From Lisa's Desk:

Hello Washakie and Hot Springs County Producers:

Please read the following articles and give the Washakie-Hot Springs County office a call if you have questions or need assistance with an application. The phone number is 307-347-2456 ext. 2.

Best wishes,

Lisa Bower

County Executive Director

USDA Offers Disaster Assistance for Producers Facing Inclement Weather

Severe weather events create significant challenges and often result in catastrophic loss for agricultural producers. Despite every attempt to mitigate risk, your operation may suffer losses. USDA offers several programs to help with recovery.

Risk Management

For producers who have risk protection through [Federal Crop Insurance](#) or the [Noninsured Crop Disaster Assistance Program](#) (NAP), we want to remind you to report crop damage to your crop insurance agent or the local Farm Service Agency (FSA) office.

If you have crop insurance, contact your agency within 72 hours of discovering damage and be sure to follow up in writing within 15 days. If you have NAP coverage, file a Notice of Loss (also called Form CCC-576) within 15 days of loss becoming apparent, except for hand-harvested crops, which should be reported within 72 hours.

Disaster Assistance

USDA also offers disaster assistance programs, which is especially important to livestock, fruit and vegetable, specialty and perennial crop producers who have fewer [risk management options](#).

First, the [Livestock Indemnity Program](#) (LIP) and [Emergency Assistance for Livestock, Honeybee and Farm-raised Fish Program](#) (ELAP) reimburses producers for a portion of the value of livestock, poultry and other animals that died as a result of a qualifying natural disaster event or for loss of grazing acres, feed and forage. And, the [Livestock Forage Disaster Program](#) (LFP) provides assistance to producers of grazed forage crop acres that have suffered crop loss due to a qualifying drought. Livestock producers suffering the impacts of drought can also request [Emergency Haying and Grazing](#) on Conservation Reserve Program (CRP) acres.

Next, the [Tree Assistance Program](#) (TAP) provides cost share assistance to rehabilitate and replant tree, vines or shrubs loss experienced by orchards and nurseries. This complements NAP or crop insurance coverage, which cover the crop but not the plants or trees in all cases.

For LIP and ELAP, you will need to file a Notice of Loss for livestock and grazing or feed losses within 30 days and honeybee losses within 15 days. For TAP, you will need to file a program application within 90 days.

Documentation

It's critical to keep accurate records to document all losses following this devastating cold weather event. Livestock producers are advised to document beginning livestock numbers by taking time and date-stamped video or pictures prior to after the loss.

Other common documentation options include:

- Purchase records
- Production records
- Vaccination records
- Bank or other loan documents
- Third-party certification

Other Programs

The [Emergency Conservation Program](#) and [Emergency Forest Restoration Program](#) can assist landowners and forest stewards with financial and technical assistance to restore damaged farmland or forests.

Additionally, FSA offers a variety of loans available including emergency loans that are triggered by disaster declarations and operating loans that can assist producers with credit needs. You can use these loans to replace essential property, purchase inputs like livestock, equipment, feed and seed, or refinance farm-related debts, and other needs.

Meanwhile, USDA's Natural Resources Conservation Service (NRCS) provides financial resources through its [Environmental Quality Incentives Program](#) to help with immediate needs and long-term support to help recover from natural disasters and conserve water resources. Assistance may also be available for emergency animal mortality disposal from natural disasters and other causes.

Additional Resources

Additional details – including payment calculations – can be found on our [NAP](#), [ELAP](#), [LIP](#), and [TAP](#) fact sheets. On farmers.gov, the [Disaster Assistance Discovery Tool](#), [Disaster-at-a-Glance fact sheet](#), and [Farm Loan Discovery Tool](#) can help you determine program or loan options.

While we never want to have to implement disaster programs, we are here to help. To file a Notice of Loss or to ask questions about available programs, contact your local USDA Service Center. All [USDA Service Centers](#) are open for business, including those that restrict in-person visits or require appointments because of the pandemic.

