USDA Accepts Nearly 2.2 Million Acres through this year's Grassland, General, and Continuous CRP signups

The U.S. Department of Agriculture (USDA) is accepting offers for more than 2.2 million acres from agricultural producers and private landowners through this year's Grassland, General, and Continuous [Conservation Reserve Program](#) (CRP) signups administered by USDA's Farm Service Agency (FSA). With these accepted acres, enrollment is very near the 27 million CRP acreage cap.

Grassland CRP

Including the nearly 1.44 million acres recently accepted in Grassland CRP for offers received in 2024, producers will have enrolled more than 10 million acres in this popular working-lands program.

Grassland CRP allows producers and landowners to continue grazing and haying practices while protecting grasslands and further CRP's impacts. Grassland CRP leverages working lands practices to improve biodiversity and conserve environmentally sensitive land.

Enrolled acres help sequester carbon in vegetation and soil, while enhancing resilience to drought and wildfire. Meanwhile, producers can still conduct common grazing practices, such as haying, mowing or harvesting seed from the enrolled land, which supports agricultural production.

Top states for this year's Grassland CRP signup include:

- **Nebraska** with 237,853 acres accepted
- **Colorado** with 218,145 acres accepted
- **New Mexico** with 185,619 acres accepted

Additionally, to target conservation in key geographies, USDA prioritizes land within two National Priority Zones: The Greater Yellowstone Ecosystem and the Dust Bowl area. The 2024 Grassland CRP enrollment has added more than 560,000 acres in the Priority Zones, bringing the total acres to 3.8 million. By conserving working grasslands and other lands that underpin iconic big game migrations, land enrolled in these zones contributes to broader USDA conservation efforts through [Working Lands for Wildlife](#).

General and Continuous CRP

FSA also has accepted nearly 200,000 acres through the General signup, bringing total acres enrolled in General CRP to 7.9 million acres. As one of the largest private lands conservation programs in the United States, CRP offers a range of conservation options to farmers, ranchers and landowners. It has been an especially strong opportunity for farmers with less productive or marginal cropland, helping them re-establish valuable land cover to help improve water quality, prevent soil erosion and support wildlife habitat.

In January 2024, FSA opened enrollment for Continuous CRP. Under this enrollment, producers and landowners can enroll in CRP throughout the year. Offers are automatically accepted provided the producer and land meet the eligibility requirements and the enrollment levels do not exceed the statutory cap. To date, in 2024, more than 565,000 acres have been offered through Continuous CRP bringing the total acres enrolled to 8.5 million.

Producers can still make an offer to participate in CRP through [the Continuous CRP signup](#), which is ongoing, by contacting FSA at their local [USDA Service Center](#).

How to Document Wildfire Losses

If you've suffered excessive livestock death losses and grazing or feed losses due to recent wildfires, you may be eligible for disaster assistance programs through the USDA Farm Service Agency (FSA).

The Livestock Indemnity Program (LIP) offers payments to you for livestock death losses in excess of normal mortality due to adverse weather and the Emergency Assistance for Livestock, Honeybees, and Farm-Raised Fish Program (ELAP) provides emergency relief for losses due to feed or water shortages, disease, adverse weather, or other conditions, which are not adequately addressed by other disaster programs.

To participate in LIP, you will be required to provide verifiable documentation of death losses resulting from an eligible adverse weather event, and you must submit a notice of loss to your local FSA by the application deadline, March 1, 2025. To participate in ELAP, you must submit a notice of loss to your local FSA office by the application deadline, January 30, 2025, and should maintain documentation and receipts.

You should record all pertinent information regarding livestock losses due to the eligible adverse weather or loss condition, including:

- Documentation of the number, kind, type, and weight range of livestock that have died, supplemented if possible by photographs or video records of ownership and losses;
- Rendering truck receipts by kind, type and weight - important to document prior to disposal;
- Beginning inventory supported by birth recordings or purchase receipts;
- Documentation from Animal Plant Health Inspection Service, Department of Natural Resources, or other sources to substantiate eligible death losses due to an eligible loss condition;
- Documentation that livestock were removed from grazing pastures due to an eligible adverse weather or loss condition;
- Costs of transporting livestock feed to eligible livestock, such as receipts for equipment rental fees for hay lifts and snow removal;
- Feed purchase receipts if feed supplies or grazing pastures are destroyed;
- Number of gallons of water transported to livestock due to water shortages.

For more information on these programs and documentation requirements, contact your Local County USDA Service Center or visit fsa.usda.gov/disaster.

