Environmental Review Required Before Project Implementation

The National Environmental Policy Act (NEPA) requires Federal agencies to consider all potential environmental impacts for federally funded projects before the project is approved.

For all Farm Service Agency (FSA) programs, an environmental review must be completed before actions are approved, such as site preparation or ground disturbance.

These programs include, **but are not limited to**, the Emergency Conservation Program (ECP), Farm Storage Facility Loan (FSFL) program and farm loans. If project implementation begins before FSA has completed an environmental review, the request will be denied. Although there are exceptions regarding the Stafford Act and emergencies, it's important to wait until you receive written approval of your project proposal before starting any actions.

Applications cannot be approved until FSA has copies of all permits and plans. Contact your local FSA office early in your planning process to determine what level of environmental review is required for your program application so that it can be completed timely

Applying for Farm Storage Facility Loans

The Farm Service Agency's (FSA) Farm Storage Facility Loan (FSFL) program provides low-interest financing to help you build or upgrade storage facilities and to purchase portable (new or used) structures, equipment and storage and handling trucks.

Eligible commodities include corn, grain sorghum, rice, soybeans, oats, peanuts, wheat, barley, minor oilseeds harvested as whole grain, pulse crops (lentils, chickpeas and dry peas), hay, honey, renewable biomass, fruits, nuts and vegetables for cold storage facilities, floriculture, hops, maple sap, rye, milk, cheese, butter, yogurt, meat and poultry (unprocessed), eggs, and aquaculture (excluding systems that maintain live animals through uptake and discharge of water). Qualified facilities include grain bins, hay barns and cold storage facilities for eligible commodities.

Loans up to \$50,000 can be secured by a promissory note/security agreement, loans between \$50,000 and \$100,000 may require additional security, and loans exceeding \$100,000 require additional security.

You do not need to demonstrate the lack of commercial credit availability to apply. The loans are designed to assist a diverse range of farming operations, including small and mid-sized businesses, new farmers, operations supplying local food and farmers markets, non-traditional farm products, and underserved producers.

For more information, contact your local County USDA Service Center or visit fsa.usda.gov/pricesupport.

USDA Supports Urban and Innovative Producers

Are you gardening or farming in an urban environment or involved in controlled environment agriculture, rooftop farms, hydroponic/aeroponic, aquaponic facilities or other types of innovative production? Agencies across USDA including the [Office of Urban Agriculture and Innovative](#)

[Production \(OUAIP\)](#) have programs and resources available for you, and many are listed in this [Urban Agriculture Programs at a Glance](#) brochure.

USDA offers resources to help you:

- **Starting, Financing, and Protecting Your Farm or Garden:** Our resources can help you [access land and capital](#) for equipment and operating costs and start [a business plan](#). USDA's Farm Service Agency (FSA) offers a variety of [funding opportunities](#) and Rural Development (RD) can help urban and innovative producers locate guaranteed financing through the [Business and Industry Guaranteed Loan Program](#). Our [Risk Management Agency \(RMA\)](#) can help you insure your crops against losses, including the micro farm policy. Learn more about [USDA programs that support risk management](#).
- **On-Farm Guidance and Innovation:** [Natural Resources Conservation Service \(NRCS\)](#) offers technical and financial assistance with [conservation planning](#) based on your goals, including high tunnels, soil health management systems, composting facilities and irrigation. Local organizations like [Cooperative Extension](#) also offer free training and expertise. [OUAIP](#) offers [competitive grants](#) for NRCS [Conservation Innovation Grants](#) fund innovative on-farm projects, some of which are targeted towards urban and innovative producers.
- **Marketing and Selling:** FSA, [Agricultural Marketing Service \(AMS\)](#), and [Food and Nutrition Service \(FNS\)](#) can help you reach customers in new ways and open additional revenue streams when selling products. The [Women, Infants, Children \(WIC\) Farmers' Market Nutrition Program](#) and [Seniors Farmers Market Nutrition Program](#) issues coupons for eligible foods from state-approved farmers, farmers' markets, or roadside stands. [Farm Storage Facility Loans \(FSA\)](#) provide low-interest loans to build, upgrade, or purchase permanent or portable facilities to

store commodities, including fruit and vegetable cold storage, washing, packing, and handling buildings and equipment.

[Farmers Market Promotion Program \(FMPP\)](#) funds projects that develop, coordinate and expand direct producer-to-consumer markets like farmers markets. Agricultural businesses and cooperative are among the eligible entities.

A first step is to contact your local [USDA Service Center](#), including our new [Urban Service Centers](#), to meet face to face with our staff from FSA and NRCS. If you're a new farmer, you can also reach out to your state [Beginning Farmer and Rancher Coordinator](#).

