Census of Agriculture Countdown Begins for America's Farmers and Ranchers

New farmers or existing farmers who have not participated in a prior Census of Agriculture have until June 30th to sign up to be counted.

America's farmers and ranchers will soon have the opportunity to strongly represent agriculture in their communities and industry by taking part in the 2017 Census of Agriculture. Conducted every five years by the U.S. Department of Agriculture's (USDA) National Agricultural Statistics Service (NASS), the census, to be mailed at the end of this year, is a complete count of all U.S. farms, ranches, and those who operate them.

The Census of Agriculture highlights land use and ownership, operator characteristics, production practices, income and

July 15: Acreage Reporting Deadline for Spring and Summer Seeded Crops

expenditures, and other topics. The 2012 Census of Agriculture revealed that over three million farmers operated more than two million farms, spanning over 914 million acres. This was a four percent decrease in the number of U.S. farms from the previous census in 2007. However, agriculture sales, income, and expenses increased between 2007 and 2012. This telling information and thousands of other agriculture statistics are a direct result of responses to the Census of Agriculture.

Producers who are new to farming or did not receive a Census of Agriculture in 2012 still have time to sign up to receive the 2017 Census of Agriculture report form by visiting www.agcensus.usda.gov and clicking on the 'Make Sure You Are Counted' button through June. NASS defines a farm as any place from which \$1,000 or more of agricultural products were produced and sold, or normally would have been sold, during the census year (2017).

Update Your Records

FSA is cleaning up our producer record database. If you have any unreported changes of address or zip code or an incorrect name or business name on file they need to be reported to our office.

Changes in your farm operation, like the addition of a farm by lease or purchase, need to be reported to our office as well. Producers participating in FSA and NRCS programs are required to timely report changes in their farming operation to the County Committee in writing and update their CCC-902 Farm Operating Plan.

If you have any updates or corrections, please call your local FSA office to update your records.

Producers are Encouraged to Report Prevented Planting and Failed Acres

USDA Farm Service Agency (FSA) reminds producers to report prevented planting and failed acres in order to establish or retain FSA program eligibility for some programs.

Producers should report crop acreage they intended to plant, but due to natural disaster, were prevented from planting. Prevented planting acreage must be reported on form CCC-576, Notice of Loss, no later than 15 calendar days after the final planting date as established by FSA and Risk Management Agency (RMA).

Contact your local FSA office for a list of final planting dates by crop.

If a producer is unable to report the prevented planting acreage within the 15 calendar days following the final planting date, a late-filed report can be submitted. Late-filed reports will only be accepted if FSA conducts a farm visit to assess the eligible disaster condition that prevented the crop from being planted. A measurement service fee will be charged.

Additionally, producers with failed acres should also use form CCC-576, Notice of Loss, to report failed acres.

Producers of hand-harvested crops must notify FSA of damage or loss through the administrative County Office within 72 hours of the date of damage or loss first becomes apparent. This notification

can be provided by filing a CCC-576, email, fax or phone. Producers who notify the County Office by any method other than by filing the CCC-576 are still required to file a CCC-576, Notice of Loss, within the required 15 calendar days.

For losses on crops covered by the Non-Insured Crop Disaster Assistance Program (NAP), producers must file a Notice of Loss within 15 days of the occurrence of the disaster or when losses become apparent. Producers must timely file a Notice of Loss for failed acres on all crops including grasses.

Payment Limitations by Program

The 2014 Farm Bill established a maximum dollar amount for each program that can be received annually, directly or indirectly, by each person or legal entity. Payment limitations vary by program for 2014 through 2018.

Below is an overview of payment limitations by program.

Commodity and Price Support Programs

The annual limitation for the Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) programs, Loan Deficiency Payments (LDPs) and Market Loan Gains is \$125,000 total.

Conservation Programs

The Conservation Reserve Program (CRP) annual rental payment and incentive payment is limited to \$50,000. CRP contracts approved before Oct. 1, 2008, may exceed the limitation, subject to payment limitation rules in effect on the date of contract approval.

