#### State Committee:

Linda A. DuBois, Chair  
Kurt W. Alstede  
Samuel G. Conard  
Marty J. Bullock

#### State Executive Director:

[Barry Calogero](#)

#### Farm Loan Chief:

Kevin P. Murphy

Please contact your [local FSA Office](#) for questions specific to your operation or county

#### Important Dates:

**September 30:** Acreage Reporting Deadline for value loss crops for 2019 crop year

**October 8:** Offices Closed in honor of Columbus Day

### USDA Launches Trade Mitigation Programs

USDA launched the trade mitigation package aimed at assisting farmers suffering from damage due to unjustified trade retaliation by foreign nations. Producers of certain commodities can now sign up for the Market Facilitation Program (MFP).

USDA [provided details in August](#) of the programs to be employed. USDA's Farm Service Agency (FSA) will administer the Market Facilitation Program (MFP) to provide payments to corn, cotton, dairy, hog, sorghum, soybean, and wheat producers. An announcement about further payments will be made in the coming months, if warranted. USDA is currently working to determine how to address market disruptions for producers of almonds and sweet cherries.

The sign-up period for MFP is now open and runs through Jan. 15, 2019, with information and instructions provided at [www.farmers.gov/mfp](http://www.farmers.gov/mfp). MFP provides payments to cotton, corn, dairy, hog, sorghum, soybean, and wheat producers who have been significantly impacted by actions of foreign governments resulting in the loss of traditional exports. Eligible producers should apply after harvest is complete, as payments will only be issued once production is reported.

A payment will be issued on 50 percent of the producer's total production, multiplied by the MFP rate for a specific commodity. A second payment period, if warranted, will be determined by the USDA.

MFP payments are limited to a combined \$125,000 for corn, cotton, sorghum, soybeans, and wheat capped per person or legal entity. MFP payments are also limited to a combined \$125,000 for dairy and hog producers. Applicants must also have an average

---

adjusted gross income for tax years 2014, 2015, and 2016 of less than \$900,000. Applicants must also comply with the provisions of the Highly Erodible Land and Wetland Conservation regulations.

### Market Facilitation Program

Commodity	Initial Payment Rate	Est. Initial Payment** (in \$1,000s)
Cotton	\$0.06/lb.	\$276,900
Corn	\$0.01/bu.	\$96,000
Dairy (milk)	\$0.12/cwt.	\$127,400
Pork (hogs)	\$8.00/head	\$290,300
Soybeans	\$1.65/bu.	\$3,629,700
Sorghum	\$0.86/bu.	\$156,800
Wheat	\$0.14/bu.	\$119,200
<b>Total</b>		<b>\$4,696,300</b>

\*\*Initial payment rate on 50% of production

For more further information or to locate and contact local FSA offices, interested producers can visit [www.farmers.gov](http://www.farmers.gov)

## USDA Enrollment Period for Safety Net Coverage in 2018

Farmers and ranchers with base acres in the Agriculture Risk Coverage (ARC) or Price Loss Coverage (PLC) safety net program still have time to enroll for the 2018 crop year. The enrollment period will end on **Sept. 28, 2018**.

Producers with generic base acres have until Dec. 7, 2018, to allocate generic base acres, update yields, make a program election for seed cotton base acres and enroll farms that formerly contained generic base acres.

**Since shares and ownership of a farm can change year-to-year, producers must enroll by signing a contract each program year.**

The producers on a farm that are not enrolled for the 2018 enrollment period will not be eligible for financial assistance from the ARC or PLC programs for the 2018 crop should crop prices or farm revenues fall below the historical price or revenue benchmarks established by the program. Producers who made their elections in previous years must still enroll during the 2018 enrollment period.

The ARC and PLC programs were authorized by the 2014 Farm Bill and offer a safety net to agricultural producers when there is a substantial drop in prices or revenues for covered commodities. Covered commodities include barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium grain rice (which includes short grain and sweet rice), safflower seed, sesame, soybeans, sunflower seed, wheat and upland cotton. For more details regarding these programs, go to [www.fsa.usda.gov/arc-plc](http://www.fsa.usda.gov/arc-plc).

For more information, producers are encouraged to visit their local FSA office. To find a local FSA office, visit <https://www.farmers.gov/>.

---

## Filing CCC-941 Adjusted Gross Income (AGI) Certifications

Many producers have experienced delays in receiving Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) payments, Loan Deficiency Payments (LDPs) and Market Gains on Marketing Assistance Loans (MALs) because they have not filed form CCC-941, Adjusted Gross Income Certification. No program payment can be issued to an eligible producer, including landowners who share in the crop, without a valid CCC-941 on file in the county office.

