Staci's Corner

Monday, July 17th is the DEADLINE for the 2023 Spring Crop Acreage Reporting. If you miss this deadline, you run the risk of paying late filing fees and possibly not being eligible for other programs. FSA uses the FSA-578 Producer Print, which is your report of all the acres you own and/or lease, to maintain your eligibility for FSA and NRCS programs alike.

July 22-29 the 4-H and FFA kids will get the opportunity to show their animals and skills at the 2023 Crook County Fair here in Sundance. Good Luck to all of you!

IMPORTANT DATES

July 14th – DEADLINE to sign up for ERP Phase II and PARP

July 17th – DEADLINE for Spring Crop Acreage Reporting

August 1st – LAA 2 COC Nominations Due

September 4th – Office CLOSED for Labor Day

If you have any questions about programs, or anything really, please contact our office Monday through Friday between 8am and 4:30pm.

Very Sincerely,
Staci

USDA Announces Corrections to Emergency Relief Program Policy to More Accurately Reflect 2020 and 2021 Natural Disaster Impacts on Crops Intended for On-Farm Use

USDA updated the [Emergency Relief Program \(ERP\) Phase Two](#) to provide a method for valuing losses and accessing program benefits to eligible producers of certain crops, including grapes grown and used by the same producer for wine production or forage that is grown, stored and fed to livestock, that do not generate revenue directly from the sale of the crop. These updates ensure that ERP benefits are more reflective of these producers' actual crop losses resulting from 2020 and 2021 natural disaster events. USDA's Farm Service Agency (FSA) will begin accepting ERP Phase Two applications from eligible wine grape and forage producers once this technical correction to ERP is published in the Federal Register and becomes effective, which it anticipates will be on Friday, June 16, 2023. **The deadline to submit applications for ERP Phase Two is July 14.**

Background

In January 2023, FSA announced ERP Phase Two, designed to wrap-up and fill remaining gaps in previous natural disaster assistance for 2020 and 2021.

To be eligible for ERP Phase Two, producers must have suffered a decrease in allowable gross revenue in 2020 or 2021 due to necessary expenses related to losses of eligible crops from a qualifying natural disaster event. Assistance is primarily for producers of crops that were not covered by Federal Crop Insurance or the Noninsured Crop Disaster Assistance Program since crops covered by Federal Crop Insurance and NAP were included in the assistance under ERP Phase One administered in 2022.

Determining Crop Value

Producers of certain crops now have a method for including crop value in their allowable gross revenue for the purpose of determining ERP Phase 2 benefits.

The value of the eligible crop intended for on-farm use will be based on the producer's actual production of the crop and a price for the crop as determined by FSA's Deputy Administrator for Farm Programs based on the best available data for each crop such as published crop price data or the average price obtained by other producers in the area. Acceptable, published sources including but are not limited to Federal Crop Insurance Corporation established prices, FSA established National Crop Table prices and National Agricultural Statistic Service prices.

[Revenue and pricing guidelines](#) for expected revenue for wine grapes and on-farm forage is available online for producer reference and convenience when applying for ERP Phase Two.

Wine grape and forage producers who have already submitted their ERP Phase Two applications to FSA have the option of revising the application and updating their allowable gross revenue to include crop value if applicable.

Producers of crops grown for on-farm use other than wine grapes and forage may request consideration to use a crop's value in their allowable gross revenue. Submit requests to RA.FSA.DCWA2.ppb@wdc.usda.gov. FSA's Deputy Administrator for Farm Programs will review submitted requests.

Additional Technical Corrections – Conservation Programs

In addition to emergency relief policy updates, FSA has also established policy corrections for the Emergency Conservation Program (ECP) and the Emergency Forest Restoration Program (EFRP). The policy correction clarifies that federal payments received for the same practice will be considered duplicative assistance for producers who receive ECP and EFRP program payments. The revised program provisions are related to program updates FSA announced in January that give more farmers, ranchers, and tribes the opportunity to apply for and access programs that support recovery following natural disasters (see [January 10, 2023 news release](#) for more information).

ECP and EFRP provide financial and technical assistance to restore conservation practices like fencing, damaged farmland or forests following natural disasters.

More Information

FSA offers an online [ERP tool](#) to help producers determine what is considered allowable gross revenue..

Producers should contact their local FSA office to make an appointment to apply for ERP Phase Two. Producers should also keep in mind that July 15 is a major deadline to complete acreage reports for most crops. FSA encourages producers to complete the ERP Phase Two application and acreage report during the same office visit. Applications for the Pandemic Assistance Revenue Program, a revenue-based program for losses resulting from the pandemic, can also be completed. For more information, view the [ERP Phase Two Fact Sheet](#), [PARP Fact Sheet](#), the [ERP Phase Two-PARP Comparison Fact Sheet](#), [ERP Phase Two application video tutorial](#), [PARP application video tutorial](#), [myth-buster blog](#) or contact your local [USDA Service Center](#).

Is the Noninsured Crop Disaster Assistance Program Right for You?

