

## Tax Resources for USDA Program Participants

Navigating filing taxes can be challenging, especially if you are new to running a farm business, participating in disaster programs for first time, or trying to forecast the farm's tax bill. Receiving funds from USDA through activities such as a conservation program payment or a disaster program is considered farm income that includes a tax liability for farm businesses. USDA technical assistance is free and creates no tax implications.

At the end of the tax year, USDA issues tax forms 1098 and 1099 forms for farm loans, conservation programs administered by the Farm Service Agency and Natural Resource Conservation Service including the Conservation Reserve Program and Environmental Quality Incentives Program, crop disaster payments, and the Market Facilitation Program. USDA also issues tax forms for recipients of assistance for distressed borrowers, including through Section 22006 of the Inflation Reduction Act.

If you have received tax forms related to your operation, USDA cannot and does not provide tax advice but wants you to be aware of options that may help manage your tax liability. USDA has partnered with experts to provide resources to help you make the right tax decisions for your operation. Monthly webinars are available for registration and to view on demand at [Taxes and USDA Programs | Farmers.gov](#).

The [Tax Estimator Tool](#) is an interactive spreadsheet that producers can download to estimate tax liability. It is for informational and educational purposes and should not be considered tax or legal advice. Producers may need to work with a tax professional to determine the correct information to be entered in the Tax Estimator Tool.

We encourage you to visit [Taxes and USDA Programs | Farmers.gov](#) for more information on how to find and work with a tax preparer as well as instructions on how to request copies of USDA documents and links to other helpful tax resources.

## Farmers.gov - Your online hub for conducting business with USDA

**Farmers.gov** gives you one place to do business with USDA's Farm Service Agency (FSA) and the Natural Resources Conservation Service (NRCS), including accessing your farm records, maps, and common land units. You can create a farmers.gov account for the

farmers.gov authenticated site, where you can access self-service features through a secure login.

In addition to the self-service features farmers.gov website also has information on USDA programs, farm loans, disaster assistance, conservation programs and crop insurance.

### **What can you do with your farmers.gov account?**

- View FSA Farm loans including loan information, interest payments, loan advance and payment history, paid-in-full restructured loans, and account alerts.
- View NRCS Disbursements and Farm Loans financial activity from the past 180 days.
- View, print and export detailed farm records and farm/tract maps.
- Export common land unit (field) boundaries as ESRI and GeoJSON file types.
- Import precision agriculture planting boundaries, create labels containing crop information, and print both on farm tract maps.
- Use the draw tools to determine acres in an area of interest that can be printed on a map and provided to a third party or exported as a feature file for use in other geospatial applications.
- View, upload, download and e-sign NRCS documents.
- Request conservation and financial assistance, including submitting a program application.
- Access information on current and past conservation practices, report practice completion and request practice certification
- View detailed information on previous and ongoing contracts, including the amount of cost-share assistance received and request contract modifications.

### **How to create a farmers.gov account?**

To create a farmers.gov account you will need:

- A USDA individual customer record - A customer record contains information you have given to USDA to do business with them, like your name, address, phone number, and any legal representative authority relationships.
- A login.gov account – Login.gov is a sign-in service that gives people secure online access to participating government programs.

## **USDA Announces Milk Loss Assistance for Dairy Operations Impacted by 2020, 2021 and 2022 Disaster Events**

USDA announced Milk Loss Program (MLP) assistance for eligible dairy operations for milk that was dumped or removed, without compensation, from the commercial milk market due to

qualifying weather events and the consequences of those weather events that inhibited delivery or storage of milk (e.g., power outages, impassable roads, infrastructure losses, etc.) during calendar years 2020, 2021 and 2022. Administered by the Farm Service Agency (FSA), signup for MLP begins Sept. 11 and runs through Oct. 16, 2023.

