## Acreage Reports

In order to maintain program eligibility and benefits, you must timely file acreage reports. Failure to file an acreage report by the crop acreage reporting deadline may result in ineligibility for future program benefits. FSA will not accept acreage reports provided more than a year after the acreage reporting deadline.

**Reporting Grazing Allotments:** FSA offices can now accept acreage reports for grazing allotments. You will use form "FSA-578" to report grazing allotments as animal unit months (AUMs) using the "Reporting Unit" field. Your local FSA office will need the grazing period start and end date and the percent of public land.

### Definitions of Terms

FSA defines "idle" as cropland or a balance of cropland within a Common Land Unit (CLU) (field/subfield) which is not planted or considered not planted and does not meet the definition of fallow or skip row.

Fallow is considered unplanted cropland acres which are part of a crop/fallow rotation where cultivated land that is normally planted is purposely kept out of production during a regular growing season.

For more information on documentation requirements, contact your Platte County USDA Service Center at 307-322-4050 or visit [fsa.usda.gov](https://fsa.usda.gov).

## Signup for Pandemic Assistance Revenue Program

The Pandemic Assistance Revenue Program (PARP) will assist eligible producers of agricultural commodities who experienced revenue decreases in calendar year 2020 compared to 2018 or 2019 due to the COVID-19 pandemic. PARP will help address gaps in previous pandemic assistance, which was targeted at price loss or lack of market access, rather than overall revenue losses.

USDA's Farm Service Agency will accept PARP applications from January 23, 2023, through June 2, 2023. **Just extended to July 14, 2023**

### Eligible and Ineligible Commodities

For PARP, eligible agricultural commodities include crops, aquaculture, livestock, livestock byproducts, or other animals or animal byproducts that are produced as part of a farming operation and are intended to be commercially marketed. This includes only commodities produced in the United States or those produced outside the United States by a producer located in the United States and marketed inside the United States.

The following commodities **are not eligible** for PARP:

- Wild free-roaming animals.
- Horses and other animals used or intended to be used for racing or wagering.
- Aquatic species that do not meet the definition of aquaculture.
- *Cannabis sativa L.* and any part of that plant that does not meet the definition of hemp.
- Timber.

### Program Eligibility

PARP payments will be made on a whole-farm basis, not commodity-by-commodity. To be eligible for PARP, an agricultural producer must have been in the business of farming during at least part of the 2020 calendar year and must have experienced a 15 percent decrease in allowable gross revenue in 2020, as compared to either:

- The 2018 or 2019 **calendar year**, as elected by the producer, if they received allowable gross revenue during the 2018 or 2019 **calendar years**, or
- The producer's expected 2020 calendar year allowable gross revenue, if the producer had no allowable gross revenue in 2018 or 2019.

PARP payments will be issued after the application period ends on June 2, 2023.

For more information on determining allowable gross revenue visit [farmers.gov/coronavirus/pandemic-assistance/parp](https://farmers.gov/coronavirus/pandemic-assistance/parp) or review the [PARP fact sheet](#).

### More Information

To apply for PARP, contact your [local USDA Service Center](#).

## Farmers.gov Feature Helps Producers Find Farm Loans that Fit Their Operation

Farmers and ranchers can use the *Farm Loan Discovery Tool* on farmers.gov to find information on USDA farm loans that may best fit their operations.

USDA's Farm Service Agency (FSA) offers a variety of loan options to help farmers finance their operations. From buying land to financing the purchase of equipment, FSA loans can help.

USDA conducted field research in eight states, gathering input from farmers and FSA farm loan staff to better understand their needs and challenges.

### How the Tool Works

Farmers who are looking for financing options to operate a farm or buy land can answer a few simple questions about what they are looking to fund and how much money they need to borrow. After submitting their answers, farmers will receive information on farm loans that best fit their specific needs. The loan application and additional resources also will be provided.

Farmers can download application quick guides that outline what to expect from preparing an application to receiving a loan decision. There are four guides that cover loans to individuals, entities, and youth, as well as information on microloans. The guides include general eligibility requirements and a list of required forms and documentation for each type of loan. These guides can help farmers prepare before their first USDA service center visit with a loan officer.