Applying for NAP Payments

The Noninsured Crop Disaster Assistance Program (NAP) provides financial assistance to you for crops that aren't eligible for crop insurance to protect against lower yields or crops unable to be planted due to natural disasters including freeze, hail, excessive moisture, excessive wind or hurricanes, flood, excessive heat and qualifying drought (includes native grass for grazing), among others.

In order to participate, you must obtain NAP coverage for the crop year by the applicable deadline using form CCC-471 "Application for Coverage" and pay the service fee. Application closing dates vary by crop. Producers are also required to submit an acceptable crop acreage report. Additionally, NAP participants must provide:

- The quantity of all harvested production of the crop in which the producer held an interest during the crop year
- The disposition of the harvested crop, such as whether it is marketable, unmarketable, salvaged or used differently than intended
- Acceptable crop production records (when requested by FSA)

Producers who fail to report acreage and production information for NAP-covered crops could see reduced or zero NAP assistance. These reports are used to calculate the approved yield.

If your NAP-covered crops are affected by a natural disaster, notify your FSA office by completing Part B of form CCC-576 "Notice of Loss and Application for Payment." This must be completed within 15 calendar days of the occurrence of the disaster or when losses become apparent or 15 days of the final harvest date. For hand-harvested crops and certain perishable crops, you must notify FSA within 72 hours of when a loss becomes apparent.

To receive benefits, you must also complete Parts D, E, F and G of the CCC-576 "Notice of Loss and Application for Payment" within 60 days of the last day of coverage for the crop year for any NAP covered crops. The CCC-576 requires acceptable appraisal information. Producers must provide evidence of production and note whether the crop was marketable, unmarketable, salvaged or used differently than intended.

Eligible crops must be commercially produced agricultural commodities for which crop insurance is not available, including perennial grass forage and grazing crops, fruits, vegetables, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, bioenergy, and industrial crops.

For more information on NAP, contact your Local County USDA Service Center or visit fsa.usda.gov/nap.

USDA Offers Assistance and Resources for Recovery from and Prevention of Highly Pathogenic Avian Influenza H5N1 in Dairy Herds

The U.S. Department of Agriculture (USDA) Animal and Plant Health Inspection Service (APHIS) has confirmed the detection of Highly Pathogenic Avian Influenza (HPAI), also known as H5N1, in dairy cattle in 12 states including Colorado, Idaho, Iowa, Kansas, Michigan, Minnesota, North Carolina, New Mexico, Ohio, South Dakota, Texas and Wyoming. To protect the U.S.

livestock industry from the threat posed by HPAI H5N1 USDA is taking a number of actions with our federal partners.

On April 24, APHIS announced a federal order that includes mandatory testing for interstate movement of dairy cattle and mandatory reporting of influenza A detections in livestock. In addition to the Federal Order mandates, USDA provides several voluntary testing and monitoring options, including the [HPAI Dairy Herd Status Program](#) announced on May 31, 2024. APHIS has released a list of [requirements and recommendations](#) that apply to interstate moving of lactating dairy cattle, [testing guidance](#) for livestock, and answers to [frequently asked questions](#). Producers are encouraged to visit the APHIS HPAI Livestock Detection [website](#) for information about these programs and requirements, as well as the most comprehensive and timely updates about this rapidly evolving situation.

Assistance for Milk Loss

Confirmed H5N1 Positive Test Results Required for Recovery Assistance

Producers who incur milk losses in their dairy herds due to HPAI H5N1 can now apply for financial assistance through the USDA's updated Emergency Assistance for Livestock, Honeybees, and Farm-raised Fish Program (ELAP). USDA's Farm Service Agency (FSA) expanded ELAP policy through the rule-making process to assist with financial losses resulting from reduced milk production when cattle are removed from commercial milking in dairy herds having a confirmed positive H5N1 test. Positive tests must be confirmed through the USDA's APHIS' National Veterinary Services Laboratories (NVSL).

To apply, **producers need to submit** the following to FSA:

- Proof of herd infection through a confirmed positive H5N1 test (based on USDA's APHIS [H5N1 case definition](#)) on individual animal or bulk tank samples confirmed by APHIS' NVSL;
- A notice of loss indicating the date when the loss is apparent, which is the sample collection date for the positive H5N1 test; and
- An application for payment certifying the number of eligible adult dairy cows removed from production, the month the cows were removed from production, and the producer's share in the milk production.

The final date to file a notice of loss and application for payment for eligible losses is 30 days after the end of the prior calendar year, which is **January 30**.

Note: To determine livestock and producer eligibility for ELAP H5N1 assistance, to submit an application or if you've not previously conducted business with FSA, contact your local FSA county office for details. [Find your local office](#). Other online resources include [frequently asked questions](#) and a [fact sheet](#).

