## June Outreach Notes

June is a busy month for Mountain State Farmers.

- Vegetable and Specialty Crop Farmers are busy tending their spring planted crops and awaiting their first harvests
- Crop Farmers are busy finishing planting corn and soybeans
- Livestock and Forage Producers are busy harvesting hay and managing pastures

Here at the Farm Service Agency, we are busy assisting you.

- Commodity and specialty crop producers impacted by natural disaster events in 2020 and 2021 will soon begin receiving emergency relief payments totaling approximately \$6 billion through the Farm Service Agency's (FSA) new [Emergency Relief Program \(ERP\)](#) to offset crop yield and value losses.
- Assisting West Virginia's 38,123 producers to complete their Crop Reports.  
If you want to participate in many USDA programs, including crop insurance, safety net, and disaster assistance programs, you must file timely acreage reports to remain eligible for program benefits. Filing an accurate and timely acreage report for all crops and land uses, including failed acreage and prevented planted acreage, can prevent the loss of benefits.
- Farm Loans  
The Farm Service Agency offers loans to help farmers and ranchers get the financing they need to start, expand or maintain a family farm.

Throughout the summer we will be joining you at local fairs and farm field days sharing how FSA can assist you in reaching your goals. If you see us out, please take a moment to stop and talk with us.

---

## Top 6 Emergency Relief Program Checklist Items for Eligible Farmers

FSA recently began mailing 303,000 pre-filled applications for the Emergency Relief Program (ERP), a new program designed to help agricultural producers impacted by wildfires, droughts, hurricanes, winter storms, and other qualifying natural disasters experienced during calendar years 2020 and 2021.

The past few years have been tough to say the least. As producers have dealt with the continued impacts of the COVID-19 pandemic, they have also struggled to recover from more frequent, more intense natural disasters. I am grateful that Congress passed, and President Biden signed into law the *Extending Government Funding and Delivering Emergency Assistance Act* (P.L. 117-43), which includes \$10 billion in critical emergency relief.

After extensive stakeholder outreach, including with producers and groups that have not always been included in USDA programs, our team began work developing a responsive, easier-to-access program that could be rolled out in phases. We're now rolling out the first phase of ERP, which uses existing [Federal Crop Insurance](#) or [Noninsured Crop Disaster Assistance Program](#) (NAP) data as the basis for calculating initial payments.

By leveraging existing data, we will be able to deliver approximately \$6 billion in assistance on a faster timeline; at the same time, my team and I are committed to ensuring that producers who do not have existing data on file with USDA are captured in the second phase of ERP, which will be explicitly focused on filling gaps in previously implemented emergency assistance.

To apply for ERP Phase 1, here's what you need to do:

### 1. **Check Your Mailbox**

The form being mailed to you includes eligibility requirements, outlines the application process, and provides estimated ERP payment calculations. Producers will receive a separate application form for each program year in which an eligible loss occurred. Receipt of a pre-filled application is not confirmation that a producer is eligible to receive an ERP phase one payment. This application takes about 0.176 hours (that's less than 15 minutes) for producers to complete, compared to the former Wildfire and Hurricane

Indemnity Program – Plus application which took several hours for producers to complete and even longer for FSA staff.

The deadline to return completed ERP applications to FSA is **Friday, July 22, 2022**. *If you have NAP coverage, you will receive pre-filled ERP applications later this summer. Details on ERP Phase 2 will be forthcoming as well.*

## **2. Check Your Eligibility**

ERP covers losses to crops, trees, bushes, and vines due to a qualifying natural disaster event in calendar years 2020 and 2021. Eligible crops include all crops for which crop insurance or NAP coverage was available, except for crops intended for grazing. Qualifying natural disaster events include wildfires, hurricanes, floods, derechos, excessive heat, winter storms, freeze (including a polar vortex), smoke exposure, excessive moisture, qualifying drought\*, and related conditions.