We also invite you to get involved with your [FSA Urban County Committee](#), which provides local input on USDA urban agriculture policy, and the [Advisory Committee for Urban Agriculture and Innovative Production](#), which advises the Secretary of Agriculture and holds public meetings.

[Sign up for e-mail updates on Urban Agriculture](#) and learn more at farmers.gov/urban or usda.gov/urban.

USDA Reminds Producers of Continuous Certification Option for Perennial Forage

The U.S. Department of Agriculture (USDA) reminds agricultural producers with perennial forage crops of an option to report their acreage once, without having to report that acreage in subsequent years, as long as there are no applicable changes on the farm. Interested producers can select the continuous certification option after USDA's Farm Service Agency (FSA) certifies their acreage report.

An acreage report documents a crop grown on a farm or ranch and its intended uses, including perennial crops like mixed forage, birdsfoot trefoil, chicory/radicchio, kochia (prostrata), lespedeza, perennial peanuts and perennial grass varieties. To access many USDA programs, producers must file an accurate and timely acreage report for all crops and land uses, including failed acreage and prevented planting acreage.

The perennial crop continuous certification process requires a producer to initially complete an acreage report certifying the perennial crop acreage. The producer may select the continuous certification option any time after the crop is certified. Once the continuous certification option is selected, the certified acreage will roll forward annually and does not require additional action on the producer's part in subsequent years unless the acreage report changes.

Once a producer selects continuous certification, then continuous certification is applicable to all fields on the farm for the specific crop, crop type and intended use. If continuous certification is selected by any producers sharing in the crop, then the continuous certification is applicable to fields in which the producer has a share for the specific crop, crop type and intended use.

Producers can opt out of continuous certification at any time. The continuous certification will terminate automatically if a change in the farming operation occurs.

How to File a Report

To file a crop acreage report, producers need to provide:

- Crop and crop type or variety.

- Intended use of the crop.
- Number of acres of the crop.
- Map with approximate boundaries for the crop.
- Planting date(s).
- Planting pattern, when applicable.
- Producer shares.
- Irrigation practice(s).
- Acreage prevented from planting, when applicable.
- Other information as required.

More Information

Producers can contact their local FSA office to see if their crops are eligible for continuous certification or to make an appointment. Producers can make an appointment to report acres by contacting their local [USDA Service Center](#).

Tax Resources for USDA Program Participants

Navigating filing taxes can be challenging, especially if you are new to running a farm business, participating in disaster programs for first time, or trying to forecast the farm's tax bill. Receiving funds from USDA through activities such as a conservation program payment or a disaster program is considered farm income that includes a tax liability for farm businesses. USDA technical assistance is free and creates no tax implications.

At the end of the tax year, USDA issues tax forms 1098 and 1099 forms for farm loans, conservation programs administered by the Farm Service Agency and Natural Resource Conservation Service including the Conservation Reserve Program and Environmental Quality Incentives Program, crop disaster payments, and the Market Facilitation Program. USDA also issues tax forms for recipients of assistance for distressed borrowers, including through Section 22006 of the Inflation Reduction Act.

If you have received tax forms related to your operation, USDA cannot and does not provide tax advice but wants you to be aware of options that may help manage your tax liability. USDA has partnered with experts to provide resources to help you make the right tax decisions for your operation. Monthly webinars are available for registration and to view on demand at <https://www.farmers.gov/working-with-us/taxes>.

The [Tax Estimator Tool](#) is an interactive spreadsheet that producers can download to estimate tax liability. It is for informational and educational purposes and should not be considered tax or legal advice. Producers may need to work with a tax professional to determine the correct information to be entered in the Tax Estimator Tool.

We encourage you to visit <https://www.farmers.gov/working-with-us/taxes> for more information on how to find and work with a tax preparer as well as instructions on how to request copies of USDA documents and links to other helpful tax resources.

Applying for Youth Loans

The Farm Service Agency (FSA) makes loans to youth to establish and operate agricultural income-producing projects in connection with 4-H clubs, FFA and other agricultural groups. Projects must be planned and operated with the help of the organization advisor, produce sufficient income to repay the loan and provide the youth with practical business and educational experience. The maximum loan amount is \$5,000.

Youth Loan Eligibility Requirements:

- Be a citizen of the United States (which includes Puerto Rico, the Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands) or a legal resident alien
- Be 10 years to 20 years of age
- Comply with FSA's general eligibility requirements
- Be unable to get a loan from other sources
- Conduct a modest income-producing project in a supervised program of work as outlined above
- Demonstrate capability of planning, managing and operating the project under guidance and assistance from a project advisor. The project supervisor must recommend the youth loan applicant, along with providing adequate supervision.

For help preparing the application forms, contact your local County USDA Service Center or visit fsa.usda.gov.