Before You Break Out New Ground, Ensure Your Farm Meets Conservation Compliance

The term “sodbusting” is used to identify the conversion of land from native vegetation to commodity crop production after December 23, 1985. As part of the conservation provisions of the Food Security Act of 1985, if you're proposing to produce agricultural commodities (crops that require annual tillage including one pass planting operations and sugar cane) on land that has been determined highly erodible and that has no crop history prior to December 23, 1985, that land must be

farmed in accordance with a conservation plan or system that ensures no substantial increase in soil erosion.

Eligibility for many USDA programs requires compliance with a conservation plan or system on highly erodible land (HEL) used for the production of agricultural commodities. This includes Farm Service Agency (FSA) loan, disaster assistance, safety net, price support, and conservation programs; Natural Resources Conservation Service (NRCS) conservation programs; and Risk Management Agency (RMA) Federal crop insurance.

Before you clear or prepare areas not presently under production for crops that require annual tillage, you are required to file Form AD-1026 “Highly Erodible Land Conservation and Wetland Conservation Certification,” with FSA indicating the area to be brought into production. The notification will be referred to NRCS to determine if the field is considered highly erodible land. If the field is considered HEL, you are required to implement a conservation plan or system that limits the erosion to the tolerable soil loss (T) for the predominant HEL soil on those fields.

In addition, prior to removing trees or conducting any other land manipulations that may affect wetlands, remember to update form AD-1026, to ensure you remain in compliance with the wetland conservation provisions.

Prior to purchasing or renting new cropland acres, it is recommended that you check with your local USDA Service Center to ensure your activities will be in compliance with the highly erodible land and wetland conservation provisions.

For additional information on highly erodible land conservation and wetland conservation compliance, contact [your local USDA Service Center](#).

USDA Develops Simplified Direct Loan Application to Improve Customer Service

The U.S. Department of Agriculture (USDA) has developed a simplified direct loan application to provide improved customer experience for producers applying for loans from the Farm Service Agency (FSA). The simplified direct loan application enables producers to complete a more streamlined application, reduced from 29 to 13 pages. Producers will also have the option to complete an electronic fillable form or prepare a traditional, paper application for submission to their local FSA farm loan office. The paper and electronic versions of the form will be available starting March 1, 2023.

Approximately 26,000 producers submit a direct loan application to the FSA annually, but there is a high rate of incomplete or withdrawn applications, due in part to a challenging and lengthy paper-based application process. Coupled with the Loan Assistance Tool released in October 2022, the simplified application will provide all loan applicants access to information regarding the application process and assist them with gathering the correct documents before they begin the process. This new application will help farmers and ranchers submit complete loan applications and reduce the number of incomplete, rejected, or withdrawn applications.

In October 2022, USDA launched the Loan Assistance Tool, an online step-by-step guide that provides materials to help an applicant prepare their farm loan application in one tool. Farmers can access the Loan Assistance Tool by visiting farmers.gov/farm-loan-assistance-tool and clicking the ‘Get Started’ button. The tool is built to run on any modern browser like Chrome, Edge, Firefox, or the Safari browser. A version compatible with mobile devices is expected to be available by the summer. It does not work in Internet Explorer.

The simplified direct loan application and Loan Assistance Tool are the first of multiple farm loan process improvements that will be available to USDA customers on farmers.gov in the future. Other improvements that are anticipated to launch in 2023 include:

- An interactive online direct loan application that gives customers a paperless and electronic signature option, along with the ability to attach supporting documents such as tax returns.
- An online direct loan repayment feature that relieves borrowers from the necessity of calling, mailing, or visiting a local Service Center to pay a loan installment.

USDA provides access to credit to approximately 115,000 producers who cannot obtain sufficient commercial credit through direct and guaranteed farm loans. With the funds and direction Congress provided in Section 22006 of the Inflation Reduction Act, USDA took action in October 2022 to [provide relief to qualifying distressed borrowers](#) while working on making transformational changes to loan servicing so that borrowers are provided the flexibility and opportunities needed to address the inherent risks and unpredictability associated with agricultural operations.

Soon, all direct loan borrowers will receive a letter from USDA describing the circumstances under which additional payments will be made to distressed borrowers and how they can work with their FSA local office to discuss these options. Producers can explore all available options on all FSA loan options at fsa.usda.gov or by contacting their [local USDA Service Center](#).
