Message from State Executive Director

Greetings, FSA Friends!

As we enter the summer months, I hope this message finds you well and your crops and livestock thriving. June brings warmer weather and longer days, allowing us more time to tend to our fields and crops.

With the hot June temperatures, I encourage you to closely monitor your crops and livestock for any signs of heat stress or dehydration. Providing shade and adequate hydration to your animals and plants can make a significant difference in their health and productivity.

With that, I want to remind you that help is available if and when you are affected by a natural disaster. The Farm Service Agency offers various assistance programs that can help you recover from damages brought on by eligible adverse weather or eligible diseases. Here are a few disaster programs you can take advantage of:

- [Noninsured Crop Disaster Assistance](#) (NAP) Program coverage to protect against natural disasters that result in lower yields, crop losses, or prevent crop planting.
- [Tree Assistance Program](#) (TAP) to replant or rehabilitate lost or damaged trees, bushes, or vines.
- [Livestock Indemnity Program](#) (LIP) to compensate for livestock deaths due to certain natural disasters.
- [Emergency Loan Program](#) provides loans to help producers recover from production and physical losses due to drought, flooding, other natural disasters.
- [Farm Storage Facility Loan Program](#) (FSFL) provides low-interest financing so producers can build or upgrade facilities to store commodities.

As always, if you have any questions about our programs, please do not hesitate to contact our team. The North Carolina Farm Service Agency is here to support your operations, and we wish you a successful summer season.

Bob Etheridge, SED

HIGHLIGHTS FROM MAY

USDA Extends Application Deadline for Revenue Loss Programs to July 14

USDA is extending the deadline for the Emergency Relief Program (ERP) Phase Two and Pandemic Assistance Revenue Program (PARP) to July 14, 2023, to give producers more time to apply for assistance. The original deadline was June 2.

Additionally, USDA's Farm Service Agency (FSA) is partnering with nine organizations to provide educational and technical assistance to agricultural producers and provide assistance in completing an ERP Phase Two application. The extended deadline will give producers more time to work with these partner organizations and apply for assistance.

Cooperative Agreements for ERP Phase Two Application Assistance Through cooperative agreements with FSA, the following organizations are providing free assistance to producers across the United States and territories.

- [Alabama State Association of Cooperatives](#)
- [Farmers Legal Action Group, INC.](#)
- [Flower Hill Institute](#)
- [Intertribal Agriculture Council, Inc](#)
- [North South Institute](#)
- [Renewing the Countryside II](#)
- [Rural Advancement Foundation International - USA](#)
- [Rural Coalition](#)
- [Texas Small Farmers and Ranchers CBO](#)

Depending on a producer's location, these nine partners can provide assistance either by phone or through online meeting software like Zoom or Microsoft Teams.

There is never a charge for technical assistance provided by FSA employees or cooperative agreement recipients. These organizations will assist producers with completing the application and any follow-up future insurance coverage requirements. Producers who receive ERP payments are statutorily required to purchase crop insurance or Noninsured Crop Disaster Assistance Program (NAP) coverage for the next two available crop years. These organizations will not collect producer records, complete or sign the application form, or act on the producer's behalf in any way throughout this process.

Find more information on FSA cooperative agreements and contact information for the nine organizations please visit fsa.usda.gov/programs-and-services/cooperative-agreements/index.

PARP Application Assistance USDA will host a webinar that focus on completing the PARP application form on June 8, 2023, from 2:00 to 4:00 p.m. eastern with members of the National Farm Income Tax Extension Committee. Register [here](#).

Eligibility To be eligible for ERP Phase Two, producers must have suffered a decrease in allowable gross revenue in 2020 or 2021 due to necessary expenses related to losses of eligible crops from a qualifying natural disaster event. Assistance will be primarily to producers of crops that were not covered by Federal Crop Insurance or NAP, since crops covered by Federal Crop Insurance and NAP were included in the assistance under ERP Phase One.

To be eligible for PARP, an agricultural producer must have been in the business of farming during at least part of the 2020 calendar year and had a 15% or greater decrease in allowable gross revenue for the 2020 calendar year, as compared to a baseline year.

FSA offers an online [ERP tool](#) and [PARP tool](#) that can help producers determine what is considered allowable gross revenue for each respective program. Producers should contact their local FSA office to make an appointment to apply for ERP Phase Two and PARP assistance.

Producers should also keep in mind that July 15 is a major deadline to complete acreage reports for most crops. FSA encourages producers to complete the ERP Phase Two application, PARP application and acreage reporting during the same office visit.