*\*Lists of [2020](#) and [2021](#) drought counties eligible for ERP are available online.*

## **3. Check Required Forms on File with FSA**

**Producers must have the following forms on file with FSA:**

- Form AD-2047, *Customer Data Worksheet*.
- Form CCC-902, *Farm Operating Plan* for an individual or legal entity.
- Form CCC-901, *Member Information for Legal Entities*(if applicable).
- Form FSA-510, *Request for an Exception to the \$125,000 Payment Limitation for Certain Programs*(if applicable).
- A highly erodible land conservation (sometimes referred to as HELC) and wetland conservation certification (Form AD-1026 *Highly Erodible Land Conservation (HELIC) and Wetland Conservation (WC) Certification*) for the ERP producer and applicable affiliates.

*If you have previously participated in FSA programs, you will likely have these required forms on file. However, if you're uncertain or want to confirm the status of your forms, contact your [local FSA county office](#).*

## **4. Check Historically Underserved Status with FSA, If Applicable**

The ERP payment percentage for historically underserved producers, including beginning, limited resource, socially disadvantaged, and veteran farmers, and ranchers will be increased by 15% of the calculated ERP payment.

To qualify for the higher payment percentage, eligible producers must have the following form on file with FSA:

- Form CCC-860, *Socially Disadvantaged, Limited Resource, Beginning and Veteran Farmer or Rancher Certification*.

#### **5. Check Your Future Insurance Coverage**

All producers who receive ERP phase one payments are statutorily required to purchase crop insurance, or NAP coverage where crop insurance is not available, for the next two available crop years, as determined by the Secretary.

Coverage requirements will be determined from the date a producer receives an ERP payment and may vary depending on the timing and availability of crop insurance or NAP for a producer's particular crops. The final crop year to purchase crop insurance or NAP coverage to meet the second year of coverage for this requirement is the 2026 crop year.

#### **6. Check Your bank**

Once the completed ERP application for payment is submitted to and signed by FSA, producers who have direct deposit should look for payment within three business days.

### **More Information**

We have additional resources, including:

- [ERP May 16, 2022 New Release](#)
- [ERP Fact Sheet](#)
- [Answers to Frequently Asked Questions \(FAQs\)](#)
- [Emergency Relief Webpage](#)
- [ERP Notice of Funding Availability](#)

In addition to ERP, FSA is also implementing the first phase of the new Emergency Livestock Relief Program. At this time, FSA has made more than \$588 million in payments to impacted livestock producers.

Bottom line, we take your feedback seriously, and we wanted to deliver this relief as soon as possible. We learned from previous relief programs, and we're excited to be getting this to you as swiftly as we can.

# USDA Reminds Producers to File Crop Acreage Reports

Agricultural producers who have not yet completed their [crop acreage reports](#) after spring planting should make an appointment with their local West Virginia Farm Service Agency (FSA) office before the applicable deadline.

An acreage report documents a crop grown on a farm or ranch and its intended uses. Filing an accurate and timely acreage report for all crops and land uses, including failed acreage and prevented planted acreage, can prevent the loss of benefits.

## How to File a Report

The following acreage reporting dates are applicable for West Virginia:

June 15, 2022            All Crops and Perennial forages

July 31, 2022            Hemp

Service Center staff continue to work with agricultural producers via phone, email, and other digital tools. Because of the pandemic, some [USDA Service Centers](#) are open to limited visitors. Contact your local County FSA office to set up an in-person or phone appointment.

To file a crop acreage report, you will need to provide:

- Crop and crop type or variety.
- Intended use of the crop.
- Number of acres of the crop.
- Map with approximate boundaries for the crop.
- Planting date(s).
- Planting pattern, when applicable.
- Producer shares.
- Irrigation practice(s).
- Acreage prevented from planting, when applicable.
- Other information as required.

## Acreage Reporting Details

The following exceptions apply to acreage reporting dates:

- If the crop has not been planted by the acreage reporting date, then the acreage must be reported no later than 15 calendar days after planting is completed.
  - 
  - If a producer acquires additional acreage after the acreage reporting date, then the acreage must be reported no later than 30 calendar days after purchase or acquiring the lease. Appropriate documentation must be provided to the county office.

Producers should also report crop acreage they intended to plant, but due to natural disaster, were unable to plant. Prevented planting acreage must be reported on form CCC-576, Notice of Loss, no later than 15 calendar days after the final planting date as established by FSA and USDA's Risk Management Agency.