## **Background**

On Dec. 29, 2022, President Biden signed into law the Extending Government Funding and Delivering Emergency Assistance Act (P.L. 117-43), providing \$10 billion for crop losses, including milk losses due to qualifying disaster events that occurred in calendar years 2020 and 2021. Additionally, the Disaster Relief Supplemental Appropriations Act, 2023 (Pub. L. 117-328) provides approximately \$3 billion for disaster assistance for similar losses that occurred in calendar year 2022.

## **Eligibility**

MLP compensates dairy operations for milk dumped or removed without compensation from the commercial milk market due to qualifying disaster events, including droughts, wildfires, hurricanes, floods, derechos, excessive heat, winter storms, freeze (including a polar vortex), and smoke exposure that occurred in the 2020, 2021 and 2022 calendar years. Tornadoes are considered a qualifying disaster event for calendar year 2022 only.

The milk loss claim period is each calendar month that milk was dumped or removed from the commercial market. Each MLP application covers the loss in a single calendar month. Milk loss that occurs in more than one calendar month due to the same qualifying weather event requires a separate application for each month.

The days that are eligible for assistance begin on the date the milk was removed or dumped and for concurrent days milk was removed or dumped. Once the dairy operation restarts milk marketing, the dairy operation is ineligible for assistance unless after restarting commercial milk marketing, additional milk is dumped due to the same qualifying disaster event. The duration of yearly claims is limited to 30 days per year for 2020, 2021 and 2022.

## **How to Apply**

To apply for MLP, producers must submit:

- FSA-376, Milk Loss Program Application
- Milk marketing statement from the:
  - Month prior to the month milk was removed or dumped.
  - Affected month.
- Detailed written statement of milk removal circumstances, including the weather event type and geographic scope, what transportation limitations occurred and any information on what was done with the removed milk.
- Any other information required by the regulation.

If not previously filed with FSA, applicants must also submit all the following items within 60 days of the MLP application deadline:

- Form AD-2047, Customer Data Worksheet.
- Form CCC-902, Farm Operating Plan for an individual or legal entity.
- Form CCC-901, Member Information for Legal Entities (if applicable).
- Form FSA-510, Request for an Exception to the \$125,000 Payment Limitation for Certain Programs (if applicable).
- Form CCC-860, Socially Disadvantaged, Limited Resource, Beginning and Veteran Farmer or Rancher Certification, (if applicable).
- A highly erodible land conservation (sometimes referred to as HELC) and wetland conservation certification (Form AD-1026 Highly Erodible Land Conservation (HELIC) and Wetland Conservation (WC) Certification) for the MLP producer and applicable affiliates.

Most producers, especially those who have previously participated in FSA programs, will likely have these required forms already on file. However, those who are uncertain or want to confirm the status of their forms can contact their local [FSA county office](#).

### **MLP Payment Calculation**

The final MLP payment is determined by factoring the MLP payment calculation by the applicable MLP payment percentage.

The calculation for determining MLP payment is:

- $((\text{Base period per cow average daily milk production} \times \text{the number of milking cows in a claim period} \times \text{the number of days milk was removed or dumped in a claim period}) \div 100) \times \text{pay price per hundredweight (cwt.)}$ .

For MLP payment calculations, the milk loss base period is the first full month of production before the dumping or removal occurred.

The MLP payment percentage will be 90% for underserved producers, including socially disadvantaged, beginning, limited resource, and veteran farmers and ranchers and 75% for all other producers.

To qualify for the higher payment percentage, eligible producers must have a CCC-860, Socially Disadvantaged, Limited Resource, Beginning and Veteran Farmer or Rancher Certification, form on file with FSA for the applicable program year.

Adjusted Gross Income (AGI) limitations do not apply to MLP, however the payment limitation for MLP is determined by the person's or legal entity's average adjusted gross farm income (income derived from farming, ranching and forestry operations). Specifically, a person or legal entity, other than a joint venture or general partnership, cannot receive, directly or indirectly, more than \$125,000 in payments under MLP if their average adjusted gross farm income is less than 75% of their average AGI or more than \$250,000 if their adjusted gross farm income is at least 75% of their average AGI.