More Information For more information, view the [ERP Phase Two Fact Sheet](#), [PARP Fact Sheet](#), the [ERP Phase Two-PARP Comparison Fact Sheet](#), [ERP Phase Two application video tutorial](#), [PARP application video tutorial](#), [myth-buster blog](#) or contact your local [USDA Service Center](#).

USDA Announces New Steps to Enhance Organic Markets and Support Producers

The USDA is taking additional steps as part of its commitment to strengthen the market for domestically grown organic goods, and to support producers seeking organic certification. These funding opportunities are part of the U.S. Department of Agriculture's (USDA) [Organic Transition Initiative](#), launched in fall 2022, which is a suite of offerings to help existing organic farmers and those transitioning to organic production and processing.

Consumer demand for organically produced goods surpassed \$67 billion in 2022, and multi-year trends of strong growth in the sector provide market incentives for U.S. farmers across a broad range of products. However, through public comment and listening sessions USDA has heard that producers may be less willing to commit to the three-year transition to organic certification because of risks related to inadequate organic processing, storage, and handling capacity, cost barriers due to limited markets for rotational crops, a lack of certainty about market access, and insufficient supply of certain organic ingredients. The organic livestock and processed product markets depend heavily on imported agricultural products for feed grains and key ingredients. These are longstanding market issues that were brought into sharp focus due to the impacts of the pandemic and international conflicts in critical overseas organic supply regions, resulting in limitations on certain domestic organic products in the face of rising demand.

Cost Share for Organic Certification

As part of USDA's broader effort to support organic producers and in response to stakeholder feedback, this year the Farm Service Agency increased the cost share amount under

the [Organic Certification Cost Share Program](#) (OCCSP), which helps organic producers cover organic certification costs, to the maximum amount allowed by statute.

Specifically, FSA will cover up to 75% of costs associated with organic certification, up to \$750 for crops, wild crops, livestock, processing/handling and state organic program fees (California only). OCCSP will cover costs incurred from Oct. 1, 2022, through Sept. 30, 2023.

FSA begins accepting applications for OCCSP Monday, May 15. Applications are due Oct. 31, 2023. To apply, producers and handlers should contact the FSA at their local [USDA Service Center](#). As part of completing the OCCSP application, producers and handlers will need to provide documentation of their organic certification and eligible expenses. Organic producers and handlers may also apply for OCCSP through participating state departments of agriculture.

FSA is also accepting applications from state departments of agriculture to administer OCCSP. FSA will post a synopsis of the funding opportunity on grants.gov and will send more information to all eligible state departments of agriculture. Additional details can be found on the [OCCSP webpage](#). More information about these initiatives and more can be found at [farmers.gov/organic-transition-initiative](#).

USDA Offers Assistance to Help Organic Dairy Producers Cover Increased Costs

ORGANIC DAIRY OPERATIONS

Certified organic dairy operations that market milk from dairy cows, dairy goats, or dairy sheep are eligible for assistance through ODMAP. Eligible dairy operations will provide their certification of organic status and will certify to their pounds of organic milk produced in 2022. ODMAP payments will be based on 2022 milk production.

APPLY NOW

Deadline to apply for ODMAP is July 26th 2023.

To learn more about eligibility and to apply, contact FSA.

USDA announced assistance for dairy producers with the new Organic Dairy Marketing Assistance Program (ODMAP). ODMAP is established to help mitigate market volatility, higher input and transportation costs, and unstable feed supply and prices that have created unique hardships in the organic dairy industry. Specifically, under the ODMAP, USDA's Farm Service Agency (FSA) is making \$104 million available to organic dairy operations to assist with projected marketing costs in 2023, calculated using their marketing costs in 2022.

FSA began accepting applications for ODMAP on May 24, 2023. Eligible producers include certified organic dairy operations that produce milk from cows, goats and sheep.

How ODMAP Works

FSA is providing financial assistance for a producer's projected marketing costs in 2023 based on their 2022 costs. ODMAP provides a one-time cost-share payment based on marketing costs on pounds of organic milk marketed in the 2022 calendar year. ODMAP provides financial assistance that will immediately support certified organic dairy operations during 2023 keeping organic dairy operations sustainable until markets return to more normal conditions.

How to Apply

FSA is accepting applications from May 24 to July 26, 2023. To apply, producers should contact FSA at their local [USDA Service Center](#). To complete the ODMAP application, producers must certify to pounds of 2022 milk production, show documentation of their organic certification, and submit a completed application form.

Organic dairy operations are required to provide their USDA certification of organic status confirming operation as an organic dairy in 2023 and 2022 along with the certification of 2022 milk production in hundredweight.