Noninsured Crop Disaster Assistance Program (NAP) policy holders should note that the acreage reporting date for NAP-covered crops is the earlier of the dates listed above or 15 calendar days before grazing or harvesting of the crop begins.

---

## USDA Supports Military Veteran's Transition to Farming

Are you a military veteran interested in farming? USDA offers resources to help you:

- **Fund Your Operation:** USDA's Farm Service Agency offers a variety of [funding opportunities](#) to help agricultural producers finance their businesses. Certain funds are targeted for veterans and beginning farmers and ranchers.
- **Conserve Natural Resources:** USDA's Natural Resources Conservation Service offers [conservation programs and expert one-on-one technical assistance](#) to strengthen agricultural operations now and into the future. Veterans may be eligible for a cost share of up to 90 percent and advance payments of up to 50 percent to cover certain conservation practices.
- **Manage Risks:** USDA is here to help you prepare for and recover from the unexpected. Veterans who are beginning farmers may be eligible for reduced

premiums, application fee waivers, increased insurance coverage, and other incentives for multiple [USDA programs that support risk management](#).

USDA wants to ensure that veterans transitioning to agriculture have the resources needed to succeed. While USDA offices are currently closed to visitors because of the pandemic, Service Center staff continue to work with agricultural producers via phone, email, and other digital tools. To conduct business, please contact your local USDA Service Center. Additionally, more information related to USDA's response and relief for producers can be found at [farmers.gov/coronavirus](https://farmers.gov/coronavirus). If you're a new farmer, you can also reach out to your [state Beginning Farmer and Rancher Coordinator](#).

## Farmers.gov Feature Helps Producers Find Farm Loans that Fit Their Operation

Farmers and ranchers can use the *Farm Loan Discovery Tool* on [farmers.gov](https://farmers.gov) to find information on USDA farm loans that may best fit their operations.

USDA's Farm Service Agency (FSA) offers a variety of loan options to help farmers finance their operations. From buying land to financing the purchase of equipment, FSA loans can help.

USDA conducted field research in eight states, gathering input from farmers and FSA farm loan staff to better understand their needs and challenges.

### How the Tool Works

Farmers who are looking for financing options to operate a farm or buy land can answer a few simple questions about what they are looking to fund and how much money they need to borrow. After submitting their answers, farmers will receive information on farm loans that best fit their specific needs. The loan application and additional resources also will be provided.

Farmers can download application quick guides that outline what to expect from preparing an application to receiving a loan decision. There are four guides that cover loans to individuals, entities, and youth, as well as information on microloans. The guides include general eligibility requirements and a list of required forms and documentation for each type of loan. These guides can help farmers prepare before their first USDA service center visit with a loan officer.

Farmers can access the *Farm Loan Discovery Tool* by visiting [farmers.gov/fund](https://farmers.gov/fund) and clicking the “Start” button. Follow the prompts and answer five simple questions to receive loan information that is applicable to your agricultural operation. The tool is built to run on any modern browser like Chrome, Edge, Firefox, or the Safari browser, and is fully functional on mobile devices. It does not work in Internet Explorer.

### **About Farmers.gov**

In 2018, USDA unveiled farmers.gov, a dynamic, mobile-friendly public website combined with an authenticated portal where farmers will be able to apply for programs, process transactions, and manage accounts.

The *Farm Loan Discovery Tool* is one of many resources on farmers.gov to help connect farmers to information that can help their operations. Earlier this year, USDA launched the *My Financial Information* feature, which enables farmers to view their loan information, history, payments, and alerts by logging into the website.

USDA is building farmers.gov for farmers, by farmers. In addition to the interactive farm loan features, the site also offers a Disaster Assistance Discovery Tool. Farmers can visit [farmers.gov/recover/disaster-assistance-tool#step-1](https://farmers.gov/recover/disaster-assistance-tool#step-1) to find disaster assistance programs that can help their operation recover from natural disasters.

For more information, contact your local USDA Service Center or visit [farmers.gov](https://farmers.gov).
