which can help participants with forest management practices, such as brush management and prescribed burning.

FSA will announce the dates for [Grassland CRP](#) signup in the near future.

Producers with expiring CRP acres can use the [Transition Incentives Program](#) (TIP), which incentivizes producers who sell or enter a long-term lease with a beginning, veteran, or socially disadvantaged farmer or rancher who plans to sustainably farm or ranch the land.

How to Sign Up

Landowners and producers interested in CRP should contact their local [USDA Service Center](#) to learn more or to apply for the program before their deadlines.

Dairy Producers Can Enroll for 2024 Dairy Margin Coverage Beginning Feb. 28

Starting Feb. 28, dairy producers will be able to enroll for 2024 Dairy Margin Coverage (DMC), an important safety net program offered through the U.S. Department of Agriculture (USDA) that provides producers with price support to help offset milk and feed price differences. This year's DMC **signup begins Feb. 28, 2024, and ends April 29, 2024**. For those who sign up for 2024 DMC coverage, payments may begin as soon as March 4, 2024, for any payments that triggered in January 2024.

USDA's Farm Service Agency (FSA) has revised the regulations for DMC to allow eligible dairy operations to make a one-time adjustment to established production history. This adjustment will be accomplished by combining previously established supplemental production history with DMC production history for those dairy operations that participated in Supplemental Dairy Margin Coverage during a prior coverage year. DMC has also been authorized through calendar year 2024. Congress passed a 2018 Farm Bill extension requiring these regulatory changes to the program.

DMC is a voluntary risk management program that offers protection to dairy producers when the difference between the all-milk price and the average feed price (the margin) falls below a certain dollar amount selected by the producer. In 2023, Dairy Margin Coverage payments triggered in 11 months including two months,

June and July, where the margin fell below the catastrophic level of \$4.00 per hundredweight, a first for Dairy Margin Coverage or its predecessor Margin Protection Program.

2024 DMC Coverage and Premium Fees

FSA has revised DMC regulations to extend coverage for calendar year 2024, which is retroactive to Jan. 1, 2024, and to provide an adjustment to the production history for dairy operations with less than 5 million pounds of production. In previous years, smaller dairy operations could establish a supplemental production history and receive Supplemental Dairy Margin Coverage. For 2024, dairy producers can establish one adjusted base production history through DMC for each participating dairy operation to better reflect the operation's current production.

For 2024 DMC enrollment, dairy operations that established supplemental production history through Supplemental Dairy Margin Coverage for coverage years 2021 through 2023, will combine the supplemental production history with established production history for one adjusted base production history.

For dairy operations enrolled in 2023 DMC under a multi-year lock-in contract, lock-in eligibility will be extended until Dec. 31, 2024. In addition, dairy operations enrolled in multi-year lock-in contracts are eligible for the discounted DMC premium rate during the 2024 coverage year. To confirm 2024 DMC lock-in coverage or opt out in favor of an annual contract for 2024, dairy operations having lock-in contracts must enroll during the 2024 DMC enrollment period.

DMC offers different levels of coverage, even an option that is free to producers, minus a \$100 administrative fee. The administrative fee is waived for dairy producers who are considered limited resource, beginning, socially disadvantaged or a military veteran. To determine the appropriate level of DMC coverage for a specific dairy operation, producers can use the [online dairy decision tool](#).

DMC Payments

DMC payments are calculated using updated feed and premium hay costs, making the program more reflective of actual dairy producer expenses. These updated feed calculations use 100% premium alfalfa hay.

More Information

USDA also offers other risk management tools for dairy producers, including the [Dairy Revenue Protection \(DRP\)](#) plan that protects against a decline in milk revenue (yield and price) and the [Livestock Gross Margin \(LGM\)](#) plan, which provides protection against the loss of the market value of milk minus the feed costs. Both DRP and LGM livestock insurance policies are offered through the Risk Management Agency. Producers should contact their local [crop insurance agent](#) for more information.

For more information on DMC, visit the [DMC webpage](#) or contact your local [USDA Service Center](#).

USDA to Provide More Than \$3 Billion to Commodity and Specialty Crop Producers Impacted by 2022 Natural Disasters

The U. S Department of Agriculture (USDA) will provide more than \$3 billion to commodity and specialty crop producers impacted by natural disaster events in 2022. Eligible impacted producers can apply for financial assistance through the [Emergency Relief Program \(ERP\) 2022](#). The program will help offset the financial impacts of crop yield and value losses from qualifying disasters occurring in 2022.