ODMAP complements other assistance available to dairy producers, including Dairy Margin Coverage (DMC) and Supplemental DMC, with more than \$300 million in benefits paid for the 2023 program year to date. Learn more on the [FSA Dairy Programs webpage](#).

WHAT'S NEW IN JUNE

USDA Announces Corrections to Emergency Relief Program Policy to More Accurately Reflect 2020 and 2021 Natural Disaster Impacts on Crops Intended for On-Farm Use

The U.S. Department of Agriculture (USDA) is updating the [Emergency Relief Program \(ERP\) Phase Two](#) to provide a method for valuing losses and accessing program benefits to eligible producers of certain crops, including grapes grown and used by the same producer for wine production or forage that is grown, stored and fed to livestock, that do not generate revenue directly from the sale of the crop. These updates ensure that ERP benefits are more reflective of these producers' actual crop losses resulting from 2020 and 2021 natural disaster events. USDA's Farm Service Agency (FSA) will begin accepting ERP Phase Two applications from eligible wine grape and forage producers once this technical correction to ERP is published in the Federal Register and becomes effective, which it anticipates will be on Friday, June 16, 2023. The deadline to submit applications for ERP Phase Two is July 14.

Background

In January 2023, FSA announced ERP Phase Two, designed to wrap-up and fill remaining gaps in previous natural disaster assistance for 2020 and 2021.

To be eligible for ERP Phase Two, producers must have suffered a decrease in allowable gross revenue in 2020 or 2021 due to necessary expenses related to losses of eligible crops from a qualifying natural disaster event. Assistance is primarily for producers of crops that were not covered by Federal Crop Insurance or the Noninsured Crop Disaster Assistance Program since crops covered by Federal Crop Insurance and NAP were included in the assistance under ERP Phase One administered in 2022.

Determining Crop Value

Producers of certain crops now have a method for including crop value in their allowable gross revenue for the purpose of determining ERP Phase 2 benefits.

The value of the eligible crop intended for on-farm use will be based on the producer's actual production of the crop and a price for the crop as determined by FSA's Deputy Administrator for Farm Programs based on the best available data for each crop such as published crop price data or the average price obtained by other producers in the area. Acceptable, published sources including but are not limited to Federal Crop Insurance Corporation established

prices, FSA established National Crop Table prices and National Agricultural Statistic Service prices.

[Revenue and pricing guidelines](#) for expected revenue for wine grapes and on-farm forage is available online for producer reference and convenience when applying for ERP Phase Two.

Wine grape and forage producers who have already submitted their ERP Phase Two applications to FSA have the option of revising the application and updating their allowable gross revenue to include crop value if applicable.

Producers of crops grown for on-farm use other than wine grapes and forage may request consideration to use a crop's value in their allowable gross revenue. Submit requests to RA.FSA.DCWA2.ppb@wdc.usda.gov. FSA's Deputy Administrator for Farm Programs will review submitted requests.

Additional Technical Corrections – Conservation Programs

In addition to emergency relief policy updates, FSA has also established policy corrections for the Emergency Conservation Program (ECP) and the Emergency Forest Restoration Program (EFRP). The policy correction clarifies that federal payments received for the same practice will be considered duplicative assistance for producers who receive ECP and EFRP program payments. The revised program provisions are related to program updates FSA announced in January that give more farmers, ranchers, and tribes the opportunity to apply for and access programs that support recovery following natural disasters (see [January 10, 2023 news release](#) for more information).

ECP and EFRP provide financial and technical assistance to restore conservation practices like fencing, damaged farmland or forests following natural disasters.

More Information

FSA offers an online [ERP tool](#) to help producers determine what is considered allowable gross revenue. Producers should contact their local FSA office to make an appointment to apply for ERP Phase Two. Producers should also keep in mind that July 15 is a major deadline to complete acreage reports for most crops. FSA encourages producers to complete the ERP Phase Two application and acreage report during the same office visit. Applications for the Pandemic Assistance Revenue Program, a revenue-based program for losses resulting from the pandemic, can also be completed. For more information, view the [ERP Phase Two Fact Sheet](#), [PARP Fact Sheet](#), the [ERP Phase Two-PARP Comparison Fact Sheet](#), [ERP Phase Two application video tutorial](#), [PARP application video tutorial](#), [myth-buster blog](#) or contact your local [USDA Service Center](#).

Gear Up for the 2023 Hurricane Season

Hurricane season is officially underway, and it lasts until November 30. The National Oceanic and Atmospheric Administration (NOAA) predicts that the 2023 hurricane season will be near normal in the Atlantic and produce 12 to 17 named storms, of which five to nine could become hurricanes, including one to four major hurricanes.