---

## Dairy Margin Coverage Program Provides Critical Support for Dairy Operations

The August milk margin triggered the eighth consecutive payment for dairy producers who obtained [Dairy Margin Coverage](#) (DMC) for the 2023 program year. August's income over feed margin is \$6.46 per hundredweight (cwt.) with projected DMC payments totaling \$120 million. To date, including the projected August payments, dairy producers have received more than \$1.2 billion in much needed economic support for 2023 and margin forecasts indicate the likelihood of more to come before the end of the calendar year.

DMC is a voluntary risk management program administered by USDA's [Farm Service Agency](#) (FSA) that offers protection to dairy producers when the difference between the all-milk price and the average feed price (the margin) falls below a certain dollar amount selected by the producer.

### Additional Dairy Assistance

DMC complements other assistance available to dairy producers, including the [Milk Loss Program](#) (MLP) and the [Organic Dairy Marketing Assistance Program](#) (ODMAP). MLP covers milk that was dumped or removed, without compensation, from the commercial milk market due to qualifying weather events and the consequences of those weather events that inhibited delivery or storage of milk (e.g., power outages, impassable roads, infrastructure losses, etc.) during calendar years 2020, 2021 and 2022.

USDA recently announced a second round of payments for dairy producers through ODMAP, providing an additional \$5 million to help dairy producers with marketing costs to mitigate market volatility, higher input and transportation costs and unstable feed supply and prices that have created unique hardships in the organic dairy industry. FSA has already paid out \$15 million in the first round of payments for eligible producers, bringing total ODMAP payments to \$20 million.

To learn more about FSA programs, producers can contact their local [USDA Service Center](#).

## Actively Engaged Provisions for Non-Family Joint Operations or Entities

Many Farm Service Agency (FSA) programs require all program participants, either individuals or legal entities, to be "actively engaged in farming." This means participants provide a significant contribution to the farming operation, whether it is capital, land, equipment, active personal labor and/or management. For entities, each partner, stockholder or member with an ownership interest, must contribute active personal labor and/or management to the operation on a regular basis that is identifiable and documentable as well as separate and distinct from contributions of any other member. Members of joint operations must have a share of the profits or losses from the farming operation commensurate with the member's contributions to the operation and must make contributions to the farming operation

that are at risk for a loss, with the level of risk being commensurate with the member's claimed share on the farming operation.

Joint operations comprised of non-family members or partners, stockholders or persons with an ownership in the farming operation must meet additional payment eligibility provisions. Joint operations comprised of family members are exempt from these additional requirements. For 2016 and subsequent crop years, non-family joint operations can have one member that may use a significant contribution of active personal management exclusively to meet the requirements to be determined "actively engaged in farming." The person or member will be defined as the farm manager for the purposes of administering these management provisions.

Non-family joint operations may request to add up to two additional managers for their farming operation based on the size and/or complexity of the operation. If additional farm managers are requested and approved, all members who contribute management are required to complete form CCC-902MR, *Management Activity Record*. The farm manager should use the form to record management activities including capital, labor and agronomics, which includes crop selection, planting decisions, acquisition of inputs, crop management and marketing decisions. One form should be used for each month and the farm manager should enter the number of hours of time spent for each activity under the date of the month the actions were completed. The farm manager must also document if each management activity was completed on the farm or remotely.

The records and supporting business documentation must be maintained and timely made available for review by the appropriate FSA reviewing authority, if requested.

If the farm manager fails to meet these requirements, their contribution of active personal management to the farming operation for payment eligibility purposes will be disregarded and their payment eligibility status will be re-determined for the applicable program year.

In some instances, additional persons or members of a non-family member joint operation who meet the definition of farm manager may also be allowed to use such a contribution of active personal management to meet the eligibility requirements. However, under no circumstances may the number of farm managers in a non-family joint operation exceed a total of three in any given crop and program year.