Background

On Dec. 29, 2022, President Biden signed into law the *Disaster Relief Supplemental Appropriations Act, 2023* (P.L. 117-328) that provides about \$3.7 billion in financial assistance for agricultural producers impacted by eligible natural disasters that occurred in calendar year 2022.

ERP 2022 covers losses to crops, trees, bushes and vines due to qualifying, calendar year 2022 natural disaster events including wildfires, hurricanes, floods, derechos, excessive heat, tornadoes, winter storms, freeze (including a polar vortex), smoke exposure, excessive moisture, qualifying drought and related conditions.

ERP 2022 program benefits will be delivered to eligible producers through a two-track process. FSA intends to make both tracks available to producers at the same time. This two-track approach enables USDA to:

- Streamline the application process.
- Reduce the paperwork burden on producers.
- Proactively include provisions for underserved producers who have not been well served by past emergency relief efforts.
- Encourage producer participation in existing risk management programs to mitigate the impacts of future severe weather events.

It's important to note that disaster-impacted producers may be eligible for ERP 2022 assistance under one or both tracks. To avoid duplicative benefits, if a producer applies for both tracks, the Track 2 payment calculation will take into account any payments received through Track 1.

ERP 2022 Application Process – Track 1

ERP 2022 Track 1 leverages existing federal crop insurance or Noninsured Crop Disaster Assistance Program (NAP) data as the basis for calculating payments for eligible crop producers who received indemnities through these risk management programs.

Although FSA is sending pre-filled ERP 2022 Track 1 application forms to producers who have crop insurance and NAP data already on file with USDA, producers indemnified for losses resulting from 2022 natural disasters do not have to wait to receive the application before requesting ERP 2022 assistance. Effective Oct. 31, 2023, producers can apply for ERP 2022 benefits whether they have received the pre-filled application or not. Receipt of a pre-filled application is not confirmation that a producer is eligible to receive an ERP 2022 Track 1 payment.

USDA estimates that ERP Track 1 benefits will reach more than 206,000 producers who received indemnities for losses covered by federal crop insurance and more than 4,500 producers who obtained NAP coverage for the 2022 crop year.

ERP 2022 Application Process – Track 2

Track 2 is a revenue-based certification program designed to assist eligible producers who suffered an eligible decrease in revenue resulting from 2022 calendar year disaster events when compared with revenue in a benchmark year using revenue information that is readily available from most tax records.

In cases where revenue does not reasonably reflect a normal year's revenue, Track 2 provides an alternative method for establishing revenue. Likewise, Track 2 affords producers of crops that are used within an operation and do not generate revenue from the sale of the crop a method for establishing revenue for the purpose of applying for ERP 2022 benefits. Producers are not required to submit tax records to FSA unless requested by the County Committee if required for an FSA compliance spot check.

Although not required when applying for ERP 2022 Track 2, applicants might find the following documents useful to the process:

- Schedule F (Form 1040)
- *Profit or Loss from Farming* or similar tax documents for tax years 2018, 2019, 2022 and 2023.

Track 2 targets gaps in emergency relief assistance for eligible producers whose eligible losses were not covered by crop insurance or NAP including revenue losses too small (shallow loss) to be covered by crop insurance.

Producers interested in applying for ERP 2022 Track 2, should contact their local FSA county office. Additional reference resources can be found on FSA's [emergency relief website](#).

Additional Required Forms

For both ERP 2022 tracks, all producers must have certain required forms on file with FSA within 60 days of the ERP 2022 deadline. FSA started accepting applications on Oct. 31, 2023. The application deadline has not yet been determined and will be announced at a later date. If not already on file, producers can update, complete and submit required forms to FSA at any time.

Required forms:

- Form AD-2047, *Customer Data Worksheet*.
- Form CCC-902, *Farm Operating Plan* for an individual or legal entity.
- Form CCC-901, *Member Information for Legal Entities* (if applicable).
- Form FSA-510, *Request for an Exception to the \$125,000 Payment Limitation for Certain Programs* (if applicable).
- Form CCC-860, *Socially Disadvantaged, Limited Resource, Beginning and Veteran Farmer or Rancher Certification*, if applicable, for the 2022 program year.
- A highly erodible land conservation (sometimes referred to as HELC) and wetland conservation certification (Form AD-1026 *Highly Erodible Land Conservation (HELC) and Wetland Conservation (WC) Certification*) for the ERP producer and applicable affiliates.