USDA is encouraging producers to take precautions to prepare and protect their family and agricultural operations.

1. **Develop an Emergency Plan** - Ensure your household and employees know your hurricane plan, including meeting points, emergency contact lists, and alternate evacuation routes in case infrastructure is damaged.
2. **Remove Debris and Secure Large Objects** - Clean out culverts, ditches, and other drainage areas, especially before and during peak hurricane season to reduce water damage. Most injuries to animals, people, or structures during a hurricane are caused by flying objects. To lessen the risk, minimize the presence of equipment, supplies, and debris that may become airborne during high winds or encountered in floodwaters.
3. **Secure Important Records and Documents**- Pre- and post-hurricane documentation is extremely important for insurance compensation and recovery assistance. You'll want to have thorough records of damages and losses sustained on your farm as well as documentation of your cleanup and recovery efforts.
 - It is critical to document inventory of farm buildings, vehicles, equipment, and livestock before a disaster occurs. Take photos, videos, or make written lists with descriptions. Keep copies of this inventory in multiple places: computer, off-site in a safe location, and on a cloud-based server where information is transmitted and saved weekly.
4. **Know Your Insurance Options**- Regularly review your insurance policies with your agent to be sure you have adequate coverage, including flood insurance, for your facilities, vehicles, farm buildings, crops and livestock. Note, there are limitations on how soon insurance coverage will take effect. Generally, insurance policies will not cover damage if the policy was not in place before a disaster.
5. **Gather Supplies** - Have drinking water, canned food, a generator, batteries, a flashlight, and fuel available in case you lose power. For widespread outages, credit and debit cards may not work, so have cash handy.
6. **Access Real-time Emergency Information**- Download the FEMA app for free on the App Store and Google Play for safety tips on what to do before, during, and after disasters. Subscribe to our [text message and email service](#) to receive real-time, local operational and recovery information from the Farm Service Agency, Natural Resources Conservation Service and Risk Management Agency.

On farmers.gov, the [Hurricane Webpage](#), [Disaster Assistance Discovery Tool](#), [Disaster-at-a-Glance fact sheet](#), and [Loan Assistance Tool](#) can help producers and landowners determine program or loan options. For assistance with a crop insurance claim, producers and landowners should contact their [crop insurance agent](#). For FSA and NRCS programs, they should contact their local [USDA Service Center](#).

FSA Now Accepting Nominations for Farmers and Ranchers to Serve on Local County Committees

The U.S. Department of Agriculture (USDA) is now accepting nominations for county committee members for elections that will occur later this year. Additionally, USDA's Farm Service Agency (FSA) is unveiling a new GIS tool to make it easier for producers to participate in the nomination and election processes for county committee members, who make important decisions on how federal farm programs are administered locally.

All nomination forms for the 2023 election must be postmarked or received in the local FSA office by Aug. 1, 2023.

Elections will occur in certain Local Administrative Areas (LAA) for members. LAAs are elective areas for FSA committees in a single county or multi-county jurisdiction and they may include LAAs that are focused on an urban or suburban area.

Customers can locate their LAA through a new GIS locator tool available at fsa.usda.gov/elections.

Agricultural producers may be nominated for candidacy for the county committee if they:

- Participate or cooperate in a USDA program; and
- Reside in the LAA that is up for election this year.

A cooperating producer is someone who has provided information about their farming or ranching operation to FSA, even if they have not applied or received program benefits. Individuals may nominate themselves or others and qualifying organizations may also nominate candidates. USDA encourages minority producers, women and beginning farmers or ranchers to nominate, vote and hold office.

Nationwide, more than 7,700 dedicated members of the agricultural community serve on FSA county committees. The committees are made up of three to 11 members who serve three-year terms. Committee members are vital to how FSA carries out disaster programs, as well as conservation, commodity and price support programs, county office employment and other agricultural issues.

More Information

Producers should contact their local FSA office today to register and find out how to get involved in their county's election, including if their LAA is up for election this year. To be considered, a producer must be registered and sign an [FSA-669A](#) nomination form. Nomination forms and other information about FSA county committee elections are available at fsa.usda.gov/elections.

Election ballots will be mailed to eligible voters beginning Nov. 6, 2023.

DATES TO REMEMBER

Deadlines

- July 10: Last day to apply for the [Rice Production Program](#)
- July 14: Deadline to apply for the [Emergency Relief Program \(ERP\) Phase Two and Pandemic Assistance Revenue Program \(PARP\)](#)