The Emergency Conservation Program (ECP) has an annual limit of \$200,000 per disaster event. The Emergency Forest Restoration Program (EFRP) has an annual limit of \$500,000 per disaster event.

Disaster Assistance Programs

The annual limitation of \$125,000 applies to the Emergency Assistance for Livestock, Honeybees and Farm-Raised Fish Program (ELAP), Livestock Forage Disaster Program (LFP) and Livestock Indemnity Program (LIP). The total payments received under ELAP, LFP and LIP may not exceed \$125,000. A separate limitation of \$125,000 applies to Tree Assistance Program (TAP) payments. There is also a separate \$125,000 payment limit for the Noninsured Crop Disaster Assistance Program (NAP).

Payment limitations also apply to Natural Resources Conservation Service (NRCS) programs. Contact your local NRCS office more information.

For more information on FSA payment limitations by program, visit

https://www.fsa.usda.gov/Assets/USDA-FSA-Public/usdfiles/FactSheets/2015/payment_eligibility_payment_limitations.pdf.

Farm Storage Facility Loans

FSA's Farm Storage Facility Loan (FSFL) program provides low-interest financing to producers to build or upgrade storage facilities and to purchase portable (new or used) structures, equipment and storage and handling trucks.

The low-interest funds can be used to build or upgrade permanent facilities to store commodities. Eligible commodities include corn, grain sorghum, rice, soybeans, oats, peanuts, wheat, barley, minor oilseeds harvested as whole grain, pulse crops (lentils, chickpeas and dry peas), hay, honey, renewable biomass, fruits, nuts and vegetables for cold storage facilities, floriculture, hops, maple sap, rye, milk, cheese, butter, yogurt, meat and poultry (unprocessed), eggs, and aquaculture

(excluding systems that maintain live animals through uptake and discharge of water). Qualified facilities include grain bins, hay barns and cold storage facilities for eligible commodities.

Loans up to \$50,000 can be secured by a promissory note/security agreement and loans exceeding \$50,000 require additional security.

Producers do not need to demonstrate the lack of commercial credit availability to apply. The loans are designed to assist a diverse range of farming operations, including small and mid-sized businesses, new farmers, operations supplying local food and farmers markets, non-traditional farm products, and underserved producers.

To learn more about the FSA Farm Storage Facility Loan, visit www.fsa.usda.gov/pricesupport or contact your local FSA county office. To find your local FSA county office, visit <http://offices.usda.gov>.

USDA Announces Additional Financial Incentives for Conservation Reserve Program Participants to Improve Forest Health and Enhance Wildlife Habitat

In an effort to improve wildlife habitat and the health of private forest lands, the U.S. Department of Agriculture (USDA) Farm Service Agency (FSA) announced additional incentives available for Conservation Reserve Program (CRP) participants to actively manage forest lands enrolled in the program.

Under the provisions of the 2014 Farm Bill, \$10 million is available nationwide to eligible CRP participants. Those selected will be encouraged to thin, prescribe burn or otherwise manage their forests in order to allow sunlight to reach the forest floor. This will encourage the development of grasses, forbs and legumes, benefitting numerous species including pollinators and grassland-dependent birds such as the northern bobwhite.

Eligibility is limited to landowners and agricultural producers already enrolled in CRP with conservation covers primarily containing trees. Incentive payments, not to exceed 150 percent of the cost to implement a particular customary forestry activity as described, have been established. CRP participants meeting eligibility requirements and interested in making offers to participate should visit their local FSA county office.

For more information about FSA conservation programs, visit the FSA office at the local USDA service center or go to www.fsa.usda.gov/conservation.

USDA Financial Assistance Available to Help Organic Farmers Create Conservation Buffers

USDA is assisting organic farmers with the cost of establishing up to 20,000 acres of new conservation buffers and other practices on and near farms that produce organic crops.