Loans for Biosecurity Implementation

FSA also provides direct and guaranteed loans for farmers and ranchers that can assist with implementation of biosecurity measures for their operations. Loans can assist with:

- Installing physical barriers to facilitate quarantine, to prevent livestock interaction with wildlife, and to prevent unauthorized access by visitors
- Purchase of disinfectant, footbaths, and disposable footwear and clothing;
- Veterinary costs related to vaccination and general animal health;
- Testing of feed and water sources for toxins and other disease;
- Costs associated with responsible manure disposal and management;
- Costs associated with cleaning and disinfecting livestock transportation equipment; and
- Other biosecurity measures recommended by USDA or other applicable agencies.

To learn more about loans, producers can use the:

- [Loan Assistance Tool](#) – helps producers better navigate the farm loan process. The online Loan Assistance Tool provides producers needing agricultural financing with an interactive, step-by-step guide.
- [Farm Loans Overview Factsheet](#) – provides an overview of all FSA direct and guaranteed loans, and eligibility requirements.
- [Farm Loans Homepage](#) – gives in-depth farm loan information, including fact sheets, for those who don't want to use the online Loan Assistance Tool.

To learn more about ELAP or farm loans, producers should contact the FSA at the [local USDA Service Center](#).

To learn more about APHIS requirements and resources, visit APHIS' [Highly Pathogenic Avian Influenza \(HPAI\) Detections in Livestock webpage](#).

Maintaining ARC/PLC Acreage

If you're enrolled in the Agriculture Risk Coverage (ARC) or Price Loss Coverage (PLC) programs, you must protect all cropland and noncropland acres on the farm from wind and water erosion and noxious weeds. By signing ARC county or individual contracts and PLC contracts, you agree to effectively control noxious weeds on the farm according to sound agricultural practices. If you fail to take necessary actions to correct a maintenance problem on your farm that is enrolled in ARC or PLC, the County Committee may elect to terminate your contract for the program year.

USDA Launches Online Debt Consolidation Tool to Increase Farmer And Rancher Financial Viability

The U.S. Department of Agriculture (USDA) is announcing the launch of the Debt Consolidation Tool, an innovative online tool available through farmers.gov that allows agricultural producers to enter their farm operating debt and evaluate the potential savings that might be provided by obtaining a debt consolidation loan with USDA's Farm Service Agency (FSA) or a local lender.

A debt consolidation loan is a new loan used to pay off other existing operating loans or lines of credit that might have unreasonable rates and terms. By combining multiple eligible debts into a single, larger loan, borrowers may obtain more favorable payment terms such as a lower interest rate or lower payments. Consolidating debt may also provide farmers and ranchers additional cash flow flexibilities.

The Debt Consolidation Tool is a significant addition to FSA's suite of improvements designed to modernize its Farm Loan Programs. The tool enhances customer service and increases opportunities for farmers and ranchers to achieve financial viability by helping them identify potential savings that could be reinvested in their farming and ranching operation, retirement accounts, or college savings accounts.

Producers can access the Debt Consolidation Tool by visiting farmers.gov/debt-consolidation-tool. The tool is built to run on modern browsers including Chrome, Edge, Firefox, or the Safari browser. Producers do not need to create a farmers.gov account or access the authenticated customer portal to use the tool.

Additional Farm Loan Programs Improvements

FSA recently announced significant changes to Farm Loan Programs through the [Enhancing Program Access and Delivery for Farm Loans rule](#). These policy changes, to take effect September 25, 2024, are designed to better assist borrowers to make strategic investments in the enhancement or expansion of their agricultural operations.

FSA also has a significant initiative underway to streamline and automate the Farm Loan Program customer-facing business process. For the over 26,000 producers who submit a direct loan application annually, FSA has made several impactful improvements including:

- The [Loan Assistance Tool](#) that provides customers with an interactive online, step-by-step guide to identifying the direct loan products that may be a fit for their business needs and to understanding the application process.
- The [Online Loan Application](#), an interactive, guided application that is paperless and provides helpful features including an electronic signature option, the ability to attach supporting documents such as tax returns, complete a balance sheet, and build a farm operating plan.
- An [online direct loan repayment feature](#) that relieves borrowers from the necessity of calling, mailing, or visiting a local USDA Service Center to pay a loan installment.

- A [simplified direct loan paper application](#), reduced from 29 pages to 13 pages.
- A new [educational hub](#) with farm loan resources and videos.

USDA encourages producers to reach out to their local FSA farm loan staff to ensure they fully understand the wide range of loan and servicing options available to assist with starting, expanding, or maintaining their agricultural operation. To conduct business with FSA, please contact your local [USDA Service Center](#).