Farmers and ranchers rely on crop insurance to protect themselves from disasters and unforeseen events, but not all crops are insurable through the USDA's Risk Management Agency. The Farm Service Agency's (FSA) Noninsured Crop Disaster Assistance Program (NAP) provides producers another option to obtain coverage against disaster for these crops. NAP provides financial assistance to producers of non-insurable crops impacted by natural disasters that result in lower yields, crop losses, or prevents crop planting.

Commercially produced crops and agricultural commodities for which crop insurance is not available are generally eligible for NAP. Eligible crops include those grown specifically for food, fiber, livestock consumption, biofuel or biobased products, or value loss crops such as aquaculture, Christmas trees, ornamental nursery, and others. Contact your local FSA office to see which crops are eligible in your state and county.

Eligible causes of loss include drought, freeze, hail, excessive moisture, excessive wind or hurricanes, earthquake and flood. These events must occur during the NAP policy coverage period, before or during harvest, and the disaster must directly affect the eligible crop. For guidance on causes of loss not listed, contact your local FSA county office.

Interested producers apply for NAP coverage using FSA form [CCC-471](#), "Application for Coverage," and pay the applicable service fee at the FSA office where their farm records are maintained. These must be filed by the application closing date, which varies by crop. Contact your local FSA office to verify application closing dates and ensure coverage for eligible NAP crops.

At the time of application, each producer acknowledges they have received the [NAP Basic Provisions](#), which describes NAP requirements for coverage. NAP participants must report crop acreage shortly after planting and provide verifiable or reliable crop production records when required by FSA.

Producers are required to pay service fees which vary depending on the number of crops and number of counties your operation is located in. The NAP service fee is the lesser of \$325 per crop or \$825 per producer per administrative county, not to exceed a total of \$1,950 for a producer with farming interests in multiple counties. Premiums also apply when producers elect higher levels of coverage with a maximum premium of \$15,750 per person or legal entity.

A producer's certification on Form CCC-860 *Socially Disadvantaged, Limited Resource, Beginning and Veteran Farmer or Rancher Certification* may serve as an application for basic NAP coverage for all eligible crops beginning with crop year 2022. These producers will have all NAP-related service fees for basic coverage waived, in addition to a 50 percent premium reduction if higher levels of coverage are elected.

For more detailed information on NAP, download the [NAP Fact Sheet](#). To get started with NAP, we recommend you contact your [local USDA service center](#).

Applying for Farm Storage Facility Loans

The Farm Service Agency's (FSA) Farm Storage Facility Loan (FSFL) program provides low-interest financing to help you build or upgrade storage facilities and to purchase portable (new or used) structures, equipment and storage and handling trucks.

Eligible commodities include corn, grain sorghum, rice, soybeans, oats, peanuts, wheat, barley, minor oilseeds harvested as whole grain, pulse crops (lentils, chickpeas and dry peas), hay, honey, renewable biomass, fruits, nuts and vegetables for cold storage facilities, floriculture, hops, maple sap, rye, milk, cheese, butter, yogurt, meat and poultry (unprocessed),

eggs, and aquaculture (excluding systems that maintain live animals through uptake and discharge of water). Qualified facilities include grain bins, hay barns and cold storage facilities for eligible commodities.

Loans up to \$50,000 can be secured by a promissory note/security agreement, loans between \$50,000 and \$100,000 may require additional security, and loans exceeding \$100,000 require additional security.

You do not need to demonstrate the lack of commercial credit availability to apply. The loans are designed to assist a diverse range of farming operations, including small and mid-sized businesses, new farmers, operations supplying local food and farmers markets, non-traditional farm products, and underserved producers.

For more information, contact your Crook County USDA Service Center at (307) 283-2870 ext. 2 or visit fsa.usda.gov/pricesupport.

Cover Crop Guidelines

The Farm Service Agency (FSA), Natural Resources Conservation Service (NRCS) and Risk Management Agency (RMA) worked together to develop consistent, simple and a flexible policy for cover crop practices.

Cover crops, such as grasses, legumes and forbs, can be planted: with no subsequent crop planted, before a subsequent crop, after prevented planting acreage, after a planted crop, or into a standing crop.

Termination:

The cover crop termination guidelines provide the timeline for terminating cover crops, are based on zones and apply to non-irrigated cropland. To view the zones and additional guidelines visit nrcs.usda.gov/wps/portal/nrcs/main/national/landuse/crops/ and click "Cover Crop Termination Guidelines."

The cover crop may be terminated by natural causes, such as frost, or intentionally terminated through chemical application, crimping, rolling, tillage or cutting. A cover crop managed and terminated according to NRCS Cover Crop Termination Guidelines is **not** considered a crop for crop insurance purposes.

Reporting:

The intended use of cover only will be used to report cover crops. This includes crops

that were terminated by tillage and reported with an intended use code of green manure. An FSA policy change will allow cover crops to be hayed and grazed. Program eligibility for the cover crop that is being hayed or grazed will be determined by each specific program.

If the crop reported as cover only is harvested for any use other than forage or grazing and is not terminated properly, then that crop will no longer be considered a cover crop.

Crops reported with an intended use of cover only will not count toward the total cropland on the farm. In these situations, a subsequent crop will be reported to account for all cropland on the farm.