The financial assistance is available from the USDA Conservation Reserve Program (CRP), a federally funded voluntary program that contracts with agricultural producers so that environmentally sensitive land is not farmed or ranched, but instead used for conservation benefits. CRP participants establish long-term, resource-conserving plant species, such as approved grasses or trees (known as “covers”) to control soil erosion, improve water quality and develop wildlife habitat. In return, FSA provides participants with rental payments and cost-share assistance. Contract duration is between 10 and 15 years.

For conservation buffers, funds are available for establishing shrubs and trees, or supporting pollinating species, and can be planted in blocks or strips. Interested organic producers can offer eligible land for enrollment in this initiative at any time.

Other USDA FSA programs that assist organic farmers include:

- The Noninsured Crop Disaster Assistance Program that provides financial assistance for 55 to 100 percent of the average market price for organic crop losses between 50 to 65 percent of expected production due to a natural disaster.
- Marketing assistance loans that provide interim financing to help producers meet cash flow needs without having to sell crops during harvest when market prices are low, and deficiency payments to producers who forgo the loan in return for a payment on the eligible commodity.
- A variety of loans for operating expenses, ownership or guarantees with outside lenders, including streamlined microloans that have a lower amount of paperwork.
- Farm Storage Facility Loans for that provide low-interest financing to build or upgrade storage facilities for organic commodities, including cold storage, grain bins, bulk tanks and drying and handling equipment.
- Services such as mapping farm and field boundaries and reporting organic acreage that can be provided to a farm's organic certifier or crop insurance agent.

Visit www.fsa.usda.gov/organic to learn more about how FSA can help organic farmers. For an interactive tour of CRP success stories, visit www.fsa.usda.gov/CRPis30 or follow #CRPis30 on Twitter. To learn more about FSA programs visit a local FSA office or www.fsa.usda.gov. To find your local FSA office, visit <http://offices.usda.gov>.

Supervised Credit

Farm Service Agency (FSA) Farm Loan programs are considered supervised credit. Unlike loans from a commercial lender, FSA loans are intended to be temporary in nature. Therefore, it is our goal to help you graduate to commercial credit, and our farm loan staff is available to help borrowers through training and credit counseling.

The FSA team will help borrowers identify their goals to ensure financial success. Through this process, FSA staff will advise borrowers in developing strategies and a plan to meet your operation's goals and graduate to commercial credit. Ultimately, the borrower is responsible for the success of the farming operation, but FSA's staff will help in an advisory role to provide the tools necessary to help you achieve your operational goals and manage your finances.

For more information on FSA farm loan programs, visit www.fsa.usda.gov.

Guaranteed Loan Program

FSA guaranteed loans allow lenders to provide agricultural credit to farmers who do not meet the lender's normal underwriting criteria. Farmers and ranchers apply for a guaranteed loan through a lender, and the lender arranges for the guarantee. FSA can guarantee up to 95 percent of the loss of principal and interest on a loan. Guaranteed loans can be used for both farm ownership and operating purposes.

Guaranteed farm ownership loans can be used to purchase farmland, construct or repair buildings, develop farmland to promote soil and water conservation or to refinance debt.

Guaranteed operating loans can be used to purchase livestock, farm equipment, feed, seed, fuel, farm chemicals, insurance and other operating expenses.

FSA can guarantee farm ownership and operating loans up to \$1,399,000. Repayment terms vary depending on the type of loan, collateral and the producer's ability to repay the loan. Operating loans are normally repaid within seven years and farm ownership loans are not to exceed 40 years.

Please contact your lender or local FSA farm loan office for more information on guaranteed loans.

Farmers to Receive Documentation of USDA Services

Farm Service Agency (FSA) reminds agricultural producers that FSA provides a receipt to customers who request or receive assistance or information on FSA programs.

The 2014 Farm Bill requires a customer receipt to be issued for any agricultural program assistance requested from FSA, the Natural Resources Conservation Service (NRCS) and Rural Development (RD). Receipts include the date, summary of the visit and any agricultural information, program and/or loan assistance provided to an individual or entity. Electronic receipts for acreage reports began on Aug. 1, 2016.

A service is any information, program or loan assistance provided whether through a visit, email, fax or letter.