Most producers, especially those who have previously participated in FSA programs, will likely have these required forms on file. However, those who are uncertain or want to confirm the status of their forms can contact their local FSA county office.

Future Insurance Coverage Requirements

All producers who receive ERP 2022 payments must purchase crop insurance, or NAP coverage where crop insurance is not available, in the next two available crop years as determined by the Secretary. Purchased coverage must be at the 60/100 coverage level or higher for insured crops or at the catastrophic coverage level or higher for NAP crops.

More Information

ERP 2022 eligibility details and payment calculation factor tables are available on the [emergency relief website](#), in the [ERP Track 1](#) and [ERP Track 2](#) fact sheets and through your local [FSA county office](#).

Annual Review of Payment Eligibility for New Crop Year

FSA and NRCS program applicants for benefits are required to submit a completed CCC-902 (Farming Operation Plan) and CCC-941 Average Gross Income (AGI) Certification and Consent to Disclosure of Tax Information for FSA to determine the applicant's payment eligibility and establish the maximum payment limitation applicable to the program applicant.

Participants are not required to annually submit new CCC-902s for payment eligibility and payment limitation purposes unless a change in the farming operation occurs that may affect the previous determination of record. A valid CCC-902 filed by the participant is considered to be a continuous certification used for all payment eligibility and payment limitation determinations applicable for the program benefits requested.

Participants are responsible for ensuring that all CCC-902 and CCC-941 and related forms on file in the county office are updated, current, and correct. Participants are required to timely notify the county office of any changes in the farming operation that may affect the previous determination of record by filing a new or updated CCC-902 as applicable.

Changes that may require a NEW determination include, but are not limited to, a change of:

- Shares of a contract, which may reflect:
 - A land lease from cash rent to share rent
 - A land lease from share rent to cash rent (subject to the cash rent tenant rule)
 - A modification of a variable/fixed bushel-rent arrangement
- The size of the producer's farming operation by the addition or reduction of cropland that may affect the application of a cropland factor
- The structure of the farming operation, including any change to a member's share
- The contribution of farm inputs of capital, land, equipment, active personal labor, and/or active personal management
- Farming interests not previously disclosed on CCC-902 including the farming interests of a spouse or minor child
- Certifications of average AGI are required to be filed annually for participation in an annual USDA program. For multi-year conservation contracts and NRCS easements, a certification of AGI must be filed prior to approval of the contract or easement and is applicable for the duration of the contract period.

Participants are encouraged to file or review these forms within the deadlines established for each applicable program for which program benefits are being requested.

Preauthorized Debit Available for Farm Loan Borrowers

USDA's Farm Service Agency (FSA) has implemented pre-authorized debit (PAD) for Farm Loan Program (FLP) borrowers. PAD is a voluntary and alternative method for making weekly, bi-weekly, monthly, quarterly, semi-annual or annual payments on loans.

PAD payments are pre-authorized transactions that allow the National Financial and Accounting Operations Center (NFAOC) to electronically collect loan payments from a customer's account at a financial institution.

PAD may be useful if you use nonfarm income from regular wages or salary to make payments on loans or adjustment offers or for payments from seasonal produce stands. PAD can only be established for future payments.

To request PAD, customers, along with their financial institution, must fill out form RD 3550-28. This form has no expiration date, but a separate form RD 3550-28 must be completed for each loan to which payments are to be applied. A fillable form can be accessed on the USDA Rural Development (RD) website at rd.usda.gov/publications/regulations-guidelines. Click forms and search for "Form 3550-28."

If you have a "filter" on the account at your financial institution, you will need to provide the financial institution with the following information: Origination ID: 1220040804, Agency Name: USDA RD DCFO.

PAD is offered by FSA at no cost. Check with your financial institution to discuss any potential cost. Preauthorized debit has no expiration date, but you can cancel at any time by submitting a written request to your local FSA office. If a preauthorized debit agreement receives three payment rejections within a three-month period, the preauthorized debit agreement will be cancelled by FSA. The payment amount and due date of your loan is not affected by a cancellation of preauthorized debit. You are responsible to ensure your full payment is made by the due date.

For more information about PAD, contact your local County USDA Service Center or visit fsa.usda.gov.