Producers without a valid CCC-941 on file for the applicable crop year will not receive payments. All farm operator/tenants/owners who have not filed a CCC-941 and have pending payments should

IMMEDIATELY file the form with their recording county FSA office. Farm operators and tenants are encouraged to ensure that their landowners have filed the form.

FSA can accept the CCC-941 for 2015, 2016, 2017 and 2018. Unlike the past, producers must have the CCC-941 certifying their AGI compliance before any payments can be issued.

---

## 2019 Acreage Reporting Dates

In order to comply with FSA program eligibility requirements, all producers are encouraged to visit their local FSA office to file an accurate crop certification report by the applicable deadline.

The following acreage reporting dates are applicable for New Jersey:

- Sept 30, 2018 - Xmas trees and other value loss crops except nursery for 2019 crop year
- Nov. 15, 2018 - fall-planted small grains, fall-planted & perennial forage for 2019 crop year.
- Jan 2, 2019 - honey (honeybee colonies)
- Jan 15, 2019 - apples, blueberries, cranberries, peaches, grapes, & strawberries
- May 31, 2019 - nursery for 2020 crop year
- Jun 15, 2019 - spring forage seeding
- July 15, 2019 - soybeans, corn and other spring-planted feed grains, CRP, & most other crops
- Aug 15, 2019 - processing beans

The following exceptions apply to the above acreage reporting dates:

- If the crop has not been planted by the above acreage reporting date, then the acreage must be reported no later than 15 calendar days after planting is completed.
- If a producer acquires additional acreage after the above acreage reporting date, then the acreage must be reported no later than 30 calendar days after purchase or acquiring the lease. Appropriate documentation must be provided to the county office.

Noninsured Crop Disaster Assistance Program (NAP) policy holders should note that the acreage reporting date for NAP covered crops is the earlier of the dates listed above or 15 calendar days before grazing or harvesting of the crop begins.

## Communication is Key in Lending

Farm Service Agency (FSA) is committed to providing our farm loan borrowers the tools necessary to be a success. A part of ensuring this success is providing guidance and counsel from the loan application process through the borrower's graduation to commercial lending institutions. While it is FSA's commitment to advise borrowers as they identify goals and evaluate progress, it is crucial for borrowers to communicate with their farm loan staff when changes occur. It is the borrower's responsibility to alert FSA to any of the following:

- Any proposed or significant changes in the farming operation;
- Any significant changes to family income or expenses;
- The development of problem situations;
- Any losses or proposed significant changes in security

In addition, if a farm loan borrower cannot make payments to suppliers, other creditors, or FSA on time, contact your farm loan staff immediately to discuss loan servicing options.

For more information on FSA farm loan programs, visit [www.fsa.usda.gov](http://www.fsa.usda.gov).

## Cover Crop Guidelines

Recently the Farm Service Agency (FSA), Natural Resources Conservation Service (NRCS) and Risk Management Agency (RMA) worked together to develop consistent, simple and a flexible policy for cover crop practices.

The termination and reporting guidelines were updated for cover crops.

**Termination:**

The cover crop termination guidelines provide the timeline for terminating cover crops, are based on zones and apply to non-irrigated cropland. To view the zones and additional guidelines visit <https://www.nrcs.usda.gov/wps/portal/nrcs/main/national/landuse/crops/> and click "Cover Crop Termination Guidelines."

**Reporting:**

The intended use of cover only will be used to report cover crops. This includes crops that were terminated by tillage and reported with an intended use code of green manure. An FSA policy change will allow cover crops to be hayed and grazed. Program eligibility for the cover crop that is being hayed or grazed will be determined by each specific program.

If the crop reported as cover only is harvested for any use other than forage or grazing and is not terminated properly, then that crop will no longer be considered a cover crop.

Crops reported with an intended use of cover only will not count toward the total cropland on the farm. In these situations a subsequent crop will be reported to account for all cropland on the farm.

Cover crops include grasses, legumes, and forbs, for seasonal cover and other conservation purposes. Cover crops are primarily used for erosion control, soil health improvement, and water quality improvement. The cover crop may be terminated by natural causes, such as frost, or intentionally terminated through chemical application, crimping, rolling, tillage or cutting. A cover crop managed and terminated according to NRCS Cover Crop Termination Guidelines is **not** considered a crop for crop insurance purposes.

Cover crops can be planted: with no subsequent crop planted, before a subsequent crop, after prevented planting acreage, after a planted crop, or into a standing crop.

For questions regarding crop certification and crop loss reports, please contact your local office.