Farmers can access the *Farm Loan Discovery Tool* by visiting [farmers.gov/fund](https://farmers.gov/fund) and clicking the “Start” button. Follow the prompts and answer five simple questions to receive loan information that is applicable to your agricultural operation. The tool is built to run on any modern browser like Chrome, Edge, Firefox, or the Safari browser, and is fully functional on mobile devices. It does not work in Internet Explorer.

### About Farmers.gov

In 2018, USDA unveiled farmers.gov, a dynamic, mobile-friendly public website combined with an authenticated portal where farmers will be able to apply for programs, process transactions, and manage accounts.

The *Farm Loan Discovery Tool* is one of many resources on farmers.gov to help connect farmers to information that can help their operations. Earlier this year, USDA launched the *My Financial Information* feature, which enables farmers to view their loan information, history, payments, and alerts by logging into the website.

USDA is building farmers.gov for farmers, by farmers. In addition to the interactive farm loan features, the site also offers a Disaster Assistance Discovery Tool. Farmers can visit [farmers.gov/recover/disaster-assistance-tool#step-1](https://farmers.gov/recover/disaster-assistance-tool#step-1) to find disaster assistance programs that can help their operation recover from natural disasters.

For more information, contact the Platte County USDA Service Center at 307-322-4050 or visit [farmers.gov](https://farmers.gov).

## Protect Your Investments in the Soil: USDA’s Modernized Lab Data Mart Website Provides User-Friendly, State-of-the-Art Data

Understanding your specific soil and its dynamic properties, which can change over time due to human impacts, land management, and climate change, can be invaluable. The USDA’s [Natural Resources Conservation Service \(NRCS\)](https://www.nrcs.usda.gov/), through the [National Cooperative Soil Survey \(NCSS\)](https://www.nrcs.usda.gov/ncss/), has a team of soil and data scientists who are bringing customers the best soil information using the newest technology through the Lab Data Mart.

The newly updated [Lab Data Mart](https://www.nrcs.usda.gov/labdata/) website, also known as the National Cooperative Lab Characterization Database, brings valuable soil data to the public’s fingertips through a user-friendly, state-of-the-art interactive map. It includes data estimating soil properties such as organic carbon, clay content, calcium carbonate equivalent, and pH, which is beneficial in soil health assessments. Architects, educators, engineers, farmers, landowners, researchers, scientists, and anyone looking to learn more about their soil can access the latest data to make more informed decisions and reduce potential [soil risks and hazards](#).

The Lab Data Mart includes mid-infrared (MIR) soil spectroscopy data gathered during soil analysis at the NRCS’ Kellogg Soil Survey Laboratory, one of the largest libraries of such data in the world. MIR soil spectroscopy uses the interactions between soil matter and infrared radiation to estimate soil properties.

The Lab Data Mart’s interactive map also links to a national database of soil characterization data, allowing users to locate soil samples and “pedons” analyzed in the lab. A pedon is the smallest unit of soil, containing all the soil horizons of a particular soil type. The customized data in the Lab Data Mart is downloadable to multiple applications and web services and is continuously updated as more sampled soil sites are added or re-visited.

### How Can the Lab Data Mart Help You?

- **Determining carbon credits or improving carbon sequestration:** The data can help you determine how much carbon is currently in the top 12 inches of soil and decide whether you want to sequester more carbon and consider methods and management practices to do so.
- **Leasing or buying land:** The data may help determine if your planned management practices will work; and if not, what could be the added cost to do things differently. Understanding the mineralogy of your soil can help you determine if it requires soil amendments, a new tool or piece of equipment to accomplish your goals, or a change to what you farm or your tillage operation.
- **Taking a more systematic view of your land:** Whether working with an NRCS conservation planner or on your own, the data helps you know more about your soil and ties into how you look at the whole [ecological site](#).

## Who Can Help You Use Lab Data Mart and Help You Understand Your Data?

NRCS State Soil Scientists and their staff, as well as technical service providers, can assist with obtaining the data in Lab Data Mart and understanding it. Contact NRCS at your [local USDA Service Center](#) for help and more information. Visit the [Lab Data Mart website](#), or learn more about NRCS' [Soil Science](#).

## Dates To Remember

**June 2, 2023** Deadline to submit 2022 LIP or ELAP applications for producers who did not participate in those programs in 2022.

**June 19, 2023** -- Office closed in observance of Juneteenth

**July 14, 2023** – Deadline to apply for the PARP or ERP2 program

**July 17, 2023** – Acreage reporting deadline for all crops planted prior to July 15, 2023
