USDA Extends Deadline for Underserved Producers to Receive Additional Pandemic Assistance

The U.S. Department of Agriculture (USDA) has issued nearly \$290.5 million in top-up payments through the Coronavirus Food Assistance Program 2 (CFAP) to nearly 172,000 underserved producers. USDA's Farm Service Agency (FSA) will continue to issue payments to underserved producers who participated in CFAP 2 and are certified as underserved producers.

Producers without form CCC-860, *Socially Disadvantaged, Limited Resource, Beginning and Veteran Farmer or Rancher Certification*, on file can submit by **March 31, 2023**, to receive the top-up payment. This is an extension from the Feb. 10, 2023, deadline. Contact your local [USDA Service Center](#) for more information.

The top-up payment is part of a broader effort by the Biden-Harris administration to better reach agricultural producers and industries impacted by COVID-19 market disruptions by providing a holistic, inclusive approach to pandemic assistance.

Keeping Livestock Inventory Records

Livestock inventory records are necessary in the event of a natural disaster, so remember to keep them updated.

When disasters strike, the USDA Farm Service Agency (FSA) can help you if you've suffered excessive livestock death losses and grazing or feed losses due to eligible natural disasters.

To participate in livestock disaster assistance programs, you'll be required to provide verifiable documentation of death losses resulting from an eligible adverse weather event and must submit a notice of loss to your local FSA office within 30 calendar days of when the loss of livestock is apparent. For grazing or feed losses, you must submit a notice of loss to your local FSA office within 30 calendar days of when the loss is apparent and should maintain documentation and receipts.

You should record all pertinent information regarding livestock inventory records including:

- Documentation of the number, kind, type, and weight range of livestock
- Beginning inventory supported by birth recordings or purchase receipts.

For more information on documentation requirements, contact your Natrona County USDA Service Center at 307-261-5436 ex2 or visit fsa.usda.gov.

USDA Announces Availability of Inflation Reduction Act Funding for Climate-Smart Agriculture

USDA is making funding available for agricultural producers and forest landowners nationwide to participate in voluntary conservation programs and adopt climate-smart practices. The [Inflation Reduction Act](#) (IRA) provided an additional \$19.5 billion over five years for climate smart agriculture through several of the conservation programs that USDA's Natural Resources Conservation Service (NRCS) implements. NRCS is making available \$850 million in fiscal year 2023 for its oversubscribed conservation programs: the Environmental Quality Incentives Program (EQIP), Conservation Stewardship Program (CSP), Agricultural Conservation Easement Program (ACEP) and Regional Conservation Partnership Program (RCPP). The IRA funding includes an additional \$8.45 billion for EQIP, \$4.95 billion for RCPP, \$3.25 billion for CSP, and \$1.4 billion for ACEP. The increased funding levels begin in fiscal year 2023 and rapidly build over four years. These additional investments are estimated to help hundreds of thousands of farmers and ranchers apply conservation to millions of acres of land. Additionally, the IRA provides \$300 million to quantify carbon sequestration and greenhouse gases (GHG) through the collection and use of field-based data to assess conservation outcomes. Information gained through this effort will be used to improve practices and technical assistance to customers. Further guidance on this important work will be provided as the implementation of this portion of the IRA continues. These funds will provide direct climate mitigation benefits and will expand access to financial and technical assistance for producers to advance conservation on their farm, ranch or forest land through practices like cover cropping, conservation tillage, wetland restoration, prescribed grazing, nutrient management, tree planting and more. To ensure we can quantify the benefits of these IRA investments, NRCS is working to support Department-wide work on Measurement, Monitoring, Reporting and Verification (MMRV). The IRA provided targeted funding to support this effort. In administering the Inflation Reduction Act climate investments, USDA will also support other environmental co-benefits, including – among other things – water conservation, wildlife habitat improvements, and reducing runoff.

Private landowners can apply to participate in IRA projects at their local [USDA service center](#).

Communication is Key in Lending

Farm Service Agency (FSA) is committed to providing our farm loan borrowers the tools necessary to be successful. FSA staff will provide guidance and counsel from the loan application process through the borrower's graduation to commercial credit. While it is FSA's commitment to advise borrowers as they identify goals and evaluate progress, it is crucial for borrowers to communicate with their farm loan staff when changes occur. It is the borrower's responsibility to alert FSA to any of the following:

- Any proposed or significant changes in the farming operation
- Any significant changes to family income or expenses
- The development of problem situations
- Any losses or proposed significant changes in security

If a farm loan borrower can't make payments to suppliers, other creditors, or FSA on time, contact your farm loan staff immediately to discuss loan servicing options.

For more information on FSA farm loan programs, contact the Platte County USDA Service Center at 307-322-4050 X2 or visit [fsa.usda.gov](#).
